OTTAWA  
GOVERNMENT PRINTING BUREAU  
1908

## NOTICE.

The department of Trade and Commerce desires to draw the attention of manufacturers, exporters and others to the change in the arrangement of the subject-matter of the Monthly Report in this and subsequent issues. This change will, in the opinion of the department, enable the publication of the Monthly Report to be issued earlier than heretofore.

The department would also request the attention of those interested to the trade figures published on page 67, setting forth in concise form the possibilities of the trade in British South Africa. The figures speak for themselves, but from observation it will be noted that the imports and exports are arranged so as to show in compact form the value of the various articles imported into or exported from British South Africa, together with the value of said articles imported from and exported to Great Britain, United States and Canada.

The trade of British Honduras is arranged in similar manner, and will be found at page 63. It will be observed that the trade done with Canada is very small. The United States manufacturers and exporters, however, have made considerable progress in extending their trade with British Honduras. Canada, no doubt, could better her position, commercially, if an effort were made to increase her trade in that quarter. A large percentage of the articles imported are of a class such as Canadians have for export.

DEPARTMENT OF TRADE AND COMMERCE,

OTTAWA, CANADA.

June 29, 1908.

## TRADE COMMISSIONER SERVICE.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Trade Commissioners and Commercial Agents into any subject of general interest.

Canadian Trade Commissioners and Commercial Agents should be kept supplied with catalogue, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b., at port of shipment, or, and more preferable, c.i.f. at foreign port.

### CANADIAN TRADE COMMISSIONERS.

#### AUSTRALASIA.

J. S. Larke, The Exchange, Sydney, agent also for New Zealand.  
D. H. Ross, Stock Exchange Building, Melbourne.

#### BRITISH WEST INDIES.

L. Burnet, 16 Parliament St., York.  
John Webster, 17-19 Victoria St., Belfast.  
John McLennan, 26 Guild St., Aberdeen.  
E. O'Kelly, 44 Dawson St., Dublin.  
Malcolm McIntyre, 35-37 St. Enoch Sq., Glasgow.

## BRISTOL.

## REPORT OF TRADE COMMISSIONER.

*(Mr. W. A. MacKinnon.)*

BRISTOL, April 30, 1908.

## WEATHER CONDITIONS IN CANADA.

As a result of several conversations with different importers with regard to the best means for obtaining reliable information as to weather conditions in Canada, I finally brought the matter to the attention of the Provision Trade Association. After a discussion, this association has sent me, through its secretary, the following suggestion :—

## TRUSTWORTHY PERIODIC WEATHER REPORTS.

‘It is desirable to have reports at stated and regular periods, forwarded to the United Kingdom, and furnished to traders interested in the importation of Canadian produce, dealing with weather conditions prevailing from time to time in the various provinces of the Dominion. Such reports would show what effects the state of the weather might have on the agricultural crops of the Dominion and on dairy and hog produce. Though such reports are now furnished from private sources from time to time, it is felt that an unbiased scientific system of government departmental reports would be much more reliable, and would be of considerably greater value, if provided at regular and stated periods, and at times when they would be of most service. Naturally there are periods of the year when more frequent reports would be required than at others. It is greatly hoped that facilities either exist or could be provided by the government for carrying out this suggestion.’

## BRISTOL'S TRADE CONNECTIONS.

An indication of Bristol's world-wide commercial relations will be given in June, when the Chamber of Commerce is to be addressed, at its annual banquet, by Lord Strathcona and Lord Dudley, the newly appointed Governor General of Australia. Not only will the Chamber of Commerce make a very special event of this function, but the Lord Mayor and civic authorities will receive and entertain these visitors with special distinction. The chief point to be emphasized, is Bristol's favourable situation in the ‘gates of the west’ as a portal for the reception of commerce from Canada and the Commonwealth, destined for the West of England, the Midlands, or London. Needless to say, the advantages of the port as the English terminus for the ‘All-Red Route,’ will also be clearly brought out.

W. A. MacKINNON.

## MEXICO.

## REPORT OF TRADE COMMISSIONER.

*(Mr. A. W. Donly.)*

APARTADO, 91B.

MEXICO CITY, MEX., April 24, 1908.

## FOREIGN TRADE FOR FISCAL YEAR 1905-06.

An analysis of the foreign trade of Mexico shows some interesting figures, and demonstrates the steady growth of business generally in the republic and the desira-

bility on the part of Canadians of making more than a tentative effort to secure a firm foothold in this continually expanding market.

TABLE OF IMPORTS FOR TEN YEARS.

During the ten years ending on June 30, 1906, the total imports by years, were as follows, the amounts being reduced to the equivalent in value in Canadian currency :—

|                | Free.        | Dutiable.     | Total.        |
|----------------|--------------|---------------|---------------|
| 1896-97.....   | \$ 4,972,762 | \$ 36,651,663 | \$ 41,624,425 |
| 1897-98.....   | 8,534,172    | 40,102,473    | 48,636,645    |
| 1898-99.....   | 8,066,092    | 45,743,628    | 53,809,720    |
| 1899-1900..... | 9,979,280    | 54,419,023    | 64,398,303    |
| 1900-01.....   | 13,109,727   | 53,400,358    | 66,510,085    |
| 1901-02.....   | 16,983,292   | 58,656,948    | 75,640,240    |
| 1902-03.....   | 21,866,345   | 73,794,202    | 95,660,547    |
| 1903-04.....   | 17,530,286   | 71,400,389    | 88,930,675    |
| 1904-05.....   | 35,084,972   | 74,917,400    | 110,002,372   |

## FREE IMPORTS TREBLED IN DECADE.

From the above figures it will readily be seen that the imports under the free list, not including the year 1905-06, more than tripled during the decade while those subject to duty show a value of more than double in the same period. In connection with the amount on the free list during the last year of the period it is necessary to explain that it was during this year that the gold standard went into effect, and as an arrangement was made with the government of the United States to mint a large amount of Mexican coin, this amount includes about twenty millions of gold coin minted and imported under this arrangement. It will therefore be fairer to calculate the free imports, under normal conditions, as somewhat in excess of sixteen millions during the last five years of the decade, or well over a 300 per cent increase over the first year thereof. Also it will be seen that the increase of the total amount of imports, both free and dutiable, was over three hundred per cent in the decade, exclusive of the twenty millions of coin above referred to, the increase was nearly 225 per cent.

## GENERAL CLASSIFICATION OF IMPORTS.

A general classification of the imports during the year 1905-06 shows the following headings with their respective amounts opposite :—

*Animal materials—*

|                      |              |
|----------------------|--------------|
| Live animals.....    | \$ 1,504,103 |
| Animal products..... | 3,766,097    |
| Manufactures.....    | 2,889,395    |

*Vegetable materials—*

|                                 |              |
|---------------------------------|--------------|
| Textile fibres.....             | \$ 2,197,377 |
| Fruits and grains.....          | 5,484,780    |
| Sundry vegetable materials..... | 819,722      |
| Sundry vegetable products.....  | 2,177,091    |
| Lumber and woods.....           | 2,766,800    |
| Manufactures.....               | 2,841,310    |

*Mineral materials—*

|                                |              |
|--------------------------------|--------------|
| Gold, silver and platinum..... | \$21,448,654 |
| Copper and its alloys.....     | 3,415,139    |
| Tin, lead and zinc.....        | 448,078      |
| Iron and steel.....            | 10,824,720   |
| Other metals.....              | 173,527      |
| Stones and earths.....         | 9,061,507    |

*Textiles and their manufactures—*

|                                              |              |
|----------------------------------------------|--------------|
| Cotton.. . . . .                             | \$ 6,314,260 |
| Linen, hemp, &c....                          | 640,915      |
| Woollen... . . . .                           | 2,340,566    |
| Silk, pure.. . . .                           | 1,092,296    |
| Silk, with mixture...                        | 915,805      |
| Silk, artificial....                         | 23,314       |
| Chemical and pharmaceutical products.. . . . | 3,863,184    |
| Spirituuous and fermented drinks....         | 3,632,413    |
| Paper and its applications.. . . .           | 2,718,960    |
| Machinery and implements.. . . .             | 10,205,361   |
| Vehicles.... . . .                           | 2,297,579    |
| Arms and explosives... . . . .               | 2,061,433    |
| Sundry.. . . . .                             | 4,077,938    |

## IMPORTS IN FISCAL YEAR 1906-07.

While the completed statistics of Mexico's foreign trade only bring us down to the end of the fiscal year 1905-06, the monthly bulletin gives us the total figures, but with very little detail, for the year ended June 30 last. The total imports of a value of \$116,681,694 show a more substantial increase as compared with other years.

The comparison with the year 1905-06, under general headings, is as follows :—

|                                              | 1906-07.      | 1905-06.      |
|----------------------------------------------|---------------|---------------|
| Animal materials....                         | \$ 9,617,090  | \$ 8,159,595  |
| Vegetable materials....                      | 15,865,378    | 16,287,130    |
| Mineral materials....                        | 41,435,886    | 45,371,625    |
| Textiles and manufactures.. . . .            | 13,249,347    | 11,327,156    |
| Chemical and pharmaceutical products.. . . . | 4,754,473     | 3,863,182     |
| Spirituuous and fermented drinks....         | 3,648,117     | 3,632,413     |
| Paper and its applications.. . . .           | 3,013,529     | 2,718,960     |
| Machinery and implements....                 | 13,867,873    | 10,205,361    |
| Vehicles.....                                | 4,500,155     | 2,297,579     |
| Arms and explosives.. . . .                  | 1,953,965     | 2,961,433     |
| Sundry.... . . .                             | 4,776,881     | 4,077,938     |
| Total.. . . . .                              | \$116,681,694 | \$110,002,372 |

It will thus be seen that the net increase in imports in 1906-07 over those in 1905-06 amounts to \$6,679,322. The total under the heading 'Mineral materials,' in which is included the imports of gold coin, shows a net loss of nearly four millions, and though the details of the bulletin above referred to do not state the figures for the coin imported, it is reasonable to presume that the falling off in that item alone was considerably in excess of the shortage mentioned, as in all probability a part of the shortage was made up in increased imports in iron and steel. In any event, it is entirely safe to estimate the imports, eliminating entirely the matter of coin, at more than ten millions in excess of the previous year.

## COUNTRIES OF ORIGIN OF IMPORTS.

It may be of interest to show the principal countries of origin of these imports and for this purpose, with the exception of Canada, I shall only give figures for those countries whose trade was in excess of one million dollars.

|                         | 1904-05.      | 1905-06       | 1906-07.      |
|-------------------------|---------------|---------------|---------------|
| United States.. . . .   | \$ 49,988,525 | \$ 72,770,816 | \$ 73,183,293 |
| Germany.. . . .         | 10,225,716    | 10,334,365    | 12,214,626    |
| Great Britain . . . . . | 10,821,849    | 10,090,872    | 11,796,462    |
| France.. . . .          | 8,858,931     | 8,085,668     | 8,816,893     |
| Spain.. . . .           | 3,868,446     | 3,796,493     | 3,986,488     |
| Belgium... . . . .      | 1,498,011     | 1,269,190     | 1,561,595     |
| Canada.. . . .          | 26,195        | 139,200       | 224,240       |

## CANADIAN IMPORTS CREDITED TO THE UNITED STATES.

While the imports from Canada show a remarkably good percentage of increase during the three years tabulated, the total value is still quite insignificant. However, the actual imports from Canada, as may be seen by referring to Canadian foreign trade reports, are considerably in excess of the value herein given, amounting, in the fiscal year (9 months) July, 1906 to March, 1907, to the sum of \$317,115. The discrepancy in the figures of the two sets of statistics is to be accounted for by the fact that goods coming to Mexico from Canada by American transportation lines are usually accredited, by the customs authorities here, as imports from the United States.

## IMPORTS OF SPECIAL INTEREST TO CANADIAN EXPORTERS.

The following table will give the detailed imports, with countries of origin, of those products and manufactures which Canada should be in a position to supply to this market. Wherever Canada is at present supplying any portion of same the amount will be given, however, small.

|                                                                      |              |
|----------------------------------------------------------------------|--------------|
| Live animals, N.E.S.. . . . .                                        | \$ 1,136,610 |
| United States.. . . .                                                | \$ 1,103,741 |
| Spain.. . . .                                                        | 14,860       |
| Switzerland.. . . .                                                  | 10,184       |
| France.. . . .                                                       | 3,340        |
| Canada.. . . .                                                       | 617          |
| Geldings.. . . .                                                     | 146,660      |
| United States.. . . .                                                | 145,157      |
| Hogs.. . . .                                                         | 220,000      |
| United States.. . . .                                                | 220,000      |
| Meats, fish and shell-fish, dried, salted, smoked and in brine.... . | 140,154      |
| United States.. . . .                                                | 94,273       |
| Norway.. . . .                                                       | 29,409       |
| Spain.. . . .                                                        | 5,041        |
| Germany.. . . .                                                      | 3,734        |
| Canada.. . . .                                                       | 328          |
| Preserved meats and fish.. . . .                                     | 997,301      |
| United States.. . . .                                                | 500,325      |
| Spain.. . . .                                                        | 285,000      |
| France.. . . .                                                       | 104,500      |
| Germany.. . . .                                                      | 45,000       |
| Great Britain.. . . .                                                | 14,000       |
| Italy.. . . .                                                        | 13,000       |
| Norway.. . . .                                                       | 11,000       |
| Portugal.. . . .                                                     | 10,500       |
| Switzerland.. . . .                                                  | 9,000        |
| Canada.. . . .                                                       | 2,400        |
| Eggs, fresh.. . . .                                                  | 150,168      |
| United States.. . . .                                                | 149,531      |
| Lard.. . . .                                                         | 821,936      |
| United States.. . . .                                                | 821,880      |

|                                                         |            |            |
|---------------------------------------------------------|------------|------------|
| Butter.....                                             |            | \$ 165,642 |
| United States.....                                      | \$ 125,922 |            |
| Denmark.....                                            | 16,317     |            |
| Spain.....                                              | 10,387     |            |
| France.....                                             | 4,490      |            |
| Germany.....                                            | 4,090      |            |
| Canada.....                                             | 230        |            |
| Cheese, all kinds.....                                  |            | 236,935    |
| Holland.....                                            | 137,975    |            |
| United States.....                                      | 48,139     |            |
| Switzerland.....                                        | 20,746     |            |
| Germany.....                                            | 4,090      |            |
| Canada.....                                             | 440        |            |
| Codliver oil (in glass).....                            |            | 11,537     |
| United States.....                                      | 10,225     |            |
| France.....                                             | 1,149      |            |
| Codliver oil (in cans or kegs).....                     |            | 16,306     |
| United States.....                                      | 5,300      |            |
| France.....                                             | 3,542      |            |

In an early future report I shall deal with the question of Mexican exports in relation to the foreign trade of the period treated in this report.

A. W. DONLY.

## AUSTRALASIA.

### REPORT OF TRADE COMMISSIONER FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,  
MELBOURNE, April 13, 1908.

#### PRESENT POSITION OF AUSTRALIAN CUSTOMS TARIFF OF 1907.

The 1907 customs tariff, with subsequent amendments, was passed by the Federal House of Representatives in December, 1907. The debate in the senate upon the same measure concluded early in April, 1908. The number of items in the tariff is 450, but if sub-sections are included the number is very much larger. The result of the deliberations of the senate is that practically a new tariff has been recommended, since about 300 alterations are requested. Of these alterations about 70 are for increases of duty and about 100 for decreases, leaving the balance for omissions, transfers and the correction of anomalies.

Some idea of the magnitude of the work yet to be accomplished is conveyed in the procedure which has to be followed. After the consideration of the requests, the measure may be returned by the representatives to the senate with perhaps a reiteration of the fiscal decisions first submitted. The senate may concede a certain number of its former requests and insist on others. When the 1902 tariff was considered, there were exchanges between the chambers, and agreement was arrived at by compromise. Through various causes the negotiations may be indefinitely prolonged. It would now appear that considerable time may elapse before the Australian tariff of 1907 becomes law.

This delay is to be regretted from a Canadian point of view, as the prime minister of Australia in his cabled promise to the prime minister of Canada in November last, made the final settlement of the tariff an indispensable condition to the consideration of the Canadian reciprocal trade proposals submitted in August, 1907.

#### POLITICAL CRISIS IN COMMONWEALTH.

Business men are eagerly discussing the present political crisis in the Commonwealth parliament, which may result in the resignation of the ministry. As to the position of the tariff bill unless there is a dissolution it will still be capable of being

taken up by a new government at the stage it has reached. If a dissolution occurred suddenly the bill would lapse. From the day of the dissolution the former tariff would have to be reverted to, besides which the increased duties collected since August, 1907, would require to be refunded. It may be stated, however, that an immediate dissolution does not appear to be one of the possibilities of the present situation.

#### REMARKABLE INCREASE IN AUSTRALIAN CUSTOMS REVENUE.

To the tariff introduced in August last is mainly attributed the large increase in the Commonwealth customs revenue, which yielded over £1,000,000 per month for the first nine months of the current financial year. The increase shown by the total for nine months (July, 1907 to March, 1908) over the total for the corresponding period of the previous year, is £1,757,402. The increase in Victoria was £567,078 and in New South Wales £816,925. The comparative statement is as follows:—

|                             | For the nine months ended on<br>March 31, 1908.    March 31, 1907. |            |
|-----------------------------|--------------------------------------------------------------------|------------|
| New South Wales.. . . . .   | £3,611,469                                                         | £2,794,544 |
| Victoria.. . . . .          | 2,984,568                                                          | 2,417,490  |
| Queensland.. . . . .        | 894,408                                                            | 759,211    |
| South Australia . . . . .   | 748,396                                                            | 564,725    |
| Western Australia.. . . . . | 627,106                                                            | 612,884    |
| Tasmania.. . . . .          | 206,266                                                            | 165,957    |
| Total.. . . . .             | £9,072,213                                                         | £7,314,811 |

#### BOUNTIES ON AUSTRALIAN PRODUCTS.

The Commonwealth Bounties Act of 1907, which is now in force, provides for the payment of a total sum of £339,000, spread over a term of years, as bounty for the production in Australia of certain specified articles. An imperative requirement of the Act is that 'white labour only' shall be employed in the production of the goods upon which bounty is to be claimed. Exceptions as to white labour are made in the case of an aboriginal native or of any coloured person born in Australia and having one white parent. It is stipulated that the wages paid in the production of bountiable articles must be the standard wages paid in the place or district, but this does not apply to members of the family of a grower or producer. The Act provides that in every case the goods produced must be sound and of merchantable quality. If the maximum amount payable on any one item has not been expended during a particular year, it will be available in any subsequent year. The regulations under the Act have recently been issued and it is anticipated, in at least a number of the articles, that the full amount of the bounties available each year will be applied for.

## SCHEDULE OF GOODS UPON WHICH BOUNTY IS PAYABLE.

The first schedule of the Australian Bounties Act, here produced, shows the goods upon which bounty is payable, the number of years during which payments will be made and the rates of bounty.

| Goods on production of which Bounties are granted.                                         | Period dating from 1st July, 1907, during or in respect of which Bounty may be paid.                                                                | Rates of Bounty.                                           | Maximum amounts which may be paid in any one year. |
|--------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|----------------------------------------------------|
|                                                                                            |                                                                                                                                                     |                                                            | £                                                  |
| Cotton, ginned.....                                                                        | 8 years .....                                                                                                                                       | 10 per cent on market value.                               | 6,000                                              |
| Fibres—                                                                                    |                                                                                                                                                     |                                                            |                                                    |

| Combed wool or tops, exported .....                                                        | 3 years, commencing from 1st January, 1909.....<br>1 year, commencing from 1st January, 1912.....<br>1 year, commencing from 1st January, 1913..... | 1½d. per lb. ....<br>1d. per lb. . . .<br>1d. per lb. .... | }<br>}<br>} 10,000                                 |

## REDUCED PRODUCTION IN VICTORIAN DRIED FRUITS.

This season all the preliminary reports made by experts at the Mildura irrigation settlement in the State of Victoria have been at fault in over-estimating the crop returns of dried fruits. Instead of the substantial increase anticipated there is a marked reduction in the output in comparison with the 1907 returns. The previous harvest of sultanias gave about 2,200 tons, being an average of a ton to the acre. The present harvest is being obtained from some 2,300 acres from which 1,400 tons of sultanias is expected or an average of 12 cwt. to the acre. In lexias, which were much favoured in Canada, the production in 1907 was 2,700 tons, but in 1908, from practically the same area, the crop will probably not exceed 1,500 tons.

It is recognized that last season the crops at Mildura were unusually heavy, and in natural order would be followed by a lighter yield. It was thought that the

increased area now coming into bearing would have resulted in a tonnage equal to that obtained in 1907. Various reasons, including faulty irrigating methods and climatic conditions, are given as to the causes of the limited quantities marketed. The conditions at Renmark, South Australia, are similar and while the figures of this settlement are not yet available, the following table shows the Mildura returns in comparison with the previous season:—

|                    | 1908<br>Tons. | 1907<br>Tons. |
|--------------------|---------------|---------------|
| Currants.. . . . . | 350           | 500           |
| Sultanas.. . . . . | 1,400         | 2,200         |
| Lexias.. . . . .   | 1,500         | 2,700         |

#### AUSTRALIAN DRIED FRUITS FOR CANADA.

Following up last year's successful introduction of Australian dried fruits into Canada—where the quality proved to be so satisfactory—a further effort has been made by a Melbourne firm of exporters to continue the trade, even if reduced in volume. Recently cabled quotations were sent to some 50 importing firms in various parts of the Dominion, but the replies received indicated that Californian dried fruits, admittedly inferior to Australian, were being quoted at lower prices. In view of the shortage in Victorian and South Australian production, there is not much prospect of fruit being available for export to Vancouver at prices which can meet competition from other sources of supply. The prices declared for export to Canada for brown lexias extra, and brown lexias are 2½d. and 2½d. (4½ and 4¼ cents) per lb., respectively, less 2½ per cent f.o.b. Melbourne.

#### TASMANIAN AND AUSTRALIAN APPLES EXPORTED, 1908.

Compared with the last season's figures to the corresponding date, the exports of Tasmanian and Australian apples show an increase, so far this year, of over 92,000 cases. The record shipment comprising 72,991 cases was made at Hobart. The shipping season has not yet concluded, but the total shipments to the United Kingdom and the continent are given below in comparative form:—

| From                  | 1907.<br>Cases. | 1908.<br>Cases. |
|-----------------------|-----------------|-----------------|
| Melbourne.... . . . . | 100,825         | 74,611          |
| Hobart.... . . . .    | 273,623         | 312,612         |
| Adelaide.. . . . .    | 13,019          | 98,667          |
| Sydney.. . . . .      | 9,744           | 2,355           |
| Fremantle.... . . . . |                 | 1,267           |
| Total.. . . . .       | 397,211         | 489,512         |

#### SHRINKAGE IN EXPORTS OF AUSTRALIAN BUTTER.

The shipment of butter from Melbourne to the United Kingdom has almost ceased for the season, and, as the figures below indicate, there has been a marked shrinkage in the quantity exported, attributable to adverse weather conditions for the dairying industry.

A comparison of shipments from Australia to Great Britain only from July 1 to date is given as follows:—

| From                  | 1906-07.<br>Tons. | 1907-08.<br>Tons. |
|-----------------------|-------------------|-------------------|
| Melbourne.... . . . . | 16,257            | 10,728            |
| Sydney.. . . . .      | 9,820             | 6,107             |
| Adelaide.... . . . .  | 885               | 614               |
| Brisbane.... . . . .  | 4,364             | 3,392             |
| Totals.. . . . .      | 31,326            | 20,841            |

The exports, this season, have been nearly 10,500 tons less than the quantity shipped in 1907.

#### AUSTRALIAN WHEAT HARVEST.

The Commonwealth crop of wheat for 1907-08 may be summarized in comparison with that for the previous season as follows :—

|                                   | 1906-07.<br>Bushels.   | 1907-08.<br>Bushels.   |
|-----------------------------------|------------------------|------------------------|
| Victoria.. . . . .                | 22,618,043             | 12,100,780             |
| South Australia.. . . . .         | 17,145,796             | 20,720,000             |
| New South Wales.. . . . .         | 21,817,938             | 8,686,000              |
| Western Australia.. . . . .       | 2,758,567              | 3,492,000              |
| Queensland and Tasmania.. . . . . | 1,760,310              | 1,000,000              |
|                                   | <hr/> 66,100,654 <hr/> | <hr/> 45,998,780 <hr/> |

The total Commonwealth crop for the present season, about 46,000,000 bushels, leaves an exportable surplus of about 20,000,000 bushels, in addition to the carryover from last season, after providing for Australian consumption for 1903. Shipments have already been made to the extent of about 7,500,000 bushels, so that the quantity still available for export from Australia is about 12,500,000 bushels, in addition to last season's carryover.

Wheat for export is being quoted at Adelaide at 4s. 1½d. (\$1.00), and 4s. 3½d. (\$1.04) f.o.b. Melbourne for f.a.q. Flour for export is quoted in both places at £8 7s. 6d. (\$40.75) for bags and £8 5s. 0d. (\$40.14) for sacks. Fair shipments are being made from Adelaide to South Africa.

#### PRESERVATION OF GREEN FRUIT FOR EXPORT.

According to the Victorian government's expert, the export fruit trade is likely to benefit largely by the Little process of cooling atmosphere, now on trial at the cool stores in Melbourne. By means of machinery, air is fanned through the films of water and passed on to the chamber in which the fruit is kept. The process is claimed to effect a great saving on the cost of refrigerating, and apples and pears are said to have been kept by means of it in excellent condition for a considerable time. A practical trial of the invention is to be made in connection with the exportation of apples to London.

#### POTATO AND ONION GRADING MACHINE.

Some time ago the Victorian government offered a prize of £50 for a machine to grade potatoes and onions which attracted half a dozen competitors, none of whom were successful. An official test was recently made near Melbourne, of an improved machine which, when in operation separates the dirt from the produce. Potatoes are graded into three classes, known as pig, which are too small for seed, seed which are too small for table use, and market potatoes. The merits claimed for the machine are simplicity, effectiveness, and cheapness in price and working.

#### AUSTRALIAN TRADE CONDITIONS.

The continued absence of rains in Victoria and South Australia is delaying farming operations in many districts and, in addition, is causing growers of wheat to hold on to their stocks. In Western Australia, Queensland and portions of New South Wales, the country is in splendid condition. Importers are viewing the future with caution, and indents for oversea goods are consequently more restricted. Copious rains throughout Victoria and adjoining states would much improve the outlook.

## VANCOUVER STEAMERS.

The *Aorangi*, leaving to-day for Vancouver, is a full ship with both passengers and cargo—indeed more cargo would have been shipped were the space available. The *Manuka*, scheduled to sail on May 11, has all the passenger accommodation already engaged. The *Marama*, leaving on June 8, is a favourite steamer and more than half of her passenger accommodation has been booked. This is the heavy outward passenger season, and the Australian traffic, to and from England, via Canada, is year by year becoming a more popular route.

## CANADIAN MOTOR CARS AND MACHINERY.

The buyer of a lumber company, interested in saw-mills in New Zealand, recently left Melbourne for Canada with a view of purchasing a considerable quantity of saw-mill machinery.

Canadian motor cars of splendid appearance, and undoubted excellence in construction, are finding an increased sale in Australia since the amended duties came into operation. Orders in much increased volume are going forward, from Melbourne and Adelaide, for varied lines of Canadian goods.

D. H. ROSS.

## SWEDEN, NORWAY AND DENMARK.

## REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, GAUBBEGD No. 4, May 4, 1908.

## SWEDISH IMMIGRATION EXCEEDS EMIGRATION.

The population of Sweden has during 1907 increased by 42,154 as compared with an increase of 43,204 in 1906 and 31,482 on an average during the years 1901-1905. The principal increase for 1907 was experienced by the cities with 34,073 persons. The total population of Sweden at the commencement of 1908 was 5,379,209, of which 1,306,469 were in the cities and 4,072,740 in the rural districts. The emigration from Sweden during 1907 was 22,893 persons, an average as compared with 29,36 for the years 1901-1905.

The prices of the necessities of life showed a rising tendency, both as regards 29,536 for the years 1901-1905.

## LOCKOUTS PROVED SUCCESSFUL.

During 1907 there occurred 298 labour conflicts, embracing 21,654 labourers with a total loss of 531,000 working days. The corresponding figures for 1906 were 277 strikes, 18,612 strikers and 483,500 working hours lost. The weapon of the employers, the lockout, commenced to be used more commonly during 1907. Not less than 24 labour conflicts had their origin in a lockout, while the corresponding figure for 1906 was 7. On account of this mode of proceeding, the employers have also more frequently than before succeeded in getting their conditions accepted. Of the other labour conflicts, 237 had their origin in strikes.

## IMPORT AND EXPORT OF EGGS IN 1907.

During 1907 there were exported from Sweden 36,138,000 pieces of eggs as against 35,690,000 pieces in 1906. At the same time the import of eggs went down to 68,408,000 in 1907 as against 69,427,000 in 1906.

## GREAT PORT LABOUR CONFLICT IN SWEDEN.

There is a prospect of a blockade of the entire Swedish coast, which may put a stop to both import and export.

The stevedores at the ports of Norrland, Sweden, had demanded preference of employment for organized labourers. This the Employers' Association would not concede. On April 22, negotiations between the parties were broken off, and a block-

ade of arriving vessels has already commenced. The Employers' Association will retort by declaring a lockout for all Swedish ports.

The fact, that this trouble is likely to involve the trade of the whole country must, one should think, lead to a speedy settlement of the dispute.

#### CHANGES IN THE DANISH CUSTOMS TARIFF.

The Danish rates of customs will likely be reduced for a number of principal products. Thus, it is proposed to do away entirely with the duty on kerosene and reduce the duty on coal by two-thirds. Further, the duty on coffee, rice, sago and newspapers will also be considerably reduced.

#### NORWEGIAN SEALING AND WHALING IN THE SOUTH SEAS.

About midway between the Cape and Australia there is a row of islands by the name of Kerguelen belonging to France. The waters round these islands abound with all species of whales and seals. Since 1893 a French company, Bossiere Bros., have had government concessions to carry on whaling and sealing there for a period of fifty years.

A Norwegian firm at Christiania has now contracted with Bossiere Bros. to take over all the former rights of this company for the remaining period of the contract, viz., 22 years. In fact these rights are equal to a monopoly, and accordingly the best prospects are entertained for the success of the new undertaking which will be launched as a share company with a capital of 1 mill. kroner or 267,000 dollars.

## NEWFOUNDLAND.

## REPORT OF TRADE COMMISSIONER.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, May 14, 1908.

## FALLING OFF IN SEALING VOYAGE.

The last of the sealing steamers to return from the ice-fields was the *Diana* on May 7, and the results of the fishery are not known. The total catch has been 213,863, which is 31,188 less than last year, and a decrease in value of \$80,767.66.

Notwithstanding the fact that the weather conditions on the coast, early in March when the steamers left for the ice, were exceptionally favourable, the season proved to be severe, and resulted in the loss of three vessels, which were crushed in the heavy ice-floes. Fortunately these wrecks were not attended with loss of life, as the crews were able to make their escape to other steamers that happened to be in the vicinity. It is understood that the owners of the lost steamers are already taking steps to replace them with modern specially constructed, and more powerful vessels, that will be adapted for freighting purposes, when not employed as sealers during the few weeks that the seal fishery lasts. It may be noted that this business is undergoing a change in recent years, and is passing into the control of a few wealthy shipping concerns. Fewer men and ships are engaged in the work than was the case in former seasons.

## UNCURED FISH BULK IS SMALL.

A local trade journal writes as follows regarding last season's uncured fish: 'The impression generally held last fall, that there was a very large quantity of codfish remaining uncured in the various outports, appears to have been an erroneous one; at all events, the fish is not coming into the city this spring in anything like the quantity that was anticipated. Most city dealers now believe that the uncured holdings last fall did not aggregate much more than the quantity stocked in ordinary years, to be carried over for curing during the winter. If these calculations be right, we have now as small a national fish bulk as we have had for many years at this time.'

The following are the quotations here at present:—

|                                            |              |
|--------------------------------------------|--------------|
| Fish, large merchantable, per qtl. . . . . | \$6 00       |
| Fish, small merchantable. . . . .          | 5 00         |
| Fish, large Madeira. . . . .               | 5 00         |
| Fish, small Madeira. . . . .               | 4 80         |
| Fish, large West India. . . . .            | 4 00         |
| Fish, small West India. . . . .            | 3 50         |
| Fish, Labrador. . . . .                    | 3 50 to 3 80 |
| Fish, shore cure. . . . .                  | 4 00 to 4 50 |

## EXPERIMENTAL FARM TO STIMULATE AGRICULTURE.

At the last session of the legislature a sum of \$20,000 annually was voted for the establishment of an experimental farm for the colony, and Professor C. A. Zavitz, of the staff of the Agricultural College at Guelph, Ont., has arrived here to consult with the Minister of Agriculture as to the most efficient way in which the work can be com-

menced and carried on. Owing to the very great importance of the fisheries in the commercial life of the colony, the subject of agriculture has not hitherto received the attention it deserved.

There can be no doubt that the steps now being taken to procure the necessary information, in regard to the capability of the country to produce certain crops to advantage, and to diffuse this knowledge amongst the people, will prove of much benefit in the future, and may obviate the necessity for the large quantities of agricultural produce now imported from Canada and the United States to supply the requirements of the colony.

E. D. ARNAUD.

## BRITISH GUIANA.

### REPORT OF TRADE COMMISSIONER.

(*Mr. E. H. S. Flood.*)

GEORGETOWN, DEMERARA, May 1, 1908.

The government of British Guiana has at the present moment under consideration an offer from Colonel J. L. Link, acting on behalf of the Colonial Railway and Tramway Syndicate, Limited, of London, to construct and maintain a railway from the seaboard through the centre of the colony to the frontier of Brazil. Surveys have not yet been made, but the country has been fairly well mapped out, and no serious engineering difficulties are anticipated.

The proposed railway, which is to be about 250 miles in length, will pass through a nearly level country, partly virgin forest, and partly vast savannahs, sufficiently elevated to preclude any difficulty from swampy areas. The road, if constructed, will be within easy reach of the mountain ranges, which are believed to be a continuation of the gold-bearing formation now being worked in the north. The road is to be of standard gauge, and to have its Brazilian terminus at such a point as to enable it ultimately to connect with the projected Brazilian line from Manoa to Boa Bista. The objective sought, is to tap the upper Amazon valley, and to give an outlet for the freight which is now carried upwards of 1,000 miles, to the mouth of the Amazon. It is upon this through traffic chiefly, that the company hopes, at first, for a remunerative return on the outlay.

### BRITISH GOVERNMENT MAY REFUSE SANCTION.

This project, which is of considerable importance to the colony, involving the probable expenditure of £3,000,000 (three million pounds) has created an intense interest here; but as the British government has refused to sanction a similar proposition for railway construction and land concessions in British Honduras, fears are entertained that this scheme may meet a similar fate.

### OPPORTUNITY FOR CANADIAN ENTERPRISE.

It has been pointed out to me, that if any Canadian railway company would take the matter up, the chance of favourable consideration of such a concession would be greater in their case, and that Canadian trade would immensely benefit by such a Canadian constructed road. There can be no doubt that a large colonization scheme could be successfully carried out. The road would open up the finest hardwood tracts in British Guiana, which at present have no outlet, and would pass through tracts of forest similar to the rubber and balata areas of Brazil. It is believed that the mineral deposits along the proposed line are similar to those which are now being successfully worked on the valleys of the Essequibo.

## LOCAL GOVERNMENT FAVOURABLE.

The government of the colony seems disposed to act liberally though the concessions asked by the present company are very large. They ask in addition to large tracts of land, a guarantee on their bonds of  $3\frac{1}{2}$  per cent interest for ten years, and to be protected from lines paralleling theirs within 100 miles on either side.

## CITY TRADE BRANCH.

## REPORT BY CANADIAN REPRESENTATIVE.

(*Mr. Harrison Watson.*)

73 BASINGHALL STREET,

LONDON, E.C., ENG., April 30, 1908.

## BRITISH APPRECIATION OF CANADIAN MARKET INCREASING.

Although the business community of Great Britain appears to be fully aware of the temporary setback which has been experienced in the Dominion, and indeed is inclined to exaggerate its importance, we continue to receive numerous applications from houses in the United Kingdom seeking information, with a view to the development of export trade to Canada.

It is interesting to note the marked increase in the number of firms who are sending out their own representatives to examine into conditions and report upon the prospects of business. This is a step, the desirability of which, Canadian representatives in this country have strongly urged for many years past, and its more general adoption testifies to a greater appreciation of the value of the Canadian market.

## PROJECT FOR DEVELOPMENT OF SWISS MARKET.

I recently had a visit from a Swiss gentleman, who, after being engaged in business in this country for a number of years, proposes returning to Switzerland and inaugurating a merchant and agency business for the greater development of trade in British goods.

In this connection he has been inquiring into the extent of the trade existing between the Dominion and Switzerland with a view to ascertaining if there are prospects of development in this direction. Whereas the annual value of the imports of Swiss goods into Canada, consisting mainly of silks, ribbons, cotton embroideries and other manufactured goods, has steadily increased, and now aggregates over \$2,000,000, the total value of exports from Canada to Switzerland remains insignificant—under \$10,000, except in one year, when tar to the value of \$22,777 largely contributed to a total export of \$30,230—and according to the Canadian trade returns, business is limited to some leather, metals and minerals, carriages and carts.

## UNITED STATES A PROMINENT COMPETITOR.

The official trade statistics published by the government of Switzerland show, that the import trade for the last three years for which returns are available (calculated in francs), amounted respectively to:—

|               | Francs.       |
|---------------|---------------|
| 1904. . . . . | 1,240,071,144 |
| 1905. . . . . | 1,379,850,723 |
| 1906. . . . . | 1,469,059,498 |

Reference to the detailed figures indicate many goods which can be either produced or manufactured in the Dominion, and of which at the present time, considerable quantities are being imported from the United States. Among these may be mentioned: wheat, oats, hams, eggs, fruits, butter, lard, lumber, leather, metals, and numerous manufactured goods.

The value of the exports from the United States into Switzerland during the above-mentioned periods are given as:—

|               | Francs.    |
|---------------|------------|
| 1904. . . . . | 53,826,479 |
| 1905. . . . . | 56,924,370 |
| 1906. . . . . | 58,482,861 |

#### SYSTEMATIC EFFORTS WILL CREATE CANADA'S OPENING.

It would appear likely from the Swiss returns that some goods of Canadian origin reach the republic indirectly, and are credited to the country whence last shipped. But our visitor called attention to the absence of direct business between Canada and Switzerland, and was of the opinion that there is an opening for a considerable expansion, if systematic efforts are made by Canadian shippers to study the requirements of the country, and then to take the necessary steps to get into direct touch with resident importers and buyers. If, as has been stated, the new Franco-Canadian treaty grants a lower scale of duty to Canadian goods imported into Switzerland, opportunities should be still more favourable.

#### DOMINION PRODUCE VIA GERMAN CHANNELS.

Switzerland obtains a considerable proportion of the goods which would interest Canada through German channels, and the special circumstances which at present attend the trade relations between the Dominion and Germany, form an additional reason for Canadian shippers and manufacturers making special efforts to develop direct trade.

It might further be pointed out that Switzerland has direct water communication by means of the Rhine with Rotterdam, to which port steamers from all points of the world have a regular service. Cheap transportation in bottoms of all kinds can be obtained up the Rhine, giving immunity from the necessarily high inland freight charges which so often form an obstacle to the development of Canadian trade.

#### GARNETS FOR ABRASIVE PURPOSES.

An inquiry was received as to whether the Dominion is a producer of a variety of garnets which is being used to some extent for abrasive purposes and imported from various sources. In the sample which we were shown, the stones were, as a rule smaller than a pea, and we understand that they have to be washed previous to shipment. They are usually put up in bags, and realize from £5 up to £15 a ton, c.i.f. United Kingdom, depending upon the quality.

Our inquirer stated that he could handle large quantities if supplies were obtainable and quality and price satisfactory.

Preliminary inquiries show that garnets occur in Canada in considerable abundance in many localities, but up to the present time there is no record of deposits having been worked. It is, however, stated that garnets of a similar class are being produced in the Adirondack region of New York state, to the extent of some 4,000

and 5,000 tons per annum. Under these circumstances, it is possible that some action regarding the development of some of the Canadian deposits, which are favourably situated for shipping purposes, might be practicable.

#### FREQUENT DEMANDS FOR PIANO KEYBOARDS.

We frequently hear from people who are desirous of obtaining supplies of piano keyboards from Canada, and recently had an intimation from a London firm that they would be pleased to contract for supplies of not less than 5,000 boards at a time of white basswood piano keyboards of the dimensions 4 ft. x 15 in., 16 in., 17 in. and 18 in.

We understand that past inquirers have had difficulty in getting into touch with Canadian manufacturers who are in a position to supply these goods regularly, but as there is apparently a considerable demand, some Canadian firms may like to take up the matter.

#### WOOD TURNERY AND JOINERY.

Reference has frequently been made to the large number of applications which are received from firms in the United Kingdom seeking supplies of manufactures of wood of various kinds.

A short time ago we had a visit from a representative of one of the largest dealers in this market, and in the course of our interview, when discussing such general lines as handles, dowels, and similar lines which Canada is shipping to some extent, mention was made of a considerable number of articles which the company is obtaining from various sources, and of which they would welcome supplies from Canada if available.

As many of these goods are manufactured in the Dominion, although in some cases it is understood only for the home market, I obtained a general list of the articles of which the company is a buyer, and reproduce same, as it may be of interest.

All kinds of implements, tools, broom, mop and pick handles, shovel trees, dowels, mouldings, skewers, closet seats, wood door knobs, electric bell pushes, square wood blocks, chair seats and legs, sash pull handles, blind rollers and ends, cornice pole ends, sieve hoops, taps, towel rollers, hat racks, dairy accessories, bread platters, washboards and laundry appliances, wheelbarrows and trucks, spindles, legs and balusters, pedestals, shelves and brackets, tables and various kinds of furniture, in fact almost anything that can be made of wood.

We understand that there is an increasing difficulty in obtaining adequate quantities of many of these lines from the regular sources of supply, and although in many cases the margin of profit would be a small one, such large quantities are regularly required that the business should be profitable to the manufacturer who has facilities for producing the particular article upon a large scale, and is further well situated for obtaining cheap transportation.

HARRISON WATSON.

## JAPAN.

## REPORT OF TRADE COMMISSIONER.

*(Mr. Alexander MacLean.)*

ROOM B, 14 BUND, YOKOHAMA, April 21, 1908.

## RESULTS OF JAPANESE AND CANADIAN TRADE INQUIRIES.

In the course of September and October last I caused to be issued a circular letter to about two hundred of the more important addresses selected from amongst those who had made inquiry from Canada for business connections in Japan, and those in Japan who had sought like connections in Canada.

The particular inquiry in each case was indicated by date and subject, and the inquiring party was invited, for the confidential information of this office and in the interest of trade between Canada and Japan, to state if any business had resulted; if so, had it continued; had it been found to be advantageous; and if trade had not resulted to give the reason. About forty per cent of those addressed were good enough to reply, and from these, of Canadian inquiries, a few summarized selections may be of interest:—

## NO MARKET FOR WIRE FENCING.

A wire fence manufacturing company regret to state that no business resulted from the correspondence referred to. They learn that there is not much of a market for their class of fencing in Japan, it being an article entirely different from anything in use there; and that labour being cheap, fencing of native material is provided at less cost..

## TOO EXPENSIVE FOR JAPANESE TRADE.

This is clearly a case of many in which the particular article, no doubt very good in itself, carried with it a price that presented no inducement to the trade in Japan. It is true, that relatively to population and cultivated area, the consumption of wire fencing in Japan is not large. The crop-growing lands are not divided into farms and subdivided into fields by costly and lasting wire fences, or by fences of any kind usually; yet there is wire fencing to be seen, of a cheap quality, supplied no doubt by those who have facilities for its production, and who have a world-wide market, of which the Japanese demand is doubtless one of the minor incidents.

## A SPECIAL LINE OF MECHANICS' TOOLS.

A company manufacturing some special lines of mechanics' tools, answer that so far no business has resulted, and that they are at a loss to explain why. 'They have had several inquiries and have tried to revive negotiations.' They say they cannot see any good reason why the Canadian manufacturer should not have a fair proportion of the trade with Japan, being able to manufacture in many lines as cheaply, as good an article, and at as low a figure as their competitors in the United States.

## CANADIAN MANUFACTURERS ARE NOT REPRESENTED.

In this case I have to repeat in substance what I have often remarked in my reports from time to time: the Canadian manufacturer is not represented here, while the manufacturer of the United States, and of Great Britain and Germany and the

world, is represented by long established agencies, whose connections ramify the country throughout, who have trade influences directly and through their connections, and who, while desirous to take hold of anything in which they can see any money, are yet slow to bring into competition with their lines already established, a new line that does not offer to them any special advantage. That is their position; and if they are to be weaned from it, the weaning process must be brought to bear upon them by the party who, in this particular is the Canadian manufacturer. It would not be advisable that any individual Canadian manufacturer should set up a depot for the placing of his goods upon this market; that is not to be expected.

But I see no reason why any Canadian manufacturer for export should not interest an agency on the part of one of the many importing houses well-established here. He will not do it, however, by adhering to the too frequent and tiresome formula of 'letter-of-credit with order,' or 'sight draft against documents,' or some other of the various polite alternatives for the more common c.o.d. He will have to do it by interesting some responsible house in his goods, because of their quality and suitability for this market. He must make it worth while to be interested; by which I mean that he must bear a part of the cost of making a market by advertising and by offering otherwise such terms as a responsible mercantile house is accustomed to receive. The manufacturer who will not extend his efforts somewhat after the manner here indicated, is not yet ready to enter the world competition that is offered here, or it may be he is too well-to-do at home to wrestle with the ordinary conditions attaching to trade abroad.

#### TYPEWRITER STATIONERY TOO LOW-PRICED.

A manufacturing company in typewriter stationery supplies, having requested connections in that line in Japan, gives as the result much correspondence but no business, for the reason that prices in Japan 'appeared to us to be exceptionally low, and up to the present we have been unable to meet them,' but they feel 'that with equal transportation rates, to those enjoyed by the United States, it will be only a question of short time when the Canadian manufacturer will be able to obtain a foothold in Japan, and to take a good share of the trade.'

#### THE LETTER-OF-CREDIT DIFFICULTY.

A commission firm in eastern Canada, in pursuance of inquiry made, had some correspondence with shippers in Japan, but expressed regret that business did not result. 'There was a doubt abroad that the Japanese were reliable; and many of them wanted letters of credit, which buyers in this country were not prepared to give.'

The stipulation that letter of credit should accompany order, seems to operate very frequently as a reason for going no farther towards the completion of business transactions. A letter of credit would not be asked for between parties whose business responsibility would be known to each other; but when business transactions are desired between parties so entirely foreign to each other as are the average merchant in Japan and Canada, nothing is more reasonable than that the buyer should furnish to the seller a satisfactory presentation of his credit. A bank letter of credit in such case would be available only when the goods were in the hands of the bank, and then only, within its limit, to the amount represented by the invoice. To decline to furnish credit in this way and under such safeguard, would seem to indicate that the buyer was afraid that the goods might be falsely represented by the documents, or that he was faking the character of a buyer. I have not forgotten the caustic criticism of a Japanese merchant in Osaka when asking my attention to some correspondence. He hoped it was not the custom of Canadian importers to show by going abroad that they apparently hadn't credit at home. And I think the correspondence justified the observation.

## CANADIAN BUSINESS METHODS PROVINCIAL.

Another illustration of how quite a numerous class of Canadian trade correspondents make themselves appear before Japanese exporters, is furnished to this office by a 'manufacturer and supplier of decorated porcelain.' He had been placed in correspondence with a Montreal inquirer for business in Japan, and he enclosed to this office copy of the correspondence, so that I 'may be able to see how our propositions are received in Canada.' Besides a number of frivolous requirements not customary in trade, the Montreal correspondent says he will not attach any letter of credit to orders, the Bank of Montreal may be applied to for his standing, and that his correspondent at Nagoya in this country can draw upon him at 90 days sight. The reflections of his Japanese correspondent upon this as a business proposition is in these words:—

'We should like to ask, to whom can we sell our draft on him at 90 days without a letter of credit giving us the authority to do so? These objections to transact business in a businesslike manner seem to us exceedingly provincial, and we doubt if the inquiries of such persons are worth paying much attention to.'

## BANK REFERENCE THE ALTERNATIVE TO LETTER OF CREDIT.

As an alternative to the much-objected-to letter of credit, in offering to open account with houses of good standing here, I would submit, from amongst a variety, the following, received under seal direct from the bank:—

THE BANK OF ———, December 19, 1907.

The Trade Commissioner of the Government of Canada,  
Yokohama.

DEAR SIR,—Our esteemed clients, Messrs. ——— & Co., importers and dealers, &c., we understand are making arrangements to deal direct in your market. It affords us much pleasure to state that they are a business house of high standing and in excellent credit.

(Sgd.) THE BANK OF ———,  
*Manager.*

In the partiucular case to which this model bank reference applied, it served the purpose apparently as well as a letter of credit. Business followed forthwith, and is continuing. But the majority of correspondents who inquire for business connections in Japan, either wholly omit references, or say they refer to their bankers, or to Dun, or Bradstreet. Now, it is as well to mention that this latter form of reference is of no use. Business people here will not open an account with a stranger on the strength of it, nor will they write to the bank or the agents indicated.

## JAPANESE WANT LIGHTER WEIGHT NEWS PAPER.

News paper is an article, the raw material of which Canada has in exceptional abundance, and there are some strong manufacturing compnies. It is an article easily handled, and inviting to transportation facilities. One manufacturing company say that no business has resulted from correspondence, and give the reasons that if they could not get good business elsewhere, they might make a greater effort to do business in Japan. The paper required is of lighter weight than they care to make, and the Japanese are exceedingly exacting in their requirements, and that, under prevailing conditions in Japan, they consider it the most undesirable of the markets they have access to. Another manufacturer, whose paper I have seen here, has not furnished any information as to his experience; but I learn indirectly that he was not disposed to continue to make the light-weight and otherwise poor quality of paper required.

## NATIVE PRESS USE CHEAP PAPER.

From these two cases, I take it to be a higher grade of trade that the Canadian manufacturer has the advantage of catering to. It may be remarked, that the newspapers in Japan, printed in English, the so-called foreign newspapers, use exceptionally good paper, while the native press, with a vast circulation, print upon paper that many a shopkeeper would not use for wrapping, which is quite in line with many of Japan's economies. The Japanese do not see why an ephemeral thing, if it serves the purpose, should be an example of extravagance. The Swedes and Norwegians, economists too, supply this trade, through German firms mainly.

Another Canadian company amongst the larger and more capable of doing export trade, state with regard to inquiries addressed to them, that no business has resulted, that they have nearly all the business they can do in their various lines, and that they have not sought nor pushed for trade with Japan.

## JAPANESE GOODS CHEAPER FROM ENGLAND THAN FROM JAPAN.

A wholesale millinery firm is representative of a considerable number when they say: 'No business has resulted for the following reasons: first, the prices quoted us from Yokohama are no cheaper than we can obtain from England; second, the shorter distance makes England therefore more convenient; third, we object to paying for goods before receiving them, in fact will not do so; and fourth, we do not think they are giving us the lowest price.'

## BRITISH HOUSES POSSESS UNEQUALLED ADVANTAGES.

The statement that Japanese productions can be procured as cheaply from England as from Japan, is frequently made by parties whose remarks upon the trade situation are not open to doubt. The greatest of all markets, open and free to the seller and buyer alike, must have advantages. British houses here and their English correspondents, with a thorough knowledge of the trade, with practically unlimited shipping connections, and with a volume of trade of such importance as to dominate the market, may have such advantages that, regardless of the relative transportation distances, Canada may be supplied with Japanese goods as cheaply from England as from Japan. This circumstance, taken as the basis of a proposition for the investment of capital, would not receive a moment's consideration; but as an incident in the development of trade and commerce, it is not at all incredible, and may be taken in this case as a hard fact.

Canadian productions, such as canned goods, dried or evaporated fruit, cheese, asbestos, bacon, &c., looking to Japan for a market, are met by the like conditions. An old-established purveying firm, here and elsewhere in the Far East, were at last persuaded to give a trial order for Canadian bacon direct. They had been getting their bacon from London and from San Francisco and they thought they could do better—'it was really very good, and what was better anyway than English bacon.'

## CANADIAN BACON SATISFACTORY.

I took frequent occasion to differ from them as to the quality. The English was too fat and soft, and the American was much worse. The trial order from an Ontario packing house, came to hand about Christmas, and when they discovered the quality of it, they kept it off the counter until the English and American should be cleared out. This trial order proved so satisfactory that further orders are to go forward, and it is to be hoped the quality will be maintained.

England, however, is the principal buyer of Canadian bacon, and England supplies bacon to Japan; yet this Canadian bacon delivered here direct from Canada, costs from one to two-and-a-half cents per pound more than recent deliveries of bacon from London. And the bacon that this firm imported from London was no chance-of-the market—it was a standard and choice brand. The American bacon cost about five cents less than the Canadian.

## BUYERS MUST FURNISH CREDIT.

The objection of the Canadian importer to 'paying for goods before receiving them,' is not any more business-like, and is not entitled to more consideration than the other objection often heard from the Japanese exporter, to 'sending his goods away before being paid for them.' Each party is unacquainted with the other. Consequently one is not to be expected to ship goods not paid for, while the other has no right to expect goods to be delivered to him until he has paid. This is a case where the letter of credit, limited specially to the order, would give a business aspect to the matter in hand. There is no rule more clear than that the buyer should furnish the credit; and when the Canadian buyer requires this rule to be varied in his behalf, he does not look so well abroad as he perhaps does at home. This is a point he doubtless has not thought of, but he will do well to think of it.

## BANKER'S LETTER OF CREDIT BOGEY.

A broker and commission merchant who writes from a Canadian city, with more appreciation of what has been requested of him, says: 'No business has resulted although I have had considerable correspondence with firms in Japan. I cannot just say what the real cause is, but the following reasons may be worth giving: first, prices are a little higher than those offered to competitors; second, the great expense of cabling in connection with standing orders, which adds materially to the cost of the goods; and third, no matter how indistinct and confusing the terms of business transactions, the seller always succeeded in making the point clear that a confirmed banker's letter of credit would be required before shipment of goods.

This in itself is doubtless largely responsible for the failure of correspondence to result in business, as the impression prevails very generally on this side that the Japanese shippers, as a class, are none too trustworthy. Fourth, as a suggestion, I would say, that this business possibly should be worked through a general agent on this side of the Pacific, who would be in constant communication with his principals in Japan.'

## TRUSTWORTHINESS OF JAPANESE TRADERS.

It appears as though no allegation in connection with things in Japan has been so generally and lastingly impressed upon the trade in foreign countries, as 'that the Japanese shippers are none too trustworthy,' or words to that effect. I am far from admitting as the result of my observation the justice of this general condemnation, but on the contrary hold that there are as many honest men in the hundred in Japan, amongst Japanese business men, as there are in other civilized countries. As long ago as the time of Diogenes, honest men had to be sought for, and to-day with or without the aid of a candle, as many in proportion could be found in Japan as elsewhere, which after all may not be very flattering to Japan.

## DIFFICULTIES IN THE WAY OF DIRECT BUSINESS.

An exceptionally intelligent statement of the difficulties of doing business direct with Japan, is given by a wholesale millinery importing house in an Ontario city. This firm in one season bought a considerable quantity of braids direct from Japan through a Canadian agent, but did not repeat the experiment chiefly for two reasons.

## AWKWARD METHOD OF PAYMENT.

'The method of payment was too awkward. We had to send the Japanese house our L/C (on London, I believe) several months ahead of the delivery of the goods. This L/C had a proviso that it could only be drawn on to the extent specified in the B/L, &c, but nevertheless it was an awkward method. We can buy continental goods

from London agents, for which we pay, after the goods are delivered in London. The manufacturers of these European goods are glad to get their money thus promptly, but if we bought them from Japan, we should have to issue the L/C. referred to several months earlier. It is a question whether or not the Japanese goods were any better than the European.

#### QUALITY OFFSET BY TARDY DELIVERY.

‘Another difficulty was the tardy deliveries. These goods were promised by a certain date and the order given conditionally that this promise should be carried out. The goods were very late in being shipped and got here almost too late for our use. Of course there were excuses (there always are) but the fact remains that the goods were shipped long after they were promised, cost us worry, inconvenience, and probably loss of business. The goods themselves were satisfactory.’

This correspondent appears to be confusing millinery goods of Japanese manufacture with the like goods of European production. The facilities for procuring European goods are no doubt much more expeditious. But it is clear as daylight that the demand for specifically Japanese goods is very great the world over, and is being satisfactorily supplied, and there does not appear any reason why the Canadian demand should fail to be satisfactorily supplied also, when offered exactly the same terms and conditions.

#### JAPAN FILLS ORDERS BY CONTRACT.

The foreign and Japanese exporting firms do not as a rule keep stocks of goods of the country's miscellaneous manufacture on hand, from which to fill orders immediately upon receipt. They forward their orders to the manufacturing districts or centres, and contract for completion and delivery by a certain time. Delays from one cause or another are a common and well understood occurrence, and it is only possible promptness that can be assured. Some lines of Japanese manufacture change pattern more or less every season, and change entirely in five years—strawbraid, for example. That is an article of millinery, and the patterns are not designed in Japan, nor the goods kept in stock to fill orders to all comers. The designs or patterns are formulated at the centres of European fashion, and are supplied to the European merchants, who forward them to their connections, the exporting houses, in Japan, two years or seasons in advance of the time when the specified braid is to appear, as an incident of the fashionable hat. This is the established way of conducting that trade, and with some variations of circumstances, the same may be said of other trades. It is not surprising, therefore, that the Canadian trade, as yet comparatively small, should find it more convenient to deal in London, Paris, or New York.

#### LETTER OF CREDIT SHOULD ACCOMPANY ORDER.

The matter of terms of payment appeared from the answers, referred to in the beginning of this report, to be so frequent and effective an objection to the offers of business in this country, that I found it necessary to give it special attention. Although I thought myself fairly well informed upon that point already, for the purpose of this report, I took occasion to discuss it with an import and export merchant, who was able to refer to his forty-five years' experience in the Japanese trade.

He said that of necessity, in the early days, orders for goods had to be accompanied by payment or credit in some form. The bank letter of credit accompanying the order, limited to the amount of the bill of lading, grew to be the practice, and continues to be the general practice to-day. He shipped last season over 240,000 pieces of strawbraid, in orders of from 1,000 to 10,000 yards, and in the case of customers, with whom he had been dealing for years, as well as in that of the newcomer, the order would necessarily have the letter of credit with it. The order would in due course be placed in the country, and as it advanced towards completion, the credit

would be drawn upon to pay the contractor. The goods in due time would go forward to the order of the bank that had authorized the credit, and the transaction was thus closed. Bills of exchange, whether the order were from Europe, or America, or Australia, are usually drawn upon London as the cheapest exchange market in the world. This is an example, which may assure Canadian inquirers for business in Japan, that they are not being discriminated against in a market where they are not known, when they are asked for either cash or tangible credit with their orders.

#### CANADA AS A NEWCOMER MUST WAIT HER TURN.

Delay in filling orders, thus missing the season and causing disappointment to all concerned, is a frequently alleged drawback to trade. It is to be considered that this is a large market to which all the trading countries in the world are coming. It cannot, therefore, be expected to go out of its settled ways to meet a new customer according to his fancy. Long established trading connections have their facilities here on the spot to attend to prompt delivery. The newcomer, such as Canada, has not that advantage, and the more valuable customer, therefore, gets served first.

A good example is presented by a corresponding firm, who say: 'The small business that we have so far done with Japan has not been satisfactory. It takes too long to make delivery. We ordered a shipment of bamboo shades in the early spring, and when we received them at the end of September, the season was over. We have not yet opened the goods, but have to carry them over until next year. The shippers want their money for the goods, and we do not feel like paying now for goods that will be of no use to us until next year.'

#### ARRANGEMENT OF FREIGHTS WOULD INCREASED TRADE.

An old-established importing firm in Eastern Canada desired to learn whether certain grocery supplies could be obtained profitably from Japan. After correspondence with leading firms here they say: 'The reason why trade has not resulted, is on account of the New York merchants being able to get their products in by direct vessels to New York, so that the regular ocean freights would be cut in less than half. There ought to be considerable trade done between Canada and Japan if the freights could be arranged, so that we could compete with the American people.'

The palm for inertness of movement towards trade with Japan may be given to the manufacturers of Canada. Little information has been drawn from them; and that little is indicative of 'no result' from correspondence.

#### OTHER NATIONS PROFIT BY CANADIAN LETHARGY.

For machinery and machine tools, there has been inquiry, but no advantage taken of it to any extent that can be ascertained. Investigation here discovers that catalogues have been forwarded, but no price lists, and no particulars as to trade discounts or other matters of detail necessary to the making of business calculations. The effect of this laxity is that British, and German, and American machinery and machine tool manufacturers with active and influential agencies on the spot get the business. Some manufacturers are candid enough to say that the home trade demands all their attention and resources, and doubtless that is much the case with the majority of them. In the line of heavy manufactures of course it is to be considered that transportation facilities and charges are a bar to trade. Competition, on the part of eastern Canada manufacturers, with those that have the advantage of direct water route transportation from New York, and from British and European ports, does not appear to be practicable under existing conditions.

But the same transportation difficulty crops up in the case of such transportable goods as pulp, leather, paper, asbestos, hides, sulphur, bacon, cheese, and so on.

## DISTANCE HANDICAPS EASTERN CANADIAN EXPORTERS.

The export producing part of Canada opens to the Atlantic; but from the Atlantic ports of Canada there is no direct all-water transportation to Japan, and exports taking that direction have to bear the cost of from two to three thousand miles of transportation, and at least one transshipment, before getting an equal start with like goods from European ports, which handicaps them out of the race. People in Canada who have not entered into the particulars will probably ask: 'What is the matter with the Canadian Pacific Railway?'

## HIGH PRICES COUNTERACT QUALITY OF WOOD PULP.

There has been a good deal of correspondence, with the view of inducing the export of wood pulp from Canada to Japan, without much result. Sulphate pulp is imported quite largely. But so far the Canadian manufacturers have not indicated preparations to compete. The principal importation is of northern European production, coming mainly through German export avenues. The most recent concrete case is now pending, being under consideration and offer to the trade by a prominent trading company in this country. With an ample display of samples laid out upon a table, it was admitted that in colour and texture, and as to every point of quality, the Canadian article was superior, and the hope was expressed that high quality might meet with some demand. But the prices figured out to the customs at Yokohama at 130 yen a ton up for Canadian, to 104 yen a ton for the European. The quality, it was thought, might balance this difference in price to some small extent, but there was no hope of the demand, if any, approaching high figures. The inference from correspondence is, that the Canadian article is of one uniformly good quality and high price, and that there is, therefore, at present little prospect of pulp export to Japan. There is no market for ground pulp, comparatively large quantities of that article being made in Japan of a quality suitable for the requirements of the paper mills.

## JAPANESE VIEW OF TRADE PROSPECTS.

I should, however, vary this not too hopeful prospect of the past and present, by a view more cheerful as to the future. A highly esteemed corresponding firm in British Columbia states, with reference to an inquiry about pulp, that no business has resulted, they thought, because the agent of the Japanese inquiring firm had doubtless been able to make arrangements direct with manufacturers elsewhere. 'We have no pulp and paper mills on the coast.' Pulp and paper manufacture on the coast of British Columbia had been so often reported as being in progress, and the companies so specifically mentioned, that I thought that I could venture a reference to the firm indicated. But pulp and paper of western Canada manufacture seem to be still in the indefinite future. There is now, however, the statement of the British Columbia firm referred to, that 'there is a prospect of a pulp mill being in full working order in the course of next year,' of which I have made note, because of the greater reliability on information from a firm of high standing, than from newspaper paragraphs. The prospect of future trade between Canada and Japan, sketched from the point of view of the firm in question, is worth quoting:—

'It appears to us that the Japanese firms prefer to have their own representative in Canada as they are able to understand the business conditions better than an European house. Doubtless Canadian firms are somewhat chary of doing business in a country where they do not thoroughly understand the people or conditions of trade; and though we have not had many dealings with Japanese firms, our feeling is naturally a preference to deal with the European houses represented in Yokohama; but we nevertheless feel that as time goes on the people of the two countries will, in all probability, understand each other's methods of doing business better, and commerce between the two countries should naturally increase.'

## NOT MUCH MOVEMENT IN LEATHER.

A trial shipment of leather from a Quebec firm is favourably spoken of as to quality and price. But leather is in a peculiar situation. The market became surcharged by the sudden close of the war, with the usual financial consequences to those interested. Some were able to swim with their load; others were submerged. The normal condition had hardly been restored when the present depression, for nearly a year clouding the trade atmosphere, set in. There is therefore not much movement in leather just now.

## LEATHER MANUFACTURERS NOT ALIVE TO OPPORTUNITIES.

There has been much correspondence about leather, however; and moreover, leather was one of the articles beneficially affected by the admittance of Canada to the Anglo-Japanese treaty. But not one leather manufacturer, excepting the above-mentioned Quebec firm, has been found ready to take advantage of the opportunity.

Some further correspondence on this important trade item indicates a disposition to consider favourably the matter of trade with Japan, of which the following quotation from the letters of a prominent leather manufacturing firm in Canada, is an example:—

‘Your valued favour reached us some weeks ago, and we must thank you for the explicit and full information therein contained. We are naturally always ready to expand our trade, where such can be done safely, although even on a small margin of profit. We realize that trade could not successfully be carried on to any great extent, by insisting on “cash remittance with order.” This condition has been prompted by our experience in the past, not with Japan, but with other foreign countries, to which we have made shipments in the best of faith, and simply had the goods at times refused, and had the trouble, inconvenience and expense of the return all the way to Canada. You say you shall be glad to direct us to entirely responsible houses. We shall be glad to have all the information at your disposal in connection therewith. We do not care to do with the smaller trade, but only with absolutely reliable houses, and then we would require to know what weights, grades and selections of leather are required, and if possible, also, what classes and tannages of leather have been handled in the past. This will give us a somewhat closer idea of what the trade there wants. We should certainly prefer to make the first shipment or two to the order of the bank, if agreeable to the consignees. If not, we would likely be willing to risk a small shipment on your recommendation of undoubted houses. We assume that the general trade depression is also more or less prevalent in Japan, and that, therefore, houses that are supposed to be financially strong are frequently found to be less so than expected. The prices quoted you December last remain practically unaltered. Should they decline by the time any order may reach us, we would be willing to give the customer the advantage thereof.’

## CANADA MUST GO TO JAPAN.

The foregoing is given as a much more than usually explicit and encouraging example of Canadian manufacturers’ correspondence with regard to trade with Japan. And yet it indicates rather an expectation that it should be the part of Japan to come to Canada, for leather, for example, instead of it being the part of Canada to go to Japan with its leather. This, however, is the clearly inferred attitude of Canadian manufacturers generally; and it is a respect in which they are greatly mistaken. The leather markets of the world are offering leather to Japan in downright earnest; there is therefore no necessity to go to Canada. But there is an ever-ready desire to know the best that Canada can do, the response to which is too often enough to end the correspondence.

## NO GENERAL MARKET FOR CANADIAN LUMBER.

Last autumn there was some inquiry for lumber from both ends of the trans-Pacific run, but I think it did not end in revival of business to any extent. There is no available general market for Canadian lumber; the demand in that respect is supplied by home production. The lumber wanted here from the American Pacific coast comes under the indiscriminating name of Oregon pine. By Vancouver, Seattle, Tacoma and Portland the same article is supplied; and whichever offers it the cheapest gets the dimension orders. Of late, to which source of supply those orders would be most likely to go, may be indicated by the quotation following, from the letter of one of the most extensive lumber manufacturing companies in British Columbia. After stating that no business had resulted from correspondence with Japan, they add:—

‘We cannot say that we have any particular remarks to make in connection with the prospects of trade between Canada and Japan as far as our particular branch is concerned. We are continually receiving inquiries for lumber, and are making the best quotations thereon that we can see our way to; but at the present moment we have to compete against very low prices from mills on Puget sound and Columbia river, who are cutting prices to a very low figure in order to secure business they appear to be in much need of. As far as we are concerned, we are content to let these orders go past us at the absolutely unremunerative prices at which they have been taken.’

## PROJECT FOR READY-MADE HOUSE CONSTRUCTION.

One might be persuaded that ready-made houses, suitable for residence of employees of industrial works, and for suburban populations, seaside resorts and so on, should find a market, where climatic conditions are temperate, the population numerous, industrial works extensive and growing, and seaside and mountain resorts greatly in evidence. Portable houses are a well-known manufacture on the American continent, put together and transported in sections duly fitted and numbered ready to be put up. In connection with the production of lumber towards the Pacific coast of Canada, I had almost persuaded myself that this country should afford an opening for this class of manufacture, and had taken opportunities of discussing the matter, but without much encouragement.

The subject was actively presented by a commission merchant of Vancouver during the past year in the form of an inquiry, with accompanying catalogue and prices. Correspondence in connection with this inquiry indicated that a Japanese government commissioner, en route to England, having been informed of these houses, thoroughly inspected a number of them in the various stages of construction, and was so greatly interested that he became anxious to know whether or not a proposal to manufacture in Japan would be entertained. He went so far as to say that he was quite sure his government would substantially encourage such an enterprise. The matter at this stage was laid over for future consideration.

## JAPAN HOUSES PECULIAR TO PEOPLE.

The idea of the Japanese commissioner was, that the lumber should be imported ready-dressed, and the work of construction performed in Japan, where labour is comparatively cheap. But the matter of the inquiry I caused to be put before firms here interested in the importation of lumber and materials for construction work generally. The unvarying information obtained was to the effect, that the cheap class of house required by foreigners could be built more cheaply than imported, that the Japanese cheap house is peculiar to the people and the country, that no other could take its place, and that the limited possible business did not present any inducement.

## AUSTRALIANS SECURE HOLD IN BUTTER MARKET.

Butter from Canada received a very bad blow in the autumn of 1906. Some of the best, and in every respect the most desirable customers, were supplied with an article that had either never been good or had been destroyed by delay in transportation. Where the fault really lay has never been clearly discovered; but no better testimony could be given to Canadian butter than the fact, that by force of usually excellent quality, its reputation has survived that misadventure. But there was an unfortunate shaking of confidence, that gave to Australian butter an opportunity that it was prepared to take advantage of.

## AGENCY AT PORT OF SHIPMENT RECOMMENDED.

A commission firm in Vancouver, replying to the circular letter of inquiry referred to at the opening of this report, may be quoted on butter shipment as of much interest and authority:—

‘Our attention has been called to several of your recent reports to the department at Ottawa, in which complaint is made regarding the unsatisfactory quality and condition of Canadian butter shipped to the Japanese market. Having, as you are aware, made shipments of this article at different times to Japanese buyers, we are naturally interested in anything affecting the future development of the business. In writing you at this time, it is with the object of pointing out some of the causes in our opinion responsible for the trouble referred to, and how they can be overcome.

‘In the first place, we would remark that all the shipments made by ourselves have arrived in the very best condition, meeting with the highest approval of our customers, so that the complaints referred to cannot apply to the goods shipped by our company, as you are doubtless already aware. And the explanation of their arriving in that better or different condition we attribute to the fact that our shipments were made from Vancouver, while most or all the others have been shipped from interior points. The difference of advantages being that we were on the ground to superintend the shipping arrangements, and to see that our goods were not allowed to lie about on the wharf and spoil before leaving this end; and on different occasions, when unable to make proper connections through no steamer sailing within a reasonable time, we have either disposed of the goods and arranged for duplicate shipments at a later date when connections could be properly made, or placed our shipments in cold storage, pending sailing of such steamer as they were intended for. These goods thus shipped by us are all received from the creameries in the interior in refrigerator cars, and if unloaded and left to lie about will very soon go off flavour, especially in the summer time.

Doubtless this is the explanation of the complaints referred to in your reports to Ottawa; and this can be overcome only by having someone to superintend and look after shipments at shipping point. The same thing applies in California, which is also a big market for butter shipped to Japan; and in every case shipped from San Francisco, and not from creameries located at points hundreds of miles in the interior. This being the case with California, we can only surmise that this method of buying was brought about by the same unsatisfactory experience, referred to in your different reports to Ottawa, as applying to Canadian shippers located in the interior.’

The substance of these recommendations, which is, that it would be safer to have a shipping agency at the port of shipment than at interior points where the butter is manufactured, I have conveyed to the known importers of Canadian butter, with the further particulars necessary in case of acting upon the suggestion. I am aware that it is customary with purveying houses here to have agencies, at the shipping port, through which they make their purchases. The principal case of damaged butter referred to, arose with a firm who dealt directly with the creamery some four or five hundred miles inward.

## GRADING BUTTER A MATTER OF TASTE.

I have noticed somewhere, although I do not find the authority at the moment of writing, that Danish butter ranks first, Australian second, and Canadian third, in point of quality, in the Japanese trade. A great deal of attention given to this product, during four years past in Japan, enables me to advance a different view. Observation and inquiry here, discover an infinite variety of taste in respect of butter. Many prefer butter that may have been good. Others incline to what never was good, and what would not be taken for butter by people who know what is good butter. And each will quite readily aver that the best is that to which their taste has been adapted. There are judges of butter here, however; and looking at the situation as a whole, I have no hesitation in saying that Canadian butter is freely acknowledged, by those who know good butter, to be the best; and it holds that place in spite of the depressing fact that it costs more money laid down here, and has to be retailed at a higher price than any other.

## BUTTER PRICES ABOVE THE MARKET.

Like everything from Canada, the price of butter continues above this market. How can it be otherwise, under circumstances that have been persistently indicated in these reports, and that are given prominent place in other official reports?

Mr. Ruddick, dairy commissioner, is quoted within a month past by the newspapers, as having stated in his report that 'the combined output of the creameries and cheese factories in the western provinces, including Manitoba, Saskatchewan, Alberta, and British Columbia, is not sufficient to meet the demands of the local markets, including a comparatively small quantity shipped to the Yukon and the Orient. The result is that the stocks in eastern Canada have been drawn upon to supply the demands of the trade in the west. With the present development of the country, it is not likely that the production of butter and cheese in these provinces will be equal to the local demands for some time to come.'

## DAIRY PRODUCE IN DEMAND.

As it is with butter and cheese, it is with another dairy product much in demand here. Mr. Ruddick says:—

'The manufacture of condensed milk is reported to be prosperous in Canada, and shows signs of growth and development. There are only four or five establishments in operation, but several others are projected.'

The 'four or five establishments in operation' have been quite unable to enter the trade here in competition with the United States, Great Britain and European countries. Expectation must therefore rest upon those several others that are projected. Yet the newspapers that print these extracts from official reports, and the members of parliament and platform talkers who presumably read them, never fail to be surprised that Canadian trade does not reach a greater volume in Japan.

## CANADA-JAPAN TRADE VIEWED FROM ORIENT.

The same inquiry, addressed to correspondents of this office in Japan, was liberally answered. A limited selection of these answers, in substance, may be interesting:

An importing and exporting firm of German nationality said that at the date of writing they had not been able to do business with Canada, the reason in their opinion being 'the absence of suitable samples of Canadian exports.'

A British firm, exporting and importing, and largely in the machinery and machine tool lines, having made inquiry for Canadian connections, say with regard to three firms selected and written to, that 'up to date we have not had the pleasure of hearing from any of them.'

An American firm, having been referred to several inquirers in Canada, say that no result has followed, the parties being 'apparently small firms and without experience.' They ask, however, to be continued on list in this office; they 'much appreciate such assistance, and hope that business will eventually result.'

#### BAD MARKET RESPONSIBLE.

A long-established merchant shipping firm (British) say that no business has resulted from Canadian correspondence. 'We think that "bad market" may have been the cause mainly; business is at a low ebb. Our inquiries through your office have been mainly for leather and fertilizers. The leather market is in a very bad state. During the past few months many dealers and leather workers have become bankrupt. About fertilizers we have not yet had any news from your side; this is a line well worth attention, and we would ask you to take it up specially.'

A Japanese firm, exporters and importers, state that as yet, 'some business has resulted from Canadian connections inquired for, but many are yet under correspondence. We do not expect much from the lines already inquired about; but from other lines, such as salted salmon and fertilizers, we expect results. Most goods produced in Canada, about which we inquired, seem to be too high in price to compete cereals of a quality and price suited to Japanese requirements in competition with Canada, but we can inform you more fully when we have further information.'

#### JAPANESE TRIAL SALES SATISFACTORY.

A Japanese manufacturing company state they 'have been making trial sales in the Canadian market, and are pleased not to hear of any objection as to quality or price of goods. However, the high customs tariff and the extraordinary freight and other charges make too great a hindrance to permanent and prosperous business with Canada.'

A Japanese importing and exporting firm say, 'we regret to have to inform you that our experience so far with Canadian correspondents has been unsatisfactory, as you will see from what we write under.' There follows examples of day and date correspondence, with samples of value forwarded, and no answer 'since the first letter asking for samples.' Also samples of rude and untutored correspondence, and of other samples forwarded with no business result. This firm then say, 'of the foregoing you can judge for yourself; but it is our earnest desire to open business relations with Canada, and we shall be much obliged if you can give the names of merchants in Canada who know what commercial courtesy is.'

#### CANADA'S OPPORTUNITY IN STEEL.

A leading importing, exporting and shipping company answer at length with regard to inquiry received from Canada about wood-pulp, nickel, and cobalt oxide, and also the productions of a steel and wire company, all of which were so far fruitless, ostensibly because of delinquent correspondence at the Canadian end. This firm, one of the most active and extensive in the Oriental trade, remark generally as follows:—

'Undoubtedly there is a good trade to be done with Canada in the lines covered by the firms mentioned in the foregoing, provided terms and conditions are favourable, as naturally importers are always willing to buy from the cheapest and best markets. Exports to Canada seem to be in good and increasing volume, and we take it the trade must increase (unless something totally unforeseen happens), as the Dominion becomes more largely populated. The prospects for imports do not seem to be so encouraging. It is a patent fact that the Canadians are not in a position to ship cereals of a quality and price suited to Japanese requirements in competition with the United States, at any rate at present, nor has much showing been made in the

importation of articles, in coming under the tool, machinery, &c., classes, but as the industrial activity increases it is of course possible for Canada to become an active and successful competitor with the United States and Europe. Again, with the development of her mineral resources she should find in Japan and its dependencies good and profitable customers for such productions. We have written in very general terms, but we trust the foregoing may prove of some assistance to you and can only regret that our negotiations with the firms you so kindly introduced to us have not been more fruitful.'

#### JAPANESE ANXIOUS TO EXPORT TO CANADA.

A prominent mercantile and shipping company, with branches throughout the entire Orient, answer categorically as follows:—

'We beg to give you the following information regarding the questions raised by you:—

'1. Has any business resulted? We have done a fair amount of business with British Columbia flouring mills.

'2. Is so, is it continuing? We are doing a steady business in this flour. Just at present, being the slack season, there is little demand for flour, but we hope to do a larger business next year.

'3. Is it found to be advantageous? The expense of introducing the brands has not left us much margin for the year, but we trust that next year will show that this expense has not been in vain.

'4. If trade has not resulted, &c.? We have been unable to do anything in Canadian wheat on account of the high prices ruling lately, but with the increase of production in Canada we hope that conditions will be more favourable to trade next year.

'5. Your views as to the prospect of trade, &c.? It is very hard to give an opinion as to the prospects of trade between Canada and Japan. We think there is room for considerable increase, particularly in exports from this country, and we should like to be afforded every opportunity of doing business with importers in Canada.

'As far as importing Canadian manufactures, such as machinery, is concerned, the only way that such business can be pushed successfully is for manufacturers to appoint sole agents here, as otherwise it would not be worth the while of any particular firm to go to the expense of introducing any particular firm's makes.'

#### MARKET TOO HIGH FOR CANADA.

I will close this recital with quotations from the response of a valued western Canada correspondent long engaged in the Canada-Japan trade, by which the low tide of Canadian export in leading staples is clearly accounted for:—

'*Wheat.*—We beg to thank you for having distributed our samples of wheat to the parties named in your communication, and at the same time regret to inform you that no business has so far resulted, nor have we been favoured with further inquiries from them, which we attribute to the fact that our market has been too high to compete with offerings from Oregon and other American Pacific coast ports, and it is very doubtful whether we will be able to compete before the next new crop comes on the market, which will not be for some months to come.

'*Flour.*—The same conditions apply to this article as to wheat, the consequence being that we have not been favoured with any Japanese business for some time; and while, as you state, there was considerable frosted wheat in western Canada the past season, we would point out that this cannot be milled into low-grade flour as cheaply as standard grades, owing to the fact that it requires from 100 to 150 per cent more of badly-frosted wheat to mill an equal quantity of flour as would be obtained from ordinary wheat, which as you will readily understand brings the cost up to a prohibitive figure, making it necessary to utilize it for other purposes, such as feed, &c.,

which brings better returns than converting it into flour. The writer lately visited several of the larger milling companies in Winnipeg, discussing with them the outlook for future Oriental business, in regard to which they were none too hopeful, in so far as this season's operations were concerned; all of which has decided us to turn our attention to more likely lines in the meantime.

*'Butter.*—Having previously written you on this subject, beg to add that all present indications point to a most successful season, although we do not look for much lower values than have prevailed in the past. We shall have considerable Alberta butter to offer later on, and will be pleased to submit offers to any correspondents you may be good enough to refer to us.'

#### INABILITY OR INDISPOSITION OF CANADIAN MANUFACTURERS.

The foregoing are only a few of the many selections that might be quoted from practically interested parties, all of which would go to sustain the impression, that Canada is not yet in a position to take an effective stand in this market in face of present competition, either with its natural productions or with its manufactures. The attitude of the manufacturers, whether the result of inability or indisposition, is most remarkable. Natural productions, in which may be classed the products of the farm, the forest, and that form of agriculture that comprises the orchard, the ranch and the dairy, it may well have been anticipated, could not yet figure strongly in the Orient because the country for about a thousand miles from the Pacific coast inward has not yet had time to develop beyond the self-supplying stage. The attitude of the manufacturers of Canada has not available the like extenuation. The manufacturing interest of Canada has had the benefit, for nearly thirty years, of a system of tariff aid that must have come far short of its pretensions, since, upon their own confession, they are not yet in a position to offer business to so accessible a market as that of Japan.

#### JAPAN COGNIZANT OF CANADA'S MARKET.

I have found the utmost willingness and readiness on the part of both Japanese and foreign exporters and importers to entertain offers of business from Canada, even after repeated failure because of impracticable terms and prices. The hindrance to a larger volume of trade is not at this end of the Japan-Canada line. After four years' experience here, I know of nothing Canadian offered to this market at a price that would compete with similar products supplied by other countries, with the further fatal disadvantage of uncertain supply in the event of a demand being worked up. With due deference, I am bound to say, that this actual condition of things puts the burden of explanation upon Canada. Although I have from time to time placed this same statement of fact, variously worded, before the Canadian public in these reports, I still find public opinion as expressed in parliament, and upon the platform, and echoed by the press, uninformed as to the situation, and continuing to cry out its surprise that Canada's share of the trade with Japan is not greater. It is a peculiarity of the rushing, uninformed public to regard what is, with all the reasons for its existence, with impatience and contempt. What they think ought to be, and what they see no reason why it should not be, looms up so largely as to obscure the reason for things as they are, the need in the first place to discover where the default lies, and in the second place to direct public energies to the removal of the causes of default.

There is abroad amongst Japanese business people, however, an intelligent sense of the prospective importance of the Canadian market. They know that Canada is developing, that her dormant resources are practically unlimited, and that it is only a matter of a short time, until the opportunity which she will offer, will be of incalculable value.

## MONTHLY RETURNS OF JAPANESE TRADE WITH CANADA.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the monthly returns for the two months ending February 29, of the present and the previous year:—

## EXPORTS TO CANADA.

|                                   | 1908.    | 1907.    |
|-----------------------------------|----------|----------|
| Silk tissues.....                 | \$30,907 | \$38,772 |
| Silk handkerchiefs.....           | 1,207    | 3,588    |
| Mats and mattings (Hanagoza)..... | 18,062   | 22,133   |
| Porcelain and earthenware.....    | 11,568   | 16,276   |
| Lacquered ware.....               | 342      | 595      |
| Tea.....                          | 10,531   | 31,122   |
| Rice.....                         | 25,463   | 46,079   |
| Sake.....                         | 6,281    | 4,717    |
| Straw plaits and chip braids..... | .....    | 370      |
| Camphor.....                      | .....    | 347      |

## IMPORTS FROM CANADA.

|                    |          |         |
|--------------------|----------|---------|
| Flour (wheat)..... | \$14,586 | \$9,807 |
|--------------------|----------|---------|

The principal items given in the monthly return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the annual return has to be awaited.

Total Exports for two months ending  
February 29, of the present and the  
previous year:—

1908—\$25,148,737

1907— 30,898,553

Total Imports for two months ending  
February 29, of the present and the  
previous year:—

1908—\$47,621,026

1907— 39,166,163

## JAPANESE GENERAL TRADE RETURNS.

Principal imports for the two months, ending February 29, of the present and the previous year:—

|                                 | 1908.     | 1907.     |
|---------------------------------|-----------|-----------|
| Flour, wheat.....               | \$301,380 | \$479,963 |
| Butter.....                     | 13,247    | 6,437     |
| Salted salmon.....              | 61,790    | 116,621   |
| Condensed milk.....             | 253,941   | 149,434   |
| Fertilizers (artificial).....   | 2,431,461 | 1,028,821 |
| Leather (sole).....             | 109,983   | 144,996   |
| Lead, pig, ingot, and slab..... | 128,615   | 94,429    |
| Printing paper.....             | 128,855   | 118,484   |
| Cotton ducks.....               | 4,176     | 7,664     |
| Cotton prints.....              | 72,629    | 111,884   |
| Cotton satins and Italians..... | 270,019   | 144,969   |
| White shirtings.....            | 163,239   | 78,419    |
| Grey shirtings.....             | 275,544   | 40,911    |
| Pulp.....                       | 224,954   | 139,305   |
| Horses.....                     | 14,515    | 16,494    |
| Horn cattle.....                | 79,372    | 14,076    |
| Wheat.....                      | 508,704   | 76,247    |

|                                              |         |         |
|----------------------------------------------|---------|---------|
| Cheese. . . . .                              | 2,228   | 2,593   |
| Whiskey in bottles. . . . .                  | 2,818   | 5,529   |
| Whiskey in casks. . . . .                    | 1,396   | 543     |
| Tallow, beef. . . . .                        | 76,253  | 34,371  |
| Nails (iron). . . . .                        | 281,813 | 292,934 |
| Nickel. . . . .                              | 54,540  | 45,811  |
| Mechanics' tools and agricultural implements | 47,582  | 38,830  |
| Musical instruments. . . . .                 | 6,258   | 5,331   |
| Sewing machines. . . . .                     | 34,426  | 89,817  |
| Lumber (pine boards). . . . .                | 17,623  | 11,202  |
| Timber (round and square). . . . .           | 41,091  | 24,752  |
| Portland cement. . . . .                     | 142,259 | 7,320   |
| Asbestos, boards or sheets. . . . .          | 322     | .....   |

ALEX. MacLEAN.

## CHINA.

## REPORT OF THE TRADE COMMISSIONER.

(Mr. W. T. R. Preston.)

HONG KONG, April 22, 1908.

## FLOUR TRADE DEPRESSION.

The flour market in Hong Kong has been very much depressed for several months. It is estimated that there are 1,500,000 sacks of flour now in storage at this port. Flour is being offered at prices which must mean a heavy loss to all the dealers, when the ruling price of wheat is taken into consideration. The fluctuations in the value of silver in China, together with the frequent fall in the rate exchange, have tended to aggravate the situation.

At this season of the year dealers always endeavour to hold very light stocks. The humidity of the atmosphere, combined with the extreme heat, causes the incubation and rapid increase of a destructive worm in the flour, and as the season advances the flour has to be continually sifted to keep it reasonably marketable. It is astonishing that the lower grades of flour are more free than the higher ones of this pest. The best grades are liable to become almost valueless for human consumption.

## HONG KONG MILLS CLOSED.

Following the death of Mr. Rennie, the Hong Kong mills ceased operations. The late manager was the only person connected with the enterprise who had any experience in the flour and milling business. It is feared that the company recently lost very heavily in wheat transactions, and that this to some extent accounts for the late manager's suicide. The closing of the operations is certain very soon to have an important bearing on the price of the flour that is now in stock here, inasmuch as the mills had been supplying the market with nearly 8,000 sacks per day since they were opened about a year ago. It is likely that early arrangements will be completed to start operations again. The services of a fully qualified manager will probably be secured from the west. Among the shareholders are several of the wealthiest and most enterprising capitalists in Hong Kong.

## LUMBER SUBJECT TO FREIGHT DISCRIMINATION.

In continuation of my recent report on the drawbacks attendant upon the introduction of Canadian lumber to the East, I may say that reductions have been made in the freight rates that were then referred to, by the Canadian Pacific Railway; but the reduction to \$9 per thousand was made too late to effect the possible transactions to which references were made to in my previous report on this subject. But at the same time that this rate was quoted by the Canadian Pacific Railway, a still lower rate was being offered by the lines sailing from the ports of Washington and Oregon, so that relatively a somewhat similar discrimination against the Canadian port prevails under this lower quotation, as when the higher rates were in vogue. Unless a standard quotation can be secured from the Canadian lines equal at all times to that which may be given by the lines sailing from the United States, or unless some other arrangements can be effected to secure favourable competitive quotations, all personal and official efforts to secure a fair share of the eastern demand for lumber for the Dominion of Canada may be regarded as a waste of time and energy.

## NEW RAILWAYS NEED CANADIAN TIMBER.

The importance of taking this step may be more readily appreciated by the knowledge that two railways are now being constructed from Canton. One is to Hankow, a distance of 1,500 miles, and the other to Kowloon (opposite Hong Kong), about 150 miles. The former is expected to take ten years in building, but the latter will be completed within three years. Many million feet of lumber will be required in the construction equipment of these railways. There is, therefore, not a prospective, but an immediate demand for lumber—such a demand as should have a material effect upon the output of the lumber mills in British Columbia.

I have no question about the great bulk of this business going direct to Canada, if the problems surrounding the transportation rates are satisfactorily solved. And I have no doubt also, but that efforts will be made to do this outside of the usual lines of communication, if it is found to be necessary, in order to secure the business. If any other country was in the same geographical relationship to Asia that Canada occupies, there would be but little doubt about it securing the complete possession of this eastern lumber trade.

## DIRECT CONNECTION REQUIRED WITH SOURCES OF SUPPLY.

It is exceedingly fortunate that at this particular juncture, a well-known British Columbia lumber company has a practical representative here. His technical knowledge gives an opportunity of discussing the various specifications of the lumber that will be required, in respect to which I have no knowledge whatever. Apart from that phase of the question, however, it is universally admitted that the prospective purchasers with whom I have come in contact on the question of lumber are exceedingly anxious to get into direct contact with the sources of supply, and to avoid transacting business through the wealthy commission houses, which have largely controlled the eastern trade for half a century. The profits to these business concerns on one year's supply of lumber to these two railway companies, would exceed £30,000 (\$150,000), part of which must come out of the pockets of the producers on the other side of the Pacific ocean, and the balance would be contributed by the consumers on this side.

An acquaintance with this fact, will assist in a clearer impression of the influences that have to be overcome, in order to secure an opening for direct transactions between Canada and China. These forces that have so long controlled this trade will not give up their present advantages without a severe struggle.

## BUSINESS REPRESENTATIVES WANTED IN CHINA.

In so far as this part of Asia is concerned, there are undoubtedly favourable openings for an enormous expansion in wheat, flour and lumber. Probably to these

commodities might be added lead, which I propose dealing with, when I succeed in collecting the data that is necessary, before arriving at a final conclusion. But in regard to lumber and wheat products, practical men must be on the spot to canvass for business. This has already been provided for by the presence of an exceedingly able representative of a Vancouver lumber company. Wheat and flour interests should be similarly represented.

And on this point it might not be out of place to suggest, that these interests could possibly be better represented in the early stages of expansion of the several interests here, by a pooling or amalgamation in Canada of the eastern requirements, rather than they should fail to put forth energetic efforts in the markets here. There seems to be no reason why arrangements should not be effected whereby a division of the trade could be made in the Dominion between all the mills that are prepared to enter into the eastern trade. One well-paid representative of any one of these great Canadian interests will, in the long run, be much more successful than several minor representatives could possibly be. But it must be remembered that the business is much more likely to have early and satisfactory expansion by personal contact with dealers here, than by correspondence or business circulars.

The secret of the success of the United States and Germany in recent years in the East, is altogether due to the fact that representatives of the manufacturing interests of these countries have been in evidence everywhere. In the course of my own inquiries I have very frequently come into contact with an expression of opinion that the day is going by, when effective business can be carried on without personal intercourse between representatives of the producers and consumers respectively.

#### WESTERN CONTRACTS MUST BE CARRIED OUT.

It is important that another phase of the eastern trade should not be neglected, and that is that any contracts or arrangements that may be made on behalf of western dealers shall be carried out honestly, both in the spirit and letter of the contracts. In no way can a western business house secure an enviable reputation, which will mean an unlimited expansion of business, and, per contra, the failure to carry out, in every particular, the conditions of contracts and arrangements, will prove absolutely ruinous to all attempts to do business again. This view cannot be impressed too strongly upon all Canadians intending to enter the lists for a share in the eastern trade.

W. T. R. PRESTON.

### MANCHESTER.

#### REPORT OF TRADE COMMISSIONER.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,  
MANCHESTER, ENG., May 15, 1908.

#### BACON IN ENGLAND SECURES HIGH PRICES.

Considerable change has occurred in the Manchester market since the early part of the year in relation to bacon. In the months of January and February this product declined in value to such an extent, that the producer must have lost considerable. Owing to the plentiful supply of Danish bacon, the English trade in America and

Canadian meats was not sufficient to distribute satisfactorily the shipments, with the result that stocks accumulated and tended further to weaken the market. The low price of hogs in the western market gave rise to a general expectation that prices would remain low for some time and the wholesale market was stagnant. The English retailer was convinced that this low price would not obtain for any length of time, and hesitated to reduce his selling price, fearing a return to a higher level. This prevented the free sale of American and Canadian bacon, and in consequence wholesale houses sales fell off.

Latterly, however, retail prices have been reduced, and the consumption of western bacon has increased to such an extent that the Liverpool sales have averaged 16,000 boxes weekly, and as the imports have varied from 13,000 to 17,000 boxes weekly, the market has toned up considerably. The strong cables from Chicago, and the advance of more than 2 cents in the price of hogs, has created a belief that higher prices will rule. Information has also reached this market that the beef supply is very small in the United States, causing a brisk demand for hogs in the home market, which will further accentuate the situation.

Canadian bacon has toned up from an average price of 42s. to 48s., and if the exports from Denmark fall off, as is expected, there should be a brisk demand for Canadian in the neighbourhood of 50s. The cheap price of Danish has attracted considerable attention to the disadvantage of Canadian, but this cannot continue for long. The small shipments of Canadian bacon so far this season have been well advised, as larger shipments would have resulted in a considerable loss to the curers. It is expected that from this month right on through the summer good prices will prevail, and Canadian packers would be well advised to increase their shipments.

#### CHEESE FOR ENGLAND WELL PRESERVED.

One of the largest wholesale provision firms furnishes the following market report under date May 13, 1908:—

‘Our Canadian market to-day has had a decidedly better tone than it has had for some weeks. The demand from many parts of the country has been better, and white, which is becoming scarce much more in proportion than coloured, is fetching a premium of 6d. per cwt. To-day’s prices are ruling 63s. white, and 62s. 6d. coloured. The quality of the goods generally is perfect in condition, especially some of the western-made cheese. We opened in our store to-day a parcel of this cheese, which had been waxed, and was perfect both in quality and in appearance. We only regret that this system of waxing does not become general in Canada, as the shrinkage of this particular lot is practically nil, and we have kept them since last October.

#### BUTTER AT LOW FIGURE.

‘The market has been somewhat demoralized to-day as regards butter, and prices ruling about 6s. lower than last week. The Scandinavian produce, the Siberian and Finnish and Irish creameries, are all increasing in quantity week by week. Until this week our market has been good, stacks being almost cleared, with the result that prices have been much higher. This week shows an accumulation, and prices have been reduced to meet buyers’ ideas. We are looking forward to a big make, given fine weather and low prices through the summer.’

#### IMPORTER’S VIEW OF FARMERS’ EXCHANGE.

I beg to submit herewith, without prejudice, the opinion of one of the leading provision firms of this city anent the recent formation of ‘Farmers’ Exchange’ for the sale of cheese in the Brockville district:—

‘Further to our conversation with you respecting the Farmers’ Exchange in the Lansdowns district, Ontario, we have read your two newspaper cuttings with interest,

and we must say that we still come back to our original idea, that the sooner the farmers in Canada realize the benefits resulting from consigning goods to houses of good repute on this side, the better it will be for their trade. There seems to be a difference of opinion amongst many of them, yet if a few would just combine and consign a few lots to see the beneficial results, the idea would grow, and in time the bulk of the farmers would come in line with the idea.

‘PRESENT INSPECTION SYSTEM COSTLY.

‘The system of inspection that they now advocate, is too costly, in fact it would be an impossibility for inspectors of the factories to work it on ordinary lines. The distance apart from the factories would be too great, and at the same time it would want quite an army of inspectors to keep constantly on the move grading the cheese, which in itself would put a big cost on the produce.

‘We should be delighted if only a few of the farmers would send us, on consignment exactly on the same principle as we are receiving Siberian butter and New Zealand cheese week by week, to see the benefit they would receive, not only in getting their money, but dealing direct with the distributors, thus saving any middleman’s profit and the waste, with a moderate allowance exactly as they come from the farmers.

‘It is too great a change to be realized by most of the farmers, yet it is an idea that once started, would grow with great success, the same as it has done in other countries.’

BRITISH TRADE RETURNS.

The Board of Trade returns for April show that last month the imports amounted to £47,099,912, a decrease as compared with April, 1907, of £9,682,792. The exports last month were £30,705,338, a decrease compared with April last year of £3,711,528.

It may be remarked that the British exports are over £3,500,000 and the imports £40,000 in excess of those for April, 1906.

P. B. MacNAMARA.

# TARIFF CHANGES

## NEWFOUNDLAND.

AN ACT TO AMEND 'THE REVENUE ACT, 1905.'

(Passed February 18, 1908.)

1. Section 31 of the Revenue Act, 1905, as already amended, is hereby amended by the addition after the word 'Grand Bank' of the word 'Fortune.'

2. Twenty-five cents per ton of the duties on coal imported into the port of Fortune shall be remitted, and such coal allowed entry at the rate of twenty-five cents per ton upon the production to the collector or other proper officer by the importer, of a satisfactory affidavit setting forth that such coal is intended exclusively for domestic use, and on such importer entering into a sufficient bond with sureties that such coal or any part thereof shall not be sold or used for other than domestic purposes.

3. There shall be paid by the owners or masters of all vessels entering the port of Fortune, a rate or tax as follows, that is to say: On all vessels owned in Fortune, a sum of fifteen cents per ton, and on all other vessels, local or foreign, a sum of five cents per ton; such rate or tax shall be collected in the same manner as light dues are at present collected, and shall be payable not more than once in every year. The amounts so collected shall be paid to such persons as shall be determined by the Governor in Council for the use of Fortune.

4. It shall be lawful for the Governor in Council before paying over any of the monies hereinbefore provided to be collected for coal duties and taxes on vessels at the port of Fortune, to deduct therefrom and to withhold thereout any sum which may be due to the government for interest on account of any money advanced for the use of the said town of Fortune.

5. Section 10 of the Revenue Act, 1905, is hereby amended, and the following substituted therefor:—

'10. There shall be a drawback allowed on all native berries exported if packed in 1 lb. cans, twenty cents per 96 lbs.; if packed in 2 lb. cans, fifteen cents per 96 lbs.; if packed in larger cans, ten cents per 96 lbs.; there shall also be a drawback allowed on all herring and edible fish, except lobsters and trout, packed in cans, per 96 lbs. exported; when packed in 1 lb. cans and over, twenty cents per 96 lbs.'

6. Schedule A to 'The Revenue Act, 1905,' is hereby amended:

By striking out of item 67 the words 'by bakers to be used in the manufacture of fancy biscuits';

By adding to item 69 the following words: 'Empty bottles, when imported by manufacturers for use in putting up the goods manufactured by them, *ad val.* 30 per cent';

By striking out of item 75 (c), the words, 'Wire fencing, and fasteners for same';

By adding to item 96 after the words 'Oak, pitch, pine, elm, beach, greenheart and ironwood lumber under five inches square,' the letters 'N. E. S.';

By adding to item 113 after the words: 'Lubricating oil,' the letters 'N.E.S.' and adding, 'Lubricating oil when imported in bottles, tins or other packages, each holding less than one gallon, 25 per cent *ad val.*';

By adding to item 154 the following words: 'Ticking for covering mattresses, 30 per cent *ad val.*,' and by inserting in the same item after the words 'and hair' the word 'fibre';

By adding to item 86 the word 'reputed' after 'per' and before the expression 'lb.'

7. Schedule B to 'The Revenue Act, 1905,' is hereby amended:

By adding to item 159, 'Wire fencing and fasteners for same, and gates for wire fences, when the gates are made chiefly of wire';

By adding to item 187 after the words 'Astronomical maps and charts,' the words 'and school desks';

By striking out of item 195 all the words after 'when imported' in the second line of the last paragraph and substituting the words, 'for agricultural purposes, and to be used in vessels owned in this colony and employed in its fisheries, or employed solely in missionary work within this colony';

By adding to item 197, 'Boards and plank of hardwood over eighteen feet in length, when imported for shipbuilding; mast-pieces of pitch pine, Oregon pine, or similar hardwood; timber of hardwood when imported for shipbuilding, upon such certificates as may be required by the Minister of Finance and Customs.'

## COMMERCIAL CONVENTION BETWEEN FRANCE AND BARBADOS.

The French *Journal Officiel* for April 2 contains a presidential decree promulgating the convention between France and the United Kingdom, respecting the commercial relations between France and the Island of Barbados, which was ratified at London on March 18 last.

The effect of this convention is to admit certain 'colonial produce' of Barbados into France, Algeria, and the French colonies and possessions (including protectorates) at the lowest rate of import duty applicable to similar products of other foreign origin; while the natural and manufactured products of France and French possessions are reciprocally entitled on importation into Barbados to the lowest rates of duty applicable to similar products of other foreign origin. It is provided that the certificate of origin necessary to secure these reduced duties shall be *viséd* by French and British consuls respectively, free of charge.

The convention came into force immediately after the exchange of ratifications, and is to remain in operation until one year after denunciation by either contracting party.

## FLOUR-MILLING INDUSTRY IN JAPAN.

According to an investigation made by the Japanese Department of Agriculture and Commerce, the present state of the flour-milling business in Japan is as follows:—

In 1905 there were 16,988 mills and 18,993 labourers, while in 1906 there were 16,968 mills, with 18,642 labourers, thus showing a slight decrease, owing, perhaps, to the amalgamation of mills and the consequent decrease of small mills.

In 1904, 187,718,826 lbs. of flour were milled, the value of which was estimated at 11,306,955 yen, while in 1905, 198,679,835 lbs. were milled, valued at 11,505,938 yen.

The Japan Flour Milling Factory in Tokio is the largest in Japan. It has a capital of 300,000 yen, and has motor engines of 250 horse-power. The next largest mills are the Sapporo Flour Mill, Masuda Wheat-Flour Mill in Osaka, and one in Nagasaki, each having a capital of from 100,000 yen to 150,000 yen, and a horse-power of from 75 to 100.

The largest flour mill using water-power is that of the Utsunomiya Flour Milling Company. It uses eight water-mills of European style, and can utilize water to the extent of 50 horse-power. The capital of the company is 600,000 yen. There are also some mills using water with oil-engines or steam-engines, but most of them are on a small scale. Flour-milling by hand constitutes a greater part of the secondary work of farmers.

## IMPORTS OF MOLASSES AND SYRUPS INTO CANADA.

STATEMENT showing Amount of Molasses and Syrups Imported into Canada for Consumption, together with portion Imported from British West Indies, Porto Rico and United States, during the Years 1903 to 1908. (*From Canadian Returns.*)

## LARD AS A PRESERVATIVE OF EGGS.

A French journal contains a very instructive article on a new method of preserving eggs by packing in lard and shavings, which appears to possess the twofold merit of cheapness and simplicity. The basis of the article was the series of experiments by Dr. Campanini, a report of which appeared in the December bulletin issued by the Italian Minister of Agriculture.

Dr. Campanini, after reviewing the various known means of preserving eggs—by salt water, lime water, silicate of potash, vaseline, and cold storage—described his experiments, which showed better results than all others.

His theory is that to preserve eggs some system must be adopted that will absolutely prevent the exchange between the air outside and that inside the egg—for it is this continual exchange that causes putrefaction.

Dr. Campanini selected perfectly fresh eggs and covered them with lard, so as to effectually stop up all the pores. The shells were thus rendered impermeable, the exchange of air was prevented and, the obstruction of the pores not permitting the evaporation of the water, there was no loss of weight. The whites and yellows of the eggs retained their colour perfectly and the taste was not modified in the slightest degree. When properly coated with lard—not too thickly—the eggs are put in baskets or boxes upon a bed of tow or fine odorless shavings and so arranged that there will be no point of contact between them—otherwise a mold will develop and putrefaction result. The packing room should be perfectly dry, the question of temperature not being important. By his process Dr. Campanini kept a quantity of eggs for a whole year—through a very hot summer and a very cold winter—and they were perfectly preserved. He said that 4 cents worth of lard sufficed to coat 100 eggs, and that any one could easily prepare that number of eggs in one hour's time.

## REPORTS OF BRITISH CONSULS.

## BRAZIL.

## REPORT ON THE TRADE OF SANTOS.

(*H. B. M. Consul-General Casement.*)

## BRITISH IMPORTS HEAD THE LIST.

British imports easily head the list, but their superiority is more apparent than real from the point of view of manufacturing industry, for if coal and specie are subtracted it will be found that imports from the United Kingdom in 1906 do not greatly exceed in value those from Germany.

Out of a total of 22,338,053 milreis figuring as British imports for 1906, coal amounted to 3,530,981 milreis. Specie imports came to 6,072,429 milreis, and while it is true that all the specie imports did not represent consignments from the United Kingdom, none the less a considerable sum, figuring as British imports, must be written off under the heading of gold coin.

The principal British imports consist of cotton goods, with jute and hemp (in which India has a share) closely following. Machinery and implements would come

close behind, and woollen goods must also constitute a considerable part of British imports.

#### GERMAN INROADS ON BRITISH TRADE.

In paper and cement Germany has practically entirely superseded British and all other exporters to this part of Brazil, and she is steadily entering into competition in a variety of other articles once largely supplied from the United Kingdom : Earthenware, china, glassware, crystal, &c.; hosiery (almost entirely); cotton shirts and shirting (largely); silk yarn and thread; lace insertions; sewing machines; gold and silver jewellery (almost entirely); skins and leather; aniline and other dyes; woollen yarn; musical instruments; rails and accessories; surgical instruments, &c.; chemicals and drugs (very largely); toys (almost entirely); rubber goods.

#### CEMENT TRADE WHOLLY GERMAN.

Cement was imported at Santos to a value of 758,553 milreis in 1905 (as against 1,170,284 milreis in 1904), and 1,476,570 milreis in 1906. A new company was registered in the beginning of 1907 under the name of the 'Fabrica de Cimento Italo-Braziliera' with the object of manufacturing cement in the town of Rodovalho, in the interior of the State of Sao Paulo. The headquarters of the company are to be in the city of Sao Paulo. The headquarters of the company are to be in the city of Sao Paulo, with a capital of 800,000 milreis. The import trade in cement is now almost solely a German one, and the amount used is likely greatly to increase.

#### CANADIAN ENGINEERING ENTERPRISE.

Port and harbour works, railway extension, building generally are all matters of certain and speedy development in a rich and prosperous community; and while Italy will largely supply the labourers needed it is likely that Germany and the United States, and Belgium possibly, will furnish much of the material, unless British enterprise should prove itself equally alert in this growing field.

It is true that the principal goods imported from the United States show no remarkable increase up to 1905. But United States and Canadian enterprise are entering new fields in Brazil, and it is likely that the railway and electrical development of this country will largely depend on the action of North American capitalists and engineering firms.

#### NOVA SCOTIA FISH IN DEMAND.

The principal articles of food imported at Santos, consisting of wheat and wheat flour, are supplied almost entirely by the Argentine Republic and are very largely carried in British bottoms. Rice is imported at Santos chiefly from British India, although Germany figures as a prominent exporter of rice to Brazil generally.

Codfish and salt fish comes in in considerable quantities and is largely brought from Nova Scotia in sailing vessels under the British flag. There is a growing trade in this article, and Norwegian fish is also imported. The trade is certainly one that deserves attention.

#### DISTINCT WANT OF FOODSTUFFS.

The import trade in cheese is largely on the increase, and is chiefly in Dutch and Italian hands. Fairly good cheeses are made in Brazil, but the imported varieties are in more general use, I fancy. There is room here for British competition. Hams are imported chiefly from the United Kingdom and an opening certainly exists for extension of this trade, wherein Irish dealers might profitably share. So, too, with bacon, which at present is chiefly imported from the United States. There is a distinct want of foodstuffs of this kind in Santos and Sao Paulo.

#### BRAZILIAN INVOICE SYSTEM.

Goods imported from Brazil figure for customs and statistical purposes on a Consular invoice drawn up and attested at the port of shipment. These invoices,

dealing with the total of foreign imports into Brazil, rose from 112,402 in 1901, the year in which they began, to 176,626 in 1906. Invoices are in all languages, but chiefly in English, German and French. Each invoice goes through five different hands before it is disposed of. In 1906 the largest number of invoices received is said to have been from 'Great Britain,' which would include all goods of Irish origin.

## HUNGARY.

*Report on the Economic Condition of Hungary by F. S. Clarke, H.M. Consul-General at Budapest.*

### OPENINGS FOR BRITISH TRADE.

British-made goods are much appreciated in Hungary. The principal articles of British origin which find a market here are agricultural machinery, engineering specialties, motor cars, machines and tools, sewing machines, paper and stationery, hats (men's), ties, umbrellas and walking sticks, leather and leather fancy articles (portmanteaux, &c.), groceries (especially herrings, jam, tea, whisky, biscuits), sporting articles, rubber goods (shoes, &c.), fancy articles in general, silver fancy articles, sanitary earthenware, optical and scientific instruments, surgical instruments, varnish, pharmaceutical products and perfumery, typewriting machines, articles for writing (desks, &c.), silk tissues and velvets, woollen tissues (for clothing purposes), &c.

### INDUSTRIES ENCOURAGED BY STATE.

Industries in Hungary flourished during the past year, and most of the mines, factories, mills, &c., were worked to their full capacity. In the two most important branches of production, viz., iron and coal, progress is noticeable. The output of coal in 1907 showed an increase of some 150,000 metric tons, thus attaining to a total output of 4,000,000 metric tons. Measures have been taken to increase during the present year this output by about 500,000 metric tons. The production of iron during 1907 can be estimated at 125,000 metric tons. Iron foundries were actively at work, though affected more than any other concerns by the spinning factories, gave favourable results. They increased their production and worked with profit.

The law which came into force in January, 1907, with regard to State encouragement to home industries has already been productive of results. According to a report recently published by the Hungarian Minister of Commerce the amount granted in the first nine months of the past year for the development of home industries was 11,907,990 crowns (£496,166), to be paid in 12 annual instalments. Out of this amount 9,921,869 crowns (£213,410) were given to manufacturers.

### EMIGRANTS RETURNING.

The flow of emigration from this country, which has been causing so much anxiety to the government, has, in consequence of the financial crisis in the United States of America, been to a certain extent and for a time checked. Hungarian emigrants are returning in considerable numbers, while the reports received as to lack of employment in America are certainly deterring a good many would-be emigrants from seeking their fortunes abroad. The jubilee to all those who, by leaving the country, had evaded military service and had thereby rendered themselves liable to punishment, has also contributed to the return of many Hungarians to their native land.

The number of emigrants in the first nine months of 1907 is estimated at about 162,000. The number of those who came back during the same period is put at 32,000.

## ITALY.

*Report on the trade of Southern Italy by H. B. M. Consul-General Neville-Rolfe at Naples.*

## AUSTRALIAN COLD STORAGE TRADE.

An establishment for cold storage, commenced in 1905 at Naples, is now in working order on the recently reserved land which lies outside the 'octroi' boundary. The original intention was to introduce into the town, and into the country generally, meat from North and South America and Australia. The import duty and octroi, however, amounts to 38 lire per quintal (say 15s. 6d. per cwt.), a prohibitive figure, so that, so far, orders have been limited to what is required for supplying stores to steamers, a business which has lately very considerably developed, as nearly all the numerous lines in the emigration trade are supplied with colonial meat. Until lately all the frozen meat was imported from North America, but last August a steamer of the Orient Royal Line brought a consignment of frozen beef, mutton, pork and hares from Brisbane, Sydney and Melbourne, also a trial consignment of Australian butter. The importation of butter is not, however, likely to be attended by success, duty and freight being too high for Australian butter to compete with that from Milan.

## REMITTANCES BY EMIGRANTS.

The main reason alleged for the deficiency of small notes in Italy is that they are shipped in large quantities to the Argentine Republic and the United States, where they are sold at a premium to the Italian immigrants who use them as a convenient mode of transferring small sums to their relations at home. Money thus forwarded, though amounting in the aggregate to a considerable sum, cannot be computed. Indeed it is somewhat doubtful if any estimate of the money sent home by emigrants can be formed with anything approaching to accuracy. The full statistics of the Italian emigration for the year 1907 are not yet to hand, but in all probability, owing to the recent earthquakes in Calabria, the year will establish a record. The increased size and number of vessels used in the emigration trade all points to this result, and the fortunes brought back by returning emigrants stimulate others to follow their example. The little coast town of Sapri, in Basilicata, is now largely composed of pretentious houses built by returned emigrants who are commonly called 'Americans' in their native districts.

## TEST FOR FOREIGN WINES.

Orders have been issued by the government to the custom-house officials to apply the law of July, 1904, rigorously in order to prevent frauds in the preparation and commerce of wines. Accordingly, no wine will be allowed to enter Italy from abroad unless its genuineness is fully ascertained by analysis of the sample made by competent chemical laboratories. The laboratories have been warned that as the admissibility of the wine depends upon their report they are to be extremely careful in their endeavours to detect adulteration or sophistication within the limits laid down by the existing law, and to secure that wine condemned by them be either sent back to its country of origin or destroyed. These orders have been issued for the protection of the Italian grower to prevent his being undersold by adulterated products from other countries.

## ITALIANS FOR AUSTRALIA.

The minister for foreign affairs has forwarded to the commissioner for emigration a complete project which originally emanated from the minister of agriculture, who in conjunction with the Australian government has formed a plan for the introduction of Italian families as colonists for Western Australia. Signor Zunini, the Italian Consul-General at Perth (the capital of Western Australia), is taking an active interest in the matter.

The scheme contains very favourable conditions not only as to the quality and quantity of the land to be placed at the disposal of each family, but also in the arrangements to be made with a large Agricultural Bank which will finance the peasants during the early years of their venture. The immigrants will pay a small rent for eighteen years, at the end of which period they will become owners of the freehold.

One hundred families are to be sent out in the first instance, and, if the result is satisfactory, more will follow as soon as possible. At the present moment, when the United States are checking the influx of Italians, a fresh outlet should prove of great service. Australia has placed only two restrictions, both of which are most reasonable, namely, that the emigrants must be of robust health, and not have been convicted of crime.

#### MANUFACTURE OF ARTIFICIAL HONEY.

Bee-keepers are becoming seriously alarmed at the perfection which has been attained in the manufacture of artificial honey. The process, which is a very simple one, is thus described: Take 1 kilo. ( $2\frac{1}{2}$  lbs.) of best refined sugar, place in 300 cubic centims. of water, add a gramme of tartaric acid, boil it in an enamel vase under pressure up to  $110^{\circ}$  Fahr. for 45 minutes until the liquid has assumed a golden colour. Leave it to cool and it will assume the solidity of ordinary honey. If a little true honey is mixed with it the mass will assume the flavour to such an extent as to be indistinguishable from the genuine article. Bee-keepers are endeavouring to obtain legislation which shall enact that some substance shall be added to artificial honey which is placed on the market so that it may be distinguished at a glance from the genuine article. On the other hand, it is asserted that the artificial honey may be made very useful to apiculture, because by mixing it with inferior or unsaleable honey a marketable article may be produced.

#### PRESERVED CHERRIES IN BRINE.

A new agricultural product, which has reached very important proportions as an export, consists of cherries preserved in the following manner. They are first placed in the fumes of sulphur and then packed in casks with very strong brine. The chief place of export is to the United States, where, as they pay no duty, they compete with the home-grown fruit. On arrival the fruit is sorted out, the best being sold for the purpose of flavouring some of the various stimulants which under different names form the specialty of American bars, the second best are preserved in brandy in the usual way, and the remainder are used for the general purposes of confectionery. The extraordinary expansion of the trade may be judged by the following figures;—1904, 2,783*l.*; 1906, 14,584*l.*; 1907, 30,125*l.* The figures for 1905 are not available, as the export of cherries was in that year not placed under a separate head in the returns, but it will be observed that the increase in 1907 over 1906 was more than 100 per cent.

#### MACARONI FOLLOWS EMIGRATION.

A very remarkable increase has taken place in the export of macaroni to the United States in spite of their protective duty, which would, and no doubt does, naturally tend to exclude the foreign product. The increase is largely to be accounted for by the flow of Italian immigration to the States, the first idea of the South Italian peasant being to nourish himself on macaroni, a delicacy, except in its cheapest form, usually beyond his means in his own country. No sooner does he get the higher wages which rule in America than he is keen to consume the better qualities of his native product. Only the best macaroni is sent to America, the cheaper sorts being reserved for local consumption. In 1904 the value of the exports from Naples and Castellammare to the United States alone amounted to 308,151*l.* This in 1905 increased to 415,848*l.* and in 1906 to 532,400*l.* The figures for 1907 are expected to amount to 600,000*l.*

## SOUTH AFRICAN PRODUCE SHIPMENTS.

The British Board of Trade correspondent at Durban (Mr. A. D. C. Agnew) reports an announcement by the Natal Colonial Treasurer to the effect that the government have arranged to make trial shipments to England of 120 quarters of beef and 20 tons of potatoes. The Treasurer further stated that he had been told by the merchant who recently forwarded a trial shipment of frozen mutton to England that from 60,000 to 70,000 sheep could be obtained for shipment from Eastern Orangia, Eastern Transvaal and East Griqualand if the necessary appliances were available at Durban.

Mr. Agnew further reports that at a recent meeting of fruit growers, the Minister of Agriculture explained arrangements which were being made for the export of Natal fruits under government supervision, careful packing and grading being insisted upon, and the fruit being placed in ventilated chambers in the steamers. A committee of fruit growers was appointed to arrange details.

## TRADE OF BRITISH HONDURAS.

No. 1.—STATEMENT showing Revenue, Expenditure, Trade and Shipping for British Honduras during the Years ended December 31, 1902 to 1906.

NOTE.—Metric ton = 1,000 kgr. = 2,204 lbs. approximately. Above figures are from May report of A. Poindron, Canadian Trade Commissioner at Paris.

## TRADE JOURNAL EXTRACTS.

*(Agricultural News, B.W.I.)*

## SUGAR PRODUCTION IN CUBA.

Since so much is at present being heard of the sugar-producing capacity of Cuba, some details, taken from a tabular statement included in the latest British 'Consular Report' on the trade and commerce of Cuba, may not be without interest. The sugar crop of 1906-7, which was a record one, reached 1,427,973 tons. In 1905-6, the output was 1,178,749 tons, and in the year before this 1,163,258 tons of sugar were produced.

It is apparent, however, on comparing the planted sugar acreage with the total area suitable for cane cultivation, that the limit is far from being reached. As much as 15,451,264 acres, or more than half the area of the island, are said to be suitable for cane growing, but only 458,363 acres (or less than one-thirtieth of this area) are planted. In the province of Mantanzas, which has the largest proportion of its available land under sugar, no more than 8.33 per cent. is planted, while in Havana no more than 1.72 per cent of the land suitable is as yet growing canes, and in Pinar del Rio only .73 per cent. From a consideration of these figures, it is at once obvious that enormous possibilities of development lie before the Cuban sugar industry.

## RUBBER PROSPECTS IN COLOMBIA.

Extensive plantations of Castilloa rubber are reported by the United States Consul at Cartagena to be in course of formation in Colombia. At least 1,600,000 trees have been planted in different river valleys, but these are at present too young to have made much return. At present the Colombian output of rubber is chiefly from wild trees, and collected chiefly by Indians.

Rubber planters do not seem too sanguine as to prospective yields. One grower reported an annual return of 1,121 lbs. of dried rubber from 14,155 trees, of eight years old. The trees were carefully tapped, and this yield would work out at no more than 4 oz. of rubber per tree per annum. Other planters, basing their expectations on wild rubber returns, assert that at least 1 lb. of rubber per tree per year should be obtained. The total shipments of rubber from Cartagena in 1906 were 351,076 lbs., and 300,696 lbs. in the first nine months of 1907.

The following suggestion to British traders doing business with Norway, from the British vice-consul at Bergen (Mr. E. F. Gray), is contained in the British Board of Trade Journal:—

'Of possible trade openings I would draw attention to such as are likely to occur through the increasing application of water power to electrical purposes. The district is a scattered one, with a long coast line, and what appears to be wanted is the appointment of energetic local representatives, who, from the nature of their private business, are likely to hear of new undertakings before the particulars are generally known here, and who can be first in the field with offers from British firms. The readiness of Norwegians in general to deal with British firms of repute is a factor that should be utilized to the full.'

OTTAWA  
GOVERNMENT PRINTING BUREAU  
1908

## TRADE NOTES.

*China.*—The trade of China (vide page 267 of this report) has increased gradually year by year until the value of the imports in 1907 was 416,401,369 Haikwan taels, an increase over the year 1896 of 213,811,375 Haikwan taels, or over 100 per cent; while the export trade for the year 1907 was 264,380,697 Haikwan taels as against 131,081,421 Haikwan taels in 1896, representing an increase of 133,299,276 Haikwan taels, or over 100 per cent. The increase in the trade of China has been very evenly distributed by countries with the exception of Japan and the United States where the increase has been exceedingly large. The Trade Statistics of China would indicate that the trade of China with Canada has made very little progress. The note to the trade of China with Hong Kong, page 268, would explain this, for no doubt large quantities of Canadian goods are credited in the trade returns of China to Hong Kong.

*Salvador.*—At page 272 will be found the trade figures for the Republic of Salvador for the years 1902 to 1905. The trade at present is principally in the hands of Great Britain, United States, France and Germany. Canada has a small trade with the Central American States, but there are no available returns to show what that trade is with Salvador. The trade of the United States with Salvador is given at page 274 for the years 1905, 1906 and 1907. The exports from the United States to Salvador are of a class that Canada has for export and, no doubt, Canada could improve her position commercially.

*United States.*—At pages 275 to 289 of this report will be found tabulated figures showing the trade of the United States for a period of years. A glance at table No. 1 will show that the trade of the United States with all countries has increased enormously of late years, and that their trade with the British Empire has not increased as rapidly as with foreign countries. The following table illustrates this:—

| Years.              | TRADE WITH      |                    |
|---------------------|-----------------|--------------------|
|                     | British Empire. | Foreign Countries. |
|                     | \$              | \$                 |
| 1895.....           | 712,011,812     | 827,496,318        |
| 1907.....           | 1,316,993,361   | 1,998,279,142      |
| Trade increase..... | 604,981,549     | 1,170,782,824      |

An analysis of the import trade of the United States will show a decided increase in favour of foreign countries as against the British Empire, and a study of the export trade with foreign countries will show an increase of more than 200 per cent from 1895 to 1907, while the increase with the British Empire for the same period was less than 90 per cent. The following table illustrates this:—

|                        | IMPORTS.    |             | EXPORTS.    |               |
|------------------------|-------------|-------------|-------------|---------------|
|                        | 1895.       | 1907.       | 1895.       | 1907.         |
|                        | \$          | \$          | \$          | \$            |
| British Empire.....    | 237,865,981 | 445,253,371 | 474,145,831 | 871,739,990   |
| Foreign countries..... | 494,103,984 | 989,168,054 | 333,392,334 | 1,009,111,088 |

The imports into the United States from Canada from 1898 to 1907, by principal articles, will be found on page 286, while the exports from the United States to Canada for the same years are given at page 288.

## TRADE COMMISSIONER SERVICE.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Trade Commissioners and Commercial Agents into any subject of general interest.

Canadian Trade Commissioners and Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

### CANADIAN TRADE COMMISSIONERS.

#### Australasia.

J. S. Larke, The Exchange, Sydney, agent also for New Zealand.  
D. H. Ross, Stock Exchange Building, Melbourne.

#### British West Indies.

E. H. S. Flood, Barbados, agent also for the Bermudas and British Guiana.

#### China.

Aex MacLean, care of H.B.M. Consul General, Shanghai.

#### France.

A. Poindron, 101 Rue Réaumur, Paris.

#### Great Britain.

Rooms 39 and 40, Central House, Birmingham.

J. B. Jackson cor. of E. Parade and Greek Streets, Leeds.

P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.

W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.

#### Japan, China and Korea.

W. T. R. Preston, No. 14 Bund, Room B, Yokohama, Japan.

#### Mexico.

A. W. Donly, Apartado, 91B, Mexico, D.F.

#### Newfoundland.

E. D. Arneaud, Gazette Building, Water St., St. John's.

#### South Africa.

John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.

### CANADIAN COMMERCIAL AGENTS.

#### British West Indies.

E. A. H. Haggart, Kingston, Jamaica.  
R. Bryson, St. John, Antigua.  
S. L. Horsford, St. Kitts.  
Edgar Tripp, Port of Spain, Trinidad.

#### Norway.

C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Sweden and Denmark also.

### CANADIAN HIGH COMMISSIONER'S OFFICE.

#### Great Britain.

W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.

Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

### CANADIAN IMMIGRATION AGENTS.

#### Belgium.

D. Tréau De Cœli, Place de la Gare 23, Antwerp.

#### France.

Paul Wiallard, 10 Rue de Rome, Paris.

#### Great Britain.

J. Obed Smith, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.  
A. F. Jury, Old Castle Buildings, Pree-son's Row, Liverpool.  
G. H. Mitchell, 139 Corporation Street, Birmingham.

H. M. Murray, 81 Queen St., Exeter.  
L. Burnet, 16 Parliament St., York.  
John Webster, 17-19 Victoria St., Belfast.  
John McLennan, 26 Guild St., Aberdeen.  
E. O'Kelly, 44 Dawson St., Dublin.  
Malcolm McIntyre, 35-37 St. Enoch Sq., Glasgow.

## SOUTH AFRICA.

## REPORT OF TRADE COMMISSIONER.

(Mr. John A. Chesley.)

RHODES BUILDING, CAPE TOWN,  
P.O. Box 668, April 22, 1908.

## SOUTH AFRICAN IMPORTS OF TIMBER.

There was imported into British South Africa during the year ended December 31, 1907, 7,262,539 cubic feet of lumber, valued at £420,331. Of this quantity 5,527,511 feet was wood manufactured, valued at £302,611, and 1,735,028 feet was wood planed and grooved, valued at £117,720. There were in addition empty boxes manufactured of wood, valued at £40,157; houses, and frames of houses, valued at £37,638; wood used in the manufacture of matches, valued at £15,898; staves, valued at £8,868; all other kinds of wood, exclusive of furniture, valued at £46,172; making the total value of imported wood goods for the year, £569,064; sterling (\$2,845,320).

## PORTS OF ENTRY.

This lumber entered South Africa, via the ports of Cape Colony, Natal, Delagoa Bay and Beira, as shown by the following statement:—

|                                     | Quantity. | Value.  | Quantity. | Value.  |
|-------------------------------------|-----------|---------|-----------|---------|
|                                     | Cub. Ft.  | £       | Cub. Ft.  | £       |
| <i>Wood unmanufactured—</i>         |           |         |           |         |
| Via Cape Colony.....                | 1,885,494 | 112,995 |           |         |
| Via Natal.....                      | 1,201,273 | 75,694  |           |         |
| Via Delagoa Bay.....                | 2,248,917 | 108,216 |           |         |

## GOOD MARKET FOR LUMBER.

There is a very good market in South Africa for several kinds of lumber, especially pine, spruce, ash and poplar. There is also a good opening for the introduction of planed, tongued and grooved flooring and sheathing, manufactured from birch, maple and pine. Canadian manufacturers and exporters of lumber should make an effort to market more wood in South Africa than they have done in the past.

An *ad valorem* duty of 3 per cent is levied on wood manufactured, and wodd planed, tongued and grooved entering South Africa, the whole amount of which is rebated on Canadian lumber, which comes in under the preferential tariff. This advantage in the tariff over Canada's foreign competitors, Sweden, Norway and the United States, together with the excellent facilities provided by the Canadian South African Steamship line, which makes monthly sailings between the two countries, thus providing a means of transportation for consignments less than full cargoes, should be a great stimulus to trade, and an inducement to Canadian exporters to assiduously cultivate the South African market.

## LUMBER FROM SWEDEN, NORWAY AND THE UNITED STATES.

The lumber imported into South Africa from Sweden and Norway is known to the trade as Swedish red, and Swedish white pine. These woods although known as pine, are very much like the Canadian black and Canadian white spruce. It is claimed by some people in the trade that Swedish white pine is a little lighter in colour, and finer in grain than the Canadian spruce. It is, however, very difficult to distinguish one from the other. The red pine deal is largely used in buildings, for joists and studding, and for the manufacture of boxes. It is also imported in large quantities, planed, tongued and grooved, for flooring. The white pine is chiefly used

for sheathing the ceilings and walls of buildings, doors, sashes and other house furnishings, are also made of this wood. A large portion of the flooring and sheathing is planed, tongued and grooved in the country of production, and, therefore, ready for use when it reaches South Africa.

The imports of lumber from the United States consists chiefly of Oregon and Southern hard pine. The Oregon pine is shipped from the Pacific coast ports of that country. The better quality of this wood is used for the inside finish of dwelling houses. The second grade is planed, tongued and grooved, and used for ceilings, walls and flooring of buildings generally. Shelving and other fittings for stores and shops are also made of this wood. The Southern hard pine reaches South Africa as square timber. It is manufactured here, and used in building and general carpentry.

#### WOOD FROM OTHER COUNTRIES.

The woods imported from the Australian colonies, the British East and West Indies, and some other countries, are in every case the native hard woods of those countries, and are imported for special uses, such as railway sleepers, blocks for street paving, piling and other purposes. This timber, however, does not take the place of Canadian woods, and consequently is not a competitor in this market. Sweden, Norway and the United States are the only competitors with Canadian lumber in South Africa, and as these are foreign countries, Canada, having the advantage of preferential treatment in the tariff, should be in a position to capture a very large share of the wood trade of South Africa.

#### CONSIGNMENTS OF LUMBER REPORTED.

Some months ago a South African firm of timber merchants, contractors, builders and mill owners, were advised to try Canadian spruce deal ends for box making, and other uses in their business. A purchase of fifty standards was made by them to ascertain how it compared with the Swedish wood, which they had been using for many years. It met their requirements so fully, that they have since imported about 300 standards of Canadian spruce deal ends for their box-making business. They also report that the last shipment was received early this month from Messrs, Andrew Cushing & Co., of St. John, N.B., and is very satisfactory.

A short time after the first spruce deal ends arrived, they were in need of first quality pine and poplar, and concluded to try these Canadian woods. An order was given for them, and in due course they reached here. The firm was so well pleased with this lumber that the order was immediately duplicated. They are now so well satisfied with Canadian wood, that a barque of 2,300 tons has been chartered by them, and was loaded at the Victoria Lumber Manufacturing Company's mills, the cargo consisting of 1,563,863 feet of merchantable, and 87,968 feet of Oregon pine, selected, also 57,047 feet of hemlock, and 63 pieces of dressed spruce. This ship sailed from Chemainus on February 21, 1908, for Cape Town.

JOHN A. CHESLEY.

## JAPAN, CHINA AND COREA.

REPORT OF TRADE COMMISSIONER.

*(Mr. W. T. R. Preston.)*

YOKOHAMA, May 13, 1908.

## CANADIAN PRODUCTS MARKETED THROUGH FOREIGN AGENCIES.

The number of Canadian products that find a foreign market through the channel of foreign commission houses is a subject that deserves attention. This aspect of Canadian trade expansion came under my notice, in the first place, during the course of my temporary official duties in South Africa. There I found that several products from the Dominion had been purchased through commission agencies in New York and London.

It is not necessary to go very far with inquiries in the East in order to find a similar situation prevailing here. This is especially the case in respect to canned goods from British Columbia, which are imported into Asia through London and San Francisco. It not infrequently happens that shipments of this character prove unsatisfactory, the consignees evidently failing to be as careful about the quality of the goods for the Asiatic market, as the Canadian producers interests demand.

## PURCHASING DIRECT MITIGATES EVIL.

A reference was made by me in one of my earlier reports to a consignment of a well-known brand of Canadian cheese, which had been purchased through a commission agency in San Francisco, arriving in Japan in an unsaleable condition. This was given as an illustration of the advisability of establishing as close a connection as possible between the producer and the consumer. In the case in question, the consignment was in such an unsatisfactory condition, that the purchasers informed me they would not risk further business with that product. However, in response to my recommendations, the firm entered into direct communication with the manufacturers, resulting in the receipts of consignments, to their branches in Hong Kong and Yokohama, direct from the place of production. The principals have informed me that this mode of purchasing has turned out eminently satisfactory.

The astonishing phase of purchases that are made of Canadian products through San Francisco and London, however, is that the charges for transportation apparently are no heavier than if the goods had been sent direct from Canada to Asia, although the aggregate mileage is very much greater via San Francisco and London than direct from the Canadian ports. But I am not prepared to say that the relative cost to the consumer in Asia is not greater, or that there is not a direct loss of profit to the Canadian producer.

## DEMAND FOR LEAD IN CHINA.

As I intimated in a previous report, there is a very great demand for lead in China. I have not been able to get an accurate return of the quantities of lead that are imported into Hong Kong, on account of the want of a convenient and systematic compilation of the imports. Hong Kong being a free port, no customs duties are chargeable upon any class of imports. But the fact is acknowledged that the annual importation of lead is very considerable, and the consignments are destined for the interior. This raw material finds its way into several classes of Chinese manufactures, but the larger proportion is undoubtedly utilized for the lining of tea chests for export.

## BETTER TRANSPORTATION FACILITIES OF AUSTRALIA.

The importations of this commodity from Australia to Hong Kong are already assuming large proportions. No doubt, this is due to the exceedingly favourable freight rates that are quoted by the steamship companies running from Australia to Asia. The favourable position that Australia occupies, however, is not exceptional in respect to lead. The freight rates from the Canadian coast are certainly prohibitive, so far as competition with Australia in lead is concerned. And this is not the only item wherein the Australian rates are more favourable to the expansion of Australian trade with Asia, than the freight rates from Canada are to the extension of Canadian trade with the East.

## CANADIAN FREIGHT RATES TRIPLE AUSTRALIAN.

In response to personal inquiries, one of the largest steamship lines in the East informed me a few days ago, that they contract to carry lead from Australia to Hong Kong for 15s. per long ton, 2,240 pounds. This is equivalent to about \$3.60 in Canadian currency. The best quotation that could be secured from the Canadian Pacific Steamship Company from Vancouver to Hong Kong, by an extensive commission house, the principal of which I had been endeavouring to persuade to import lead from British Columbia, was 40 cents, currency, per 100 pounds, the equivalent of \$8.96 per long ton, or nearly three times the rate that was available from Australia.

## RELATIVELY ADVANTAGEOUS POSITION OF CANADA.

Hong Kong is about the same distance from Vancouver, British Columbia and Sydney, New South Wales. The time occupied, however, in the journey between Sydney and Hong Kong is several days longer than between Vancouver and Hong Kong. On part of the journey from Sydney, steamships have to anchor at night, except when moonlight is very bright, on account of the dangers from widely distributed coral reefs along the eastern coast of Australia. Orders for lead, therefore, either by cable or letter, from Hong Kong to British Columbia, could be filled at least two or three weeks earlier than from Australia. But, as I have said elsewhere, the freight rates from Canada in this product render an expansion of trade, under present circumstances, quite impossible. The discrimination of five dollars per ton, in comparison with Australia, against the Canadian product, places the Dominion out of the market in China altogether.

## LUMBER FOR THE RAILWAYS IN CHINA.

I can fairly claim that my correspondence and personal interviews with the chief engineers of the railways under construction from Canton to the interior of China and also to the seaports, have not been without satisfactory results. Orders aggregating more than 2,000,000 feet, as a preliminary to greater possibilities, have already been cabled to British Columbia. The assurance has been given that if the consignments prove satisfactory, as I have no doubt they will, this will simply be the beginning of a business that will necessarily expand to hundreds of millions of feet of all kinds of lumber within the next ten years, as well as the creation of a permanent and constantly increasing market for many decades.

## FAVOURABLE FREIGHT RATES ABSOLUTELY NECESSARY.

In fact there is only one reason why, with this avenue open for Canadian lumber, the British Columbia mills should not be taxed to their fullest capacity for many years to come. That reason, as may be supposed, is the absolute necessity for favourable freight rates from the coast of British Columbia to Asiatic ports. It was possible to secure the particular order from the railway heads in Canton, to which refer-

ence appears in the preceding paragraph, on account of possible freight transportation outside of the ordinary channels. To have tried to sell British Columbia lumber upon the basis of the regular freight rates would have been quite out of the question. But an option being available elsewhere, the alternative was then given to the Canadian Pacific steamship service to accept the consignments and deliver the lumber at Canton at the competitive rate that was then in sight, or to retain their prohibitive rates and see the business go into other new channels. Wise counsels prevailed, and the Canadian line signed a contract to deliver the lumber at Canton for the same figure that was offered elsewhere.

This is about two-thirds of the rate upon which the company had previously insisted. If a reduction to even half the extent that was won in this case, had been effected two or three weeks earlier, so as to meet the then lower freight rates from Oregon, additional orders for two or three million feet of British Columbia lumber could have been secured.

#### DIFFICULTY EXPERIENCED WITH TRIAL CONSIGNMENT.

In view of my correspondence with the head of the company, representing the Imperial government of China Arsenal works in the vicinity of Shanghai, I embraced the opportunity on my return journey to Japan, to interview the distinguished official in question. The visit was decidedly opportune, viewed from the standpoint of securing information, but the information cannot be regarded as presenting a particularly pleasant aspect.

Some time previously the head of the construction department had consented to an order being given to British Columbia for a trial consignment of specially selected lumber. It was to be delivered at the Imperial Arsenal docks, c.i.f. charges, insurance and freight prepaid. The shipment was addressed to the works in question. The carriers were notified by the representative of the British Columbia lumber dealers when the arrangements were originally made, to deliver the shipment at the arsenal docks immediately on arrival. The bill of lading was attached to a draft that was sent through the bank for the full amount of the invoice. The official representing the government declined to pay the draft, plus the freight charges, which the carriers insisted should be paid before the consignment was delivered. Correspondence was produced to show that the government was entitled to the lumber, less the freight charges, and proving that the shippers in British Columbia were responsible for the payment of the freight. The representative of the Canadian lumber company was at Hong Kong, unconscious of the problems that had arisen about the question at Shanghai. A business-like cable, costing probably \$10, would have secured a satisfactory solution in a few hours. Instead of that the matter was hung up for several days with red-tape. In the meantime the charges for lighterage, the retention of the scows upon which the lumber had been unloaded from the steamship, began to assume alarming proportions. The lumber was finally handed over to the representatives of the Chinese government after a considerable proportion of the value of lumber had been eaten up with unnecessary expenses, as well as the creation of a spirit of resentment against Canadian trade methods.

In view of the fact that the Canadian Pacific Steamship Service made a special reduction in freight charges from the regular rates for this consignment, so as to secure an opening for Canadian lumber at the arsenal, the *denouement* is difficult to understand. I am hopeful that the totally uncalled-for unpleasantness may be smoothed over. The chief official at the arsenal assured me that they had not entered into a business transaction respecting which they had more confidently anticipated satisfactory results, and from which they had been given so much unnecessary trouble and annoyance.

## TIMBER CONSIGNMENTS FROM OREGON AT SHANGHAI.

A somewhat cursory examination of the lumber yards along the river banks at Shanghai, and a more careful examination of the late arrivals in port, revealed the fact that this is a favourable objective point for the shipment of large quantities of lumber from the United States. On the date of my recent visit to Shanghai, four vessels had just arrived with full cargoes of lumber from Oregon, valued at \$160,000. Three of these were steamships, and the other was a four-masted sailing ship. This lumber was being delivered at Shanghai at a freight rate of from 31s. 6d. to 32s. 6d. per thousand, equivalent to about \$7.75 currency, and the vessels were being unloaded within a stone's throw from the Shanghai docks.

The lumber from Canada, so far, has been unloaded on lighters or scows at Wosung—the mouth of the estuary upon which Shanghai is situated, and about fourteen miles from the city. The unloading on lighters at that point, and the towing charges to Shanghai, adds nearly \$1 per thousand to the freight charges on Canadian lumber to that port. At present the lowest rate that is quoted by the Canadian Pacific service on lumber from Vancouver to Shanghai is \$12.80 per thousand. Lumber is being delivered at Shanghai from the United States at a maximum freight rate of 32s. 6s., which is equivalent to about \$7.75 in currency. This works on as discriminating against the timber products of British Columbia to the extent of \$5 per thousand. It will be readily seen how effectively this closes the door against the expansion of Canadian trade in that direction.

## DIRECT REPRESENTATION FOR CANADIAN MANUFACTURERS.

While I will now outline the general policy that I propose to recommend shall be adopted, with a view of securing a reasonable share of the Asiatic trade for Canada, I may say that the time has gone by in the East when business can be satisfactorily conducted through general agencies, or by correspondence. As I have intimated in previous reports, it is necessary that more shall be done than can possibly fall within the sphere of the influence of government officials.

With the expansion of industrial life in Japan, there will be a large market for all kinds of Canadian labour-saving machinery. This, however, cannot be successfully introduced except by practical representatives, and by personal contact between the buyers and manufacturers. To attempt to do business through the ordinary channel of general commission agencies is to place confidence in a broken reed. Expectations of that nature are doomed to certain disappointment. The day of the so-called European commission agency in Japan is fast settling into a dim twilight.

W. T. R. PRESTON.

## BIRMINGHAM.

## REPORT OF TRADE COMMISSIONER.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,

BIRMINGHAM, ENG., May 26, 1908.

## CO-OPERATION IN POULTRY KEEPING.

The Board of Agriculture has issued a leaflet on co-operative egg and poultry societies which speaks of the benefit of such societies in a brief but pointed manner. It is realized in this country, that whatever success has been attained by continental

countries in poultry and egg production is due almost entirely to the co-operative system of collecting and realizing the produce. In Russia, France, Denmark and Italy, countries which do a large trade with Great Britain in these goods, co-operation is the basis of their prosperity. The adoption of this principle has enabled them to regulate supplies sent to market and to cheapen and facilitate the process of marketing.

An attempt is being made in Great Britain to adopt the co-operative principle; but one obstacle in the way is the deep-rooted aversion, which the British have, to the disclosure of what they consider to be their private affairs. The same aversion might probably prevent its adoption by Canadians. The National Poultry Organization Society is doing its best to eradicate this aversion, and to point out the advantages to be gained by a system of co-operation.

I know that a system of co-operation has been adopted by many of the fruit growing districts of Canada, and a system which has proved of such value to the above mentioned continental countries in the egg and poultry industry, should be worthy of consideration by all Canadian poultry keepers and egg producers.

#### GREAT BRITAIN'S EGG IMPORTS.

The following table will show the egg imports by Great Britain, and the various countries from which they are obtained:—

| Country.               | Period. | Quantity<br>Gt. Hundreds. | Value.     |
|------------------------|---------|---------------------------|------------|
| Russia. . . . .        | 1906    | 7,132,928                 | £2,344,256 |
| Denmark. . . . .       | 1906    | 3,823,943                 | 1,701,291  |
| Germany. . . . .       | 1906    | 2,644,242                 | 957,905    |
| Belgium. . . . .       | 1906    | 2,444,746                 | 992,103    |
| United States. . . . . | 1906    | 41,337                    | 16,585     |
| Canada. . . . .        | 1906    | 231,719                   | 106,393    |

Eggs were also imported from many other countries, but the above were the chief. The total imports for the above period were 18,874,859 Gt. Hundreds, valued at £7,098,122.

#### POULTRY IMPORTS.

The following table shows the value of Great Britain's poultry imports for 1906, together with some of the principal countries from which they were imported:—

|                        |          |
|------------------------|----------|
| Russia. . . . .        | £185,635 |
| Belgium. . . . .       | 194,978  |
| France. . . . .        | 203,714  |
| United States. . . . . | 243,750  |
| Canada. . . . .        | 13,424   |

The total imports amounted to £869,114. The above figures include both dead and alive poultry.

P. B. BALL.

#### NOTICE.

In connection with the preceding report the department would direct attention to the valuable information published in Monthly Report for March, 1905, page 1378, with reference to egg imports into Great Britain, especially from Denmark.

## AUSTRALASIA.

## REPORT OF TRADE COMMISSIONER FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, April 23, 1908.

## NEW ZEALAND'S TRADE WITH CANADA.

A general impression existed that the trade between the two Dominions was very small and stagnant. While the amount of the trade is not what it could be made, yet it is larger than is generally conceived, due to the fact that the trade returns of both New Zealand and Canada do not give an accurate statement of even the direct trade between the two countries. If this were not so, the return of exports from one country would be the same as the return of imports of the other. In 1906, while the New Zealand trade returns showed an export to Canada of £29,815, the Canadian trade returns showed imports from New Zealand of £62,071. The years are not quite concurrent, but if the inquiry be extended to the Canadian returns for a period ending March, 1907, which would be practically concurrent with the exports for the year 1906, the same results will follow. On the other hand, the import trade of New Zealand shows a larger amount of goods received from Canada than the export trade returns of Canada indicate.

This is due to so large a proportion of the trade between the two countries being done either through New York or London. The Canadian exporter supplies his goods to the agencies at these points where his accounts are paid, and accordingly he would naturally, in many cases, make the export entry in Canada as shipments to the United States or Great Britain. The New Zealand returns, therefore, are valuable as indications of the development or decline of the trade.

## SATISFACTORY IMPROVEMENT IN TRADE.

The Department of Customs was good enough to give me the returns of trade between Canada and New Zealand for 1907 in advance of the publication of the figures. Taking the years 1902, 1906 and 1907, the statements stand thus:—

|                             | 1902.   | 1906.    | 1907.    |
|-----------------------------|---------|----------|----------|
| Imports from Canada.. . . . | £52,374 | £157,088 | £206,536 |
| Exports to Canada.. . . .   | 7,366   | 29,815   | 78,015   |

In five years, therefore, these returns indicate a fairly satisfactory development; but it may be doubted if they do not indicate a development somewhat larger than has really taken place. Owing to the preferential tariff, the returns of 1906 and 1907 would more accurately give the Canadian origin of the imports than those of 1902. Still they show what is virtually the case—some improvement in the trade.

## POSSIBILITIES OF TRADE.

There was also an opinion that the two countries producing and exporting very much the same articles, could not have much interchange. Facts show this conclusion to be incorrect. The seasons of the two countries being opposite, the demand is created in the one for the products of the other, even, if at the producing season, the receiving country exports them. New Zealand has made a very considerable develop-

ment in its home industries. But it has, as yet, a small population, which will render it impossible to manufacture all the requirements of its people economically. Yet on the other hand, its people are prosperous, they have a large buying power.

That Canada is supplying but a small proportion of what New Zealand buys, and even of what it was hoped would come from Canada, need not be pointed out. New Zealand is not doing a very much larger proportion of the trade than it might do. It sends to Canada less than one-eighth of the butter that Canada imports, though New Zealand is famous for the high character of this product. Of the mutton that Canada purchases from other countries, it sends practically nothing. It sends but a trifling percentage of the provisions, and very little more of the wool, skins, and hides that Canada has to obtain abroad. On both sides, therefore, there is even now a field for extended development. Other lines are as yet untouched.

At Auckland I saw a store in which the stone used on the ornamental work of the building was quarried in Labrador, and when I was in Dunedin, at the other end of the Dominion, a steamer was loading stone for Vancouver. At that point I was asked for information of the possibilities of obtaining granite, slate and other building materials that were required in the young Dominion.

#### IMPROVEMENT IN BUSINESS METHODS.

It was very gratifying to learn on all sides that Canadian exporters had considerably improved their methods of packing and the details of conducting business. It was an exception to hear complaints of the character that I received in my previous tour of four years ago. Especially satisfactory was it to hear testimony as to the integrity of Canadian exporters. The head of one prominent firm, who had suffered some loss through a Canadian agent, said: 'I have reason to complain of the mistakes of Canadian firms, but in no instance have I had any reason for a suspicion of dishonesty.' I found similar opinions expressed by others. Such a character is an exceedingly valuable asset in business.

Much disappointment was expressed at the slow growth of trade between the two countries. On every hand I was told 'We will, where we can, give a preference to Canadian goods over foreign goods, if they can be obtained.'

#### INABILITY OF CANADIAN MANUFACTURERS.

This is mainly due, in so far as the exports from Canada are concerned, to the inability of Canadian manufacturers to accept orders, or to fill them promptly when accepted. This does not apply to all branches of the trade, but is general. I was given instances in which orders sent 15 months before were still unfilled. There are indications that the Canadian manufacturers are in a better position to do the trade now than they have been for some years past. Even where they could fill orders, the result of past disappointments will be to prevent large orders being given. It will take some time before the importers of New Zealand will have sufficient confidence in the ability of the Canadian manufacturer to supply their demands, before they will entrust very large orders to Canada. A disappointment in receiving his orders with fair promptness is a serious matter to a New Zealand business man, and hence he must have assurance that when given, they will be executed with reasonable promptitude.

#### SUGGESTED IMPROVEMENTS IN CABLING AND MAIL SERVICE.

Suggestions that might lead to an improvement in the trade of the two countries can be summed up under two heads—communication and transportation. It was claimed that a reduction in the cost of cabling would be a mutual advantage to the two countries. I ventured to state that Sir Sandford Fleming had pointed out that the method of accomplishing this was by the completion of the All Red Cable System.

Another requirement was the improvement of the mail service between Canada and New Zealand, and inquiries were made as to the prospects of what is known as the

'All-Red Fast Service,' between England, Canada and New Zealand. I had no further information as to this scheme than had appeared in the newspapers of the time, but was enabled to show that the line between Sydney and Vancouver had been very materially improved, and that it was probable at an early date, there would be still greater improvement in the speed and accommodation of the ships.

#### DEFECTIVE TRANSPORTATION HINDERS COMMERCIAL INTERCOURSE.

The chief hindrances to the extension of trade between the two countries lie in the defect in the transportation service between them. British Columbia buys at certain seasons butter and meats, which at these seasons are abundant in New Zealand. New Zealand exporters are not sharing in the trade, though they have the advantage of the preferential tariff.

A bi-monthly line of steamers runs between New Zealand and Vancouver directly, but they have no refrigerated space in which to carry these products. The export of perishable products from Canada to New Zealand is affected by the same lack of accommodation. That service has been badly conducted and imperfectly equipped. But as the line has recently passed into other hands, some hope is entertained of an improvement in this direction.

The manufacturers of Canada being almost wholly situated on the eastern side of the Dominion, their exports must go either via Vancouver, New York or London. They are also the consumers of wool, hides, skins, flax and other raw materials of New Zealand which would have to take the same course. Though the Canadian Pacific Railway and the mail line of steamers have always shown a deep interest in the extension of the trade between the two countries, the probability that but one-fifth of the trade is done over this route indicates the unlikelihood of its securing a much larger share of the freight. The route to London necessitates carrying the products over two sides of the triangle and paying the costs of transferring from one line of steamers to the other. The route to New York is objected to on account of the expense of doing business in New York city.

#### TRANSPORTATION EXPENSES OFFSET RECIPROCITY.

The head of a firm doing the leading business in its line, with houses in all the cities of New Zealand, stated that his experience had been that the value of the preference between the two countries was swallowed up in the cost of doing business through New York, and thus neither the exporters of Canada nor the importers of New Zealand received any advantage from the reciprocal agreement. Some other objections to doing business with that city were also communicated to me in harmony with the views presented in my report of March 16 last.

#### BRITISH LINE MIGHT VISIT CANADA.

Mr. Kent, a representative of the city of Bristol, was present at the meeting of the Chamber of Commerce in Wellington, and he suggested that the line of steamers plying between New Zealand and Bristol might send a monthly service to a Canadian port, discharging New Zealand cargo for Canada, and taking on Canadian cargo in return. This would be of considerable advantage and would prevent the necessity of re-handling goods, which are sometimes damaged in the transference from one steamer to another.

The details of our trade will be more appropriately considered when the returns of the trade of last year are to hand, but two or three articles can well be taken now.

#### CANADIAN MONOPOLY OF NEWS PAPER TRADE.

My first interview in connection with the paper trade was one of the largest consumers of paper in New Zealand. He condemned Canadian paper in very severe terms

and intimated that the publishers of New Zealand were going to throw up their contracts for Canadian paper and substitute British paper at a higher price. I found no other user who spoke of Canadian paper in such terms. The difficulty with this publisher lay in that he had obtained Canadian paper through a firm which took contracts, and supplied the paper of a Canadian mill which closed down. The contract was originally taken at very low figures, and no Canadian mill, I think, would care to supply good news at the price.

The users of paper of other Canadian mills were well satisfied, showing a very marked change in the quality of the paper, in the method of packing and shipping that has taken place in four years. So satisfied were they, that new contracts have just been entered into for large deliveries for some time ahead. If direct and regular transportation from the eastern Canadian mills could be secured, nearly the whole of the news trade of New Zealand must shortly fall to Canada. Paper should be re-handled as little as possible, otherwise there is danger of the cylinders losing shape and resulting in breakages when used in the fast printing presses.

#### HOPEFUL SIGNS IN TIMBER MARKET.

In my report for March, I gave some indications of the promising market for British Columbia timber. On the eastern side of New Zealand, I had inquiries respecting the timber trade. The Canadian mills are well represented. But there is a possibility that this trade may be for the moment overdone. A United States mill shipped a cargo of timber and it was sold at low figures. The purchaser is reported to have made a very great profit out of the transaction, which is likely to incite buyers to order supplies beyond immediate requirements. However, this will last but a short time. There is every indication that the timber trade will be a steadily increasing one. I had an opportunity to make a hasty run to the chief timber centres on the west coast. Mills are being erected which will speedily diminish the accessible timber supplies, and these when done, will increase the cost of local production very considerably.

#### SAWMILL SUPPLIES.

One purpose of my visit to the west coast, was to ascertain the prospects of Canada supplying sawmill outfits to a larger extent than at present. The government regulations of New Zealand only grant to any owner of a sawmill the right to hold 800 acres of timber lands when close to a railway, and 1,000 acres if further removed. As a result of this policy very small mills are erected; some of which do not cut much more than 5,000 ft. per day. This would prevent the erection of modern machinery, as such small requirements can frequently be met at home. There are one or two large mills proposed at an early date, where the company about to build has been able to purchase outright a very considerable area of timber land. There is a possibility that the plant for these mills may be obtained in Canada.

#### NEW ZEALAND BUYS FRUIT AND VEGETABLES.

New Zealand would take a considerable quantity of fruit and sometimes potatoes, were there facilities for carrying by direct steamer. One of the largest handlers of these lines of produce has written me, that as soon as such transportation is available, he will go largely into the trade. There is every prospect, however, of the New Zealand requirements being met by another firm which promises to go into the trade.

#### TINNED SALMON A CANADIAN MONOPOLY.

In the preferential tariff, Canada has the monopoly of the tinned salmon business. Unfortunately, one or two shipments of inferior salmon have been sent to New Zealand. I have not yet the evidence that it originated in Canada, though the receiver had every reason to think that it did. It was not sent directly by any canner or

representative of a cannery. One or two other incidents of somewhat similar character, render it advisable that the canners of British Columbia salmon should take steps, by some means, to preserve the character of Canadian exports of salmon. There would be a danger, that if inferior fish were sent to New Zealand, Canada might lose the advantage that she now enjoys in this country.

#### MARKET FOR BRITISH COLUMBIA SLATES.

I referred to a shipment of building stone from Dunedin for Vancouver. It is known as Oamaru stone, from the town near which it is quarried. When first raised it is exceedingly soft, and can be sawn almost as readily as timber. But on exposure to the atmosphere it rapidly hardens and continues to harden for some time. It is a beautiful cream colour and makes a handsome building stone. Its cellular texture unfortunately, however, makes it a lodgment for fungoid spores, which in moist climates rapidly germinate and discolour the building. There is a mineral pigment, I am advised, which can be applied to the stone, and which will both protect it from this growth and also preserve its colour.

I also referred to the demand in New Zealand for building stone from Canada, particularly for slates. There should be good supplies of this article in British Columbia, and if quarries of suitable material were opened, a market could be had in New Zealand as well as in Australia.

#### DROUGHT RESTRICTS BUTTER OUTPUT.

While not many signs of dullness, in trade were visible, yet it is evident that the year 1908 is not likely to show any increase in the exports and imports of New Zealand. New Zealand suffers from the reduction in the price of its principal products, as a result of drought and apprehension of industrial strife. But lowering the price of products would be a small evil were it unaccompanied by other consequences. The drought was mainly confined in its effect to the North Island. It seriously reduced the output of butter, so much so, indeed, that one of the factories had a shipment from London for home consumption returned. Good rains have fallen and grass is now abundant, but the output cannot be materially increased for some time to come.

The drought has had its advantages in enabling the land to be cleared more readily. New Zealand rarely suffers from absence of rain, and the dense growth of its bush and frequent rains, make it difficult to burn the timber and brush when clearing the land. In the past summer there were bush fires which in this way will be productive of good.

#### DISSATISFACTION WITH COMPULSORY ARBITRATION ACT.

One of the most serious difficulties threatening New Zealand is industrial trouble. It has been described as a land without strikes. This can no longer be truthfully said. There have been, in the past, a number of strikes which did not last long. But there is now a strike in a coal mine which has been continued for some time, and what is more serious, is the support given to the strikers, contrary to law, by the industrial unions in various parts of the country. It indicates not only unrest amongst the working people, but also a dissatisfaction with the working of compulsory arbitration. There is not the good feeling between employers and employees which existed prior to the passing of the legislation for the settlement of industrial disputes. New Zealand is realizing what was foretold of the results of this laudable attempt to settle strife. The law has haled employers and employees before a legal court as plaintiffs and defendants, yet whatever the decision, lawsuits do not commonly conduce to harmony in business relations. It is also transforming industrial troubles into political issues. The decision of many of the cases lies with the chairman appointed by the government, and when there is a dissatisfaction with his judgment, the government is held to be responsible for the appointment.

## WAGES AND COST OF LIVING INCREASED.

The act has increased the wages, but as the wages rose the cost of living was also increased, until the workmen assert that they are practically in no better condition than they were before compulsory arbitration came into force. The reduction in the price of products means the closing down of some industries or the reduction of wages, and the trade unions are in little humour at present to accept a reduction without the protest of a strike.

## EXTENSION IN AGRICULTURE AND DAIRYING.

While these things will check for the moment the prosperity of New Zealand, they are only temporary. There is much room for an extension in agriculture and dairying. The subdivision of the large estates, resulting in closer settlement, has been but partially done. Even the small farms are not managed as yet as not to admit of a great improvement in methods with resulting extension of their output. Drainage and better culture can do much for New Zealand.

Again, the problem of labour comes in, for it is contended, that at the present rate of wages, such improvements will not pay. Time will bring about the solution of this difficulty, and New Zealand in a year or two will recover from this reaction. In the meantime, as the credit of the traders is sound there is little likelihood that even under a temperate depression, they will be unable to meet payments on goods ordered.

J. S. LARKE.

## AUSTRALASIA.

## REPORT OF TRADE COMMISSIONER FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, May 12, 1908.

## TRADE OF NEW SOUTH WALES, 1907.

The Collector of Customs of New South Wales has again favoured me with an early return of the trade of this state for 1907. In order to afford comparison I append below similar figures for the years, 1905 and 1906. They are:—

|                   | 1905.       | 1906.       | 1907.       |
|-------------------|-------------|-------------|-------------|
| Imports.. . . . . | £14,485,123 | £17,603,503 | £20,860,391 |
| Exports.. . . . . | 24,493,530  | 30,987,132  | 32,894,073  |

The trade of 1906 showed a remarkable growth, but that of 1907 has exceeded it. The increase in 1907 is accentuated when the imports and exports of gold in the two years are taken into consideration. They are:—

|                   | 1906.      | 1907.      |
|-------------------|------------|------------|
| Imports.. . . . . | £1,680,778 | £1,243,606 |
| Exports.. . . . . | 6,056,954  | 2,689,679  |

It will thus be seen that the export of merchandise has increased by over £5,000,000 in the year. Though gold is a natural export of the state, the reduction in exports

was due, not so much to the decline in production, as the retention of it at home, where it has been used for developing the resources of the state. The trade of the state has more than doubled in 10 years.

The imports and exports from the principal countries were:—

| Countries.                     | IMPORTS.   |            | EXPORTS.   |            |
|--------------------------------|------------|------------|------------|------------|
|                                | 1906.      | 1907.      | 1906.      | 1907.      |
|                                | £          | £          | £          | £          |
| United Kingdom.....            | 10,047,928 | 12,474,736 | 12,174,155 | 13,687,977 |
| New Zealand.....               | 2,094,508  | 1,604,868  | 1,300,026  | 1,480,461  |
| Other British Possessions..... | 1,351,551  | 1,703,968  | 3,625,778  | 2,775,150  |
| Total British.....             | 13,493,987 | 15,783,572 | 17,099,959 | 17,943,588 |
| Belgium.....                   | 394,805    | 504,268    | 3,263,310  | 3,531,502  |
| France.....                    | 118,173    | 146,717    | 3,179,531  | 4,475,962  |
| Germany.....                   | 1,037,771  | 1,199,415  | 2,294,260  | 3,685,469  |
| United States.....             | 1,702,428  | 2,335,409  | 2,963,628  | 811,942    |
| Total, Foreign Countries.....  | 4,109,516  | 5,067,819  | 13,887,173 | 14,950,485 |

As in previous years, the increase in imports is divided between British and foreign countries, with an increase in some greater proportion from foreign countries.

#### EXPORTS AND IMPORTS TO CANADA.

The trade with Canada in 1905, 1906 and 1907 is stated as follows:—

|              | 1905.  | 1906.   | 1907.   |
|--------------|--------|---------|---------|
|              | £      | £       | £       |
| Imports..... | 73,443 | 150,132 | 200,173 |
| Exports..... | 41,459 | 723,308 | 105,893 |

The custom authorities have endeavoured to ascertain the country of origin of the imports into the Commonwealth. In this way they estimate the imports originating in Canada at £150,914. These figures are arrived at mainly by deducting the imports from the United States via Vancouver, which still leaves a large amount of imports from Canada via New York credited to the United States. As has been stated in previous reports, the Australian statistics of Canadian trade are very imperfect, and can only be taken as furnishing some means of judgment whether or not the trade is increasing or decreasing.

#### DETAILS OF NEW SOUTH WALES TRADE.

The following are the imports and exports between New South Wales and Canada for the years 1906 and 1907:—

##### IMPORTS FROM CANADA.

|                              | 1906. | 1907. |
|------------------------------|-------|-------|
|                              | £     | £     |
| Ammonia, carbonate of.....   | 30    | 110   |
| Animals, horses.....         | 3,351 | 3,498 |
| Apparel.....                 | 33    | 471   |

## INCREASE IN IMPORTS.

An examination of the figures given in this report will show some items of interest. The trade of New South Wales last year reached its high water mark. The great increase in the imports of its merchandise was due to some extent to the delay in the shipping of wool of 1906. In 1908 there will be no such delayed shipments. The reduction in the value of exports has been exceedingly great. For the first three months of the years 1907 and 1908 the exports of this state were as follows:—

|               |            |
|---------------|------------|
| 1907. . . . . | £9,506,754 |
| 1908. . . . . | 6,247,657  |

These figures show a reduction of £3,259,097, a decrease of more than one-third. This is largely due to the reduced quantity and value of the wool, wheat and flour exported.

Respecting the imports credited to Canada, there will be seen a number of lines, which, as in previous reports I have stated, originated in the United States. One item is apples, the whole of which, so far as I can ascertain, were of United States' origin. Some manufactured articles, cash registers, gas and oil engines are also of United States' origin, while drugs, medicines, hats and caps, phonographs, surgical and dental instruments and typewriters, belong largely to the United States. There are decreases in some of these lines as compared with the similar lines of 1906, but mainly they are the articles from the United States.

## AUSTRALIAN EXPORTS TO CANADA INCREASING.

Another item is the increase in the export trade of Australia to Canada. While the volume of the exports shows a remarkable decline as compared with 1906, this is of easy explanation. As will be seen amongst the exports of 1906 were £660,000 of specie gold, sent to the United States. Deducting this from the total exports will show that the export of merchandise to Canada has nearly doubled. The increases have been in cocoa, dried fruits and fresh, frozen mutton, cocoanut oil, hides, sugar, tin and wool, the leading products of Australia. This is gratifying because the increase in the exports to Canada will promote the increase of the imports from Canada, and will give Australia a higher regard for the trade between the two countries. It has in the past been so largely one-sided that it has not been appreciated here as the prospects would warrant.

## CANADA IS AUSTRALIA'S BEST RAISIN MARKET.

The quantity of raisins sent to Canada last year as shown in the statement of exports may come as a surprise to those in the trade in view of the statement in my report of last year, that the crop would leave very little for export. The explanation, I am advised, is that the western market of Canada was found to be so good, that raisins shipped to England were brought back to Australia and reshipped to Canada. The yield of this year is considered likely to be below that of the estimate, and as yet it is uncertain what amount can be sent to Canada.

A complaint is made of the failure of agents in Canada to reply to cables. At the prices quoted by letter, considerable trade could have been done this year, had the information been sent by cable, but failing to receive a sharp reply the fruit was sent elsewhere.

## BRITISH COLUMBIA APPLES EXPECTED.

As I have intimated, the apples credited to Canada originated in the United States. For some reason Canadian fruit men have failed to become interested in the best market for British Columbia apples. An Australian firm of experience and with wide connections has taken the matter up, and I believe that considerable shipments will be made from British Columbia this year, providing the fruit can be obtained.

The representative of the firm has already visited British Columbia and made arrangements for carrying on the trade. If successful, the trade will be done not only in Australia but in New Zealand.

#### PROTEST AGAINST BILL RESPECTING SALMON.

A bill was introduced into the parliament of New South Wales at the last session, one clause of which required that the tins containing salmon should have impressed upon them the name of the packer and the year in which they were packed. I advised the Packers' Association of British Columbia respecting this clause, and they have received very strong reasons why such a provision would be detrimental to the trade. The Sydney Chamber of Commerce has already moved in this matter and protested against the passage of such a provision. I have also taken it up with the government on behalf of the Canadian packers, and trust that the bill, which will be brought up later in the year, will be changed in accordance with the position taken.

#### FURNITURE POORLY WRAPPED.

Notwithstanding the improvement in packing goods for Australia, an occasional complaint of defective work is still heard. I was recently shown some office desks upon which a good deal of care had been taken in wrapping them with paper. Either the wrapping had been done before the varnish had completely dried, or else the varnish was of that character, that under the heat of transportation, had softened. As a consequence, the paper used had stuck, so that it was impossible to remove it without spoiling the finish. It was suggested that the use of a species of cheap oil paper would overcome this trouble. I have not the knowledge whether or not such paper is produced in Canada. Certainly, great care should be taken that the varnish is thoroughly hardened before the goods are packed, and a paper not likely to stick should be used.

#### IMPERIAL CHAMBERS OF COMMERCE AT SYDNEY.

A good deal of interest has been taken here over the meeting of the Imperial Chambers of Commerce which has been fixed to be held in Sydney in September, 1909. The governments are uniting with the Chambers of Commerce of Australia to give a fitting welcome to the representatives who may come from Great Britain and the colonies. It is also probable that New Zealand will extend an invitation to visit the new dominion. There is a general desire that there should be a large attendance from Canada, and it is probable that the date of opening the session will be fixed for September 14, enabling the Canadians to arrive by steamer from Vancouver a week before that date and, possibly, enabling them to visit sections of Queensland before coming to Sydney. The scheme so far mapped out means 12 days in New South Wales, including the sitting of the congress, six days each in Queensland, Victoria, South Australia and Western Australia, and five in Tasmania, with probably a longer time in New Zealand. The date, as fixed by the Sydney chamber, will not be suitable to Canada, and it is probable that it will be changed to September 14, as indicated above.

#### OPPORTUNITIES IN FRUIT, KAPOK, TAPIOCA AND RICE.

Owing to the direct communication between Java and Sydney, and the cheapness of transference from the steamers plying to these islands, and those running to Vancouver, it is believed that business could be done through Sydney in tropical products with Vancouver on better terms than these articles are now obtained there.

Among the lines indicated is kapok for filling cushions, pillows and mattresses. It is almost in universal use in Australia, about 3,000,000 pounds in weight being consumed for this purpose. It is packed in bales of about 80 lbs. with a standard tare of  $6\frac{1}{2}$  lbs. for the wrapper. A surveyor's certificate of weight and quality is furnished at the final shipping port. It can be delivered at Vancouver to-day at about  $5\frac{1}{2}$ d. per pound.

Another item is tapioca—seed, pearl, flake and flour. Seed, pearl and flake can be quoted at £14 per ton of 2,240 lbs. at Vancouver, and tapioca flour at £9 10s. per ton. A third item is rice, which uncleaned, can be quoted in Vancouver at £10 per ton of 2,240 lbs.

If any British Columbia firm desires to engage in this trade they will do well to communicate promptly with me. It will be necessary in all cases to have a letter of credit payable in Sydney for purchases.

J. S. LARKE.

## AUSTRALASIA.

REPORT OF TRADE COMMISSIONER FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA  
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING,  
MELBOURNE, May 11, 1908.

### THE AUSTRALIAN CUSTOMS TARIFF.

Both the Senate and House of Representatives are still engaged in the final revision of the Commonwealth tariff. An effort is being made to reach finality at an early date as the measure was introduced as far back as August, 1907.

Particulars of recent changes or amendments can be obtained by Canadian firms interested upon application to the Department of Trade and Commerce.

### THE VANCOUVER MAIL STEAMERS.

For weeks past it has been impossible to secure a berth, in any class, on the *Manuka* leaving Sydney to-day for Vancouver. Included in the cargo is a line of 1,500 cases of dried fruit, shipped from Melbourne to various Canadian points. The *Manuka* leaves port a full ship, and numbers of Australian business men, in some instances representing leading Canadian industries, are passengers. The *Marma*, leaving in June, has already a large portion of her passengers and cargo space reserved. The Canadian route is each year becoming more popular to through passengers either going to or returning from England.

### STEADY GROWTH OF AUSTRALIAN TRADE.

For the nine months ended on March 31, the customs and excise revenue of the Commonwealth amounted to £9,092,629, showing an increase over the corresponding period of last year, of £1,777,820. In all, the expansion in the revenue for nine months has been £1,902,962, which is in the main attributable to increased customs duties. The general condition of business throughout these states is regarded as sound, but without any marked animation. The position for agriculturalists and dairy farmers has improved considerably on account of the recent moderate rainfall. Agents and importers of Canadian goods advise a fair volume of orders going forward by this mail.

D. H. ROSS.

## BARBADOS.

## REPORT OF TRADE COMMISSIONER.

*(Mr. E. H. S. Flood.)*

BRIDGETOWN, May 31, 1908.

## NEED OF DYEING ESTABLISHMENT.

There is an excellent opening in Barbados for a dyeing and clothes cleaning establishment. As far as I can discover, no industry of this kind is to be found in Barbados or any of the northern islands. Some years ago, such a business was started, but it is reported that the equipment was so imperfect for turning out good work, that the business languished and was finally closed down. As the population of this and the neighbouring islands together amounts to about 400,000, it would seem that there is need for such an establishment, and that one properly equipped would be a success. This matter has been called to my attention by several persons interested. As Barbados has very easy and frequent communication with the neighbouring islands, parcels from these islands might be sent here for dyeing, and returned at a small cost and with reasonable despatch.

## OPENING FOR BRASS AND SILVER PLATING INDUSTRY.

The same opening that offers itself for a cloth dyeing establishment, also presents itself for a silver and brass plating industry. No such industry exists in Barbados or in any of the neighbouring islands, and it is necessary when important work is to be done in replating, to have the articles packed and sent to London. This is troublesome and expensive, and the cost for replating, under the control of a competent management, would find a good opening in Barbados.

## OPPORTUNITY FOR CANADIAN PIANO MANUFACTURERS.

The English and German manufacturers of pianos, have had for many years a monopoly of the West Indian trade. But United States manufacturers have recently given this matter more attention and are beginning to obtain a share of the business. The United States pianos are from a medium to cheaper grade, whereas the foreign makes are rather a higher grade. Pianos made by Broadwood and Bechstein are seen in many of the best houses, and are used generally by the musician. As so many excellent pianos are now being made in Canada, the Canadian manufacturers should make an effort to establish agencies here, and have their pianos introduced.

## PIANOS ARE OF PECULIAR CONSTRUCTION.

Musical instruments which come to the tropics are generally supposed to be constructed to suit the climate. One difference to be observed is in the manufacture of the keyboard. Instead of the ivory touch, a celluloid one is substituted. The celluloid is put on in one piece and bent over the front without a lip, the edge is being slightly bevelled. When the celluloid touch is glued on, it is pinned with two brass pins at the bottom of the front, and one at the rear end of the touch. Ivory keys, it is said, put on in the usual way, are likely to come off owing to the heat and moisture of the climate.

A slight difference is also noticeable in the construction of the case, which is in some pianos strengthened by brass screws or corner plates, at points where extra strength is required or unglueing might take place. The action also seems to receive some attention for this climate, as the brushing appears to be freer than is required in the north. Tight bushing would inevitably result in the piano action sticking.

The import of pianos into these islands for 1906-7 amounted to probably over \$50,000. The list of imports given below does not include all the islands, but will

indicate the amount of and the value of, the annual business. These imports will tend to increase yearly:—

## IMPORTS OF PIANOS, 1906-7.

E. H. S. FLOOD.

## LEEDS AND HULL.

## REPORT OF TRADE COMMISSIONER.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE AGENCY.

EAST PARADE, LEEDS, ENG., June 2, 1908.

## HEAVY ENGLISH APPLE CROP ANTICIPATED.

Judging by the present outlook there is every indication of a good all round crop of fruit in England this season; in fact, in the opinion of some, it will not be far short of a record one. Not for many years have the trees been known to be so full of bloom. The prospects for apples and pears are exceedingly bright, especially in the counties of Somerset and Devonshire, and, with the possible exception of gooseberries (of which there is likely to be only half a crop) all other kinds of fruit look wonderfully well.

In certain parts of the country, however, caterpillars are already in evidence, especially in Kent and Cambridgeshire, and should these multiply to any great extent, there is no telling what effect it may eventually have. The fact that there has been very little frost since the trees began to bloom, however, has helped matters forward considerably. The fine spring weather which is now being experienced, will, in the opinion of the best judges, result in a crop at the usual time, and not later on in the year as was at first expected, although it is said that the later apples will turn out to be the best fruit. This, of course, will be to the advantage of Canadian growers, in as much as the supplies of English grown varieties will be falling off by the time the first arrivals of Canadian fruit reach this country. It is also worthy of note that according to creditable reports which have reached this district, there is every prospect of equally as good crops this season in the chief fruit-growing centres on the continent.

## CANADIAN APPLES ARE FAVOURITES.

Canadian apples are unanimously given the first place as the best selling fruit on the British market to-day, and it behooves our growers to let nothing injure their fame—a fame, which, it must be remembered has taken years to achieve, a fame too, that has enabled them to become associated with and sold under the name of ‘Canadian’ and not ‘American.’ This fact applies to few other lines of produce received

from the Dominion to-day, although there is a growing tendency both among dealers and the buying public to discriminate between produce from Canada and the United States, and to give to the former its just and full title of 'Canadian.'

Signs are not wanting, however, to show that keener competition will have to be faced in the near future from other fruit growing sources. Already Australia, South Africa and Tasmania have made creditable headway in shipping fruit to this country, and some idea of the assiduous care taken by their growers to ensure safe delivery can be gathered from the following, which appears on a slip enclosed in each box of fruit sent here by a Tasmania shipper.

'NOTICE TO PURCHASER.

'The fruit contained in this case was specially packed under the supervision of ....., who would much appreciate any comments the buyer may find time to send him relative to the particular case from which this circular is taken..... (shipper) is particularly desirous of ascertaining whether the fruit reaches the consumer in good condition or whether it is bruised, decayed, or in any other way not up to expectations..... Any suggestions that you care to give that would remedy any defect, if such should exist, or that would do anything to give greater satisfaction to buyers would be very much esteemed, as it is the packers' object to establish a special reputation for this brand.'

HULL AS AN EUROPEAN FRUIT CENTRE.

There is still plenty of scope for further developing a direct trade with Hull, where the port charges and other expenses are materially lower than at most other English ports. The fine geological position of this, the third port in Great Britain, makes it not only a good distributing centre for Yorkshire and other thickly-populated counties in the north of England, but also an excellent point for the export of 'hard' fruit to Scandinavia and north Europe generally. Indeed a large quantity of Canadian apples already find their way to these countries by this route.

Some idea of the importance of Hull as a fruit centre can be gathered from the fact that no less than 80 vessels have been known to land 'soft' fruit here from the continent in one week. To Hull come buyers from Leeds, Sheffield, Bradford, Halifax, Newcastle-on-Tyne, Derby, Nottingham, and all the chief towns in the north of England. Although, during the past two years, a decided improvement has taken place in the direct shipments of apples from Canada to this port, Australian exporters, too, have begun to realize its possibilities, and are making efforts to develop their fruit and other trades.

GOOD FRUIT BRINGS GOOD PRICES.

The object of this report is to show Canadian shippers fully the position of the market here, and the opportunities that await them this season. Should any growers be desirous of forming connections with merchant firms here, I shall be pleased to place them in communication with responsible houses in this district. As was the case last year, a number of buyers will also be leaving this district for the Canadian fruit-growing centres in the course of a few weeks' time, and growers who wish to open up trade relations with them are cordially invited to send their addresses to this office, together with particulars as to their facilities for export, which, in turn, will be handed on to these buyers for reference before they leave this country for the Dominion.

WARNING AGAINST POOR PACKING AND GRADING.

It is, perhaps, hardly necessary to say that Canadian growers should make every effort this year to redeem themselves for the unsatisfactory state of some of the shipments sent here during the past season. The experience of the average English buyer has taught him to associate Canadian apples with all that is good in quality, packing and grading, and he is ready and willing at all times to pay good money for such fruit.

It therefore rests with Canadian exporters to see that the appreciation he has formed has not been a vain one.

#### REQUIREMENTS IN SHIPPING HONEY.

As it would appear that my previous report (Monthly Report for March, 1908, page 2132) respecting the openings that occur for introducing Canadian honey has created some interest in the possibilities of this trade, a few further particulars respecting the market position here should be of interest. During the past month a firm of importers in Manchester was quoting buyers from 17s. to 26s. per cwt. for Jamaican honey, packed in kegs holding about  $1\frac{1}{2}$  cwts., and also in casks varying in weight from  $1\frac{1}{4}$  to 5 cwts. Fine 'Clover' from New Zealand, however, was being sold by the importers at as high a price as 42s. per cwt., this being packed in 56-lb tins, i.e., two tins to the cwt.

For manufacturing purposes honey must be of good quality and flavour, and at a low price to tempt buyers. And further, Canadian producers should specially guard against one thing—fermentation, a drawback common to both English and foreign varieties, due, it is suggested, to the honey being taken from the combs before the allotted time has elapsed for the heat of the hive to ripen it. As to style of package, barrels or casks are always to be recommended in preference to tin, as honey is said to keep much better when packed in wood.

#### BEE-KEEPING APPLIANCES REQUIRED.

In addition to the actual trade to be done in honey, it might also be of interest to know that opportunities occur for introducing up-to-date 'makes' of beehives and other appliances and requisites generally used by bee-keepers. At the present time a number of specialties of this kind are being sent here by United States manufacturers, and should Canadian makers be seeking an export business in these goods also, I shall be pleased to receive their catalogues or lists for transmission to interested parties.

JNO. B. JACKSON.

### MANCHESTER.

#### REPORT OF TRADE COMMISSIONER.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, June 2, 1908.

Estimate of the stock of provisions, &c., in the port of Liverpool, on May 30, 1908; together with the figures at the corresponding date last year, and also of last month.

## CITY TRADE BRANCH.

REPORT BY CANADIAN REPRESENTATIVE.

*(Mr. Harrison Watson.)*

73 BASINGHALL STREET,

LONDON, E.C., ENG., May 31, 1908.

## FRUIT CROP PROSPECTS IN ENGLAND.

In spite of the cold and backward spring which has been experienced all over the United Kingdom, reports affirm that fruit trees and shrubs, as a rule, escaped serious damage, and from present appearances there is every indication of large yields, although it is at the moment too soon to make any reliable forecast, save in the case of such fruits as mature early. The writer was informed by a leading authority that a heavy crop of strawberries is assured. Apples have blossomed luxuriantly and seem to be setting well, but some weeks must elapse before anything definite can be arrived at regarding the prospective crop.

## LITTLE DEMAND FOR FOREIGN FRUIT PULPS.

Raspberries are a fruit that interest Canadian growers, because considerable quantities of raspberry pulp are imported into this market for the use of jam makers. Supplies come mainly from Australasia, which has the advantage over Canada in so far that the raspberry crop ripens at a time when the nature of the demand in the United Kingdom is fully known, whereas the maturity of the Canadian raspberry crop practically coincides with that of the United Kingdom. It is, therefore, impossible to inform Canadian growers in advance regarding prospects and prices.

The writer has, however, consulted several large importers of fruit pulps of various kinds, and learns that although the market has been dull, considerable quantities of Tasmanian raspberry pulp have been disposed of, both for spot and forward delivery, at about £25 to £26 per ton delivered. Should the English and continental crops be good there would not be much opening for imported pulp, and prices would consequently recede to a figure which would offer no attraction to the Canadian shipper.

As regards black currants, the demand has been slow, and £22 per ton ex-store, London, has been accepted by merchants. Apricot pulp, for which the greatest demand of all exists, is not at present produced in the Dominion, and whereas apples in various forms of pulp are usually in demand by jam makers, nothing is known of the prospects at the moment. One large importer states that, according to his experience, pulp put up in square tins, holding from 15 to 20 pounds, packed four in a case, travels best and is the most ready marketable.

The consensus of opinion, however, points to a heavy fruit yield both in the United Kingdom and on the continent, in which case imported pulps would be hardly required at all, at least not until next winter.

## EGYPT REQUIRES CANADIAN PRODUCE.

A firm of general commission merchants, Messrs. Ludwig Raudnitz, Bihs & Co., Alexandria, Egypt, having written to us inquiring about some Canadian matter, I suggested, when replying, that if they would enumerate any Canadian goods for which, in their opinion, there exists an opening in Egypt, I would bring the matter to the attention of Canadian packers and shippers. The firm has now written, stating that

there is a considerable trade done in various varieties of canned meats, fruits, and also fish, particularly lobsters, and in their opinion, a large sale could be created for these and other alimentary articles produced in Canada if business were conducted direct, without the intervention of the middleman. Americans, who at present do the bulk of the trade, ship direct to their representatives in Egypt. These attend to the distribution, and supplies from other markets, now reaching Egypt through middlemen, are saddled with intermediate charges which handicap them greatly in the competition with United States goods.

#### UNCERTAINTY REGARDING FRANCO-CANADIAN TREATY.

We continue to receive frequent applications for information regarding various points in the new French treaty, and several business men have stated that the delay in the ratification of the convention is causing much inconvenience and uncertainty.

It appears to be generally understood that Switzerland will enjoy the advantages of the convention, and consequently there have been a considerable number of inquiries, not only as to the status of Swiss goods, but regarding the channels of transportation which will have to be adopted, in order to ensure tariff reductions for Swiss manufactures and products imported into the Dominion.

HARRISON WATSON.

#### SWEDEN, NORWAY AND DENMARK.

##### REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, GAUBEGD, No. 4, June 3, 1908.

##### THE NEW DANISH CUSTOMS TARIFF.

I mentioned in my report for May that Denmark is to have a new customs tariff. The law, which has recently passed through the different stages and finally accepted, will come in force on January 1, 1909, marks a compromise between the ultra-free traders and the protectionists.

As regards the financial consequences of the change in the tariff, it is stated, that the real customs revenue have for the five year period, 1902-1906, amounted to, on an average, not far from \$10,000,000 annually. If the rates of the new tariff had been carried on the import quantities for the above period, it would show in all a deficit in the revenue of about \$2,000,000. But this, it is believed, will be neutralized partly through an increase in the inheritance tax, and partly through a tax on spirits used in the distillation of wines, &c., or as an admixture to drinkables containing spirits. Further, it is proposed to increase the tax on playing cards. As soon as the new tariff is obtainable, I shall give a detailed statement of the changes.

##### OLEOMARGARINE INDUSTRY IN SWEDEN, 1907.

The margarine industry of Sweden is steadily increasing and the production now exceeds the consumption of the country itself. As a consequence, the Swedish margarine factories have been obliged to seek a market in foreign countries. The margarine export of this product from Sweden, which five years ago amounted to 184,000 pounds, in 1906 had risen to nearly 1,400,000 pounds, and in 1907 to about 2,500,000 pounds. The import at the same time only totalled about 9,000 pounds.

## UTILIZATION OF PEAT FOR INDUSTRIAL PURPOSES.

After a longer experiment with a smaller plant, the Visby Cement Factory has recently ordered 1,500 h.p. peat gas machinery from the engineering firm of Fritz-Egnell for their large new plant. Peat gas was first used at Skabersjö Electrical Works, and after five years use has proved both economical and satisfactory. The utilization of peat for industrial purposes seems no longer to be attended by difficulties.

## NORWEGIAN GRAIN MARKET UNSETTLED.

From the weekly report of Bjolsen Mills, the largest Norwegian flour mill, I quote the following, as it may interest Canadian grain and flour shippers. As the already very small stock of grain shrink day by day, the market seems to become more and more nervous, and the good prospects for the coming harvest have not as yet been able to reduce the prices; in fact they may be said to have gone up something in the course of the week just passed. To this is added the intelligence that it is now quite certain that we will get a late harvest, which in this country is always attended by considerable risk. Of the foreign bourses, the American is especially worthy of attention. These steady and even rises lead to the fear, that the difficulty of the position will be made use of by speculative interests. What that might lead to is consequently, quite impossible to calculate.

## COST OF PRODUCING WOOD PULP INCREASED.

About the Norwegian wood pulp market, the Norwegian trade-paper *Farmand*, writes in one of its May editions:—

‘All branches of this trade, viz., mechanical wood pulp, sulphite and sulphate cellulose, are at present very quiet, but quotations remain practically unchanged. We have made special inquiries this week as to the position of sulphate cellulose, and we have been rather surprised at the result, for we find that the value has been better maintained than we had expected, considering the largely increased output. Although recent sales of cellulose may have been done occasionally at fractional reductions from top prices, buyers should not lose sight of the fact, that the cost of production has risen so much in the course of the last two or three years, that a few shillings’ reduction in selling prices may be sufficient to change the appearance of the balance sheet of most mills materially. And this fact will, when it becomes more generally known in the producing countries, put a stop to the establishment of new mills.’

C. E. SONTUM.

## BIRMINGHAM.

## REPORT OF TRADE COMMISSIONER.

(Mr. P. B. Ball.)

CENTRAL HOUSE, June 9, 1908.

## WOOL-CLIP IN GREAT BRITAIN.

The approaching clip of wool in Great Britain is generally reported to be of a high standard of quality as to the strength and durability of the staple, and of above the average weight per fleece. There are differences of opinion as to the basis of prices, but there seems to be general agreement that this season’s prices will show a considerable decline on the rates of last season, and it is believed that the total selling

value of this year's yield in the United Kingdom will show a reduction of at least three or four millions sterling.

According to the transactions and the prices now offering by dealers for well-grown lots, the decline will reach no less than from 10s. to 15s. per tod of 28 lbs. This is the greatest decline experienced for many years. In addition very great uncertainty and distrust have been created by the artificial holding back of large quantities of New Zealand and other colonial wools which come most directly into competition with English produce.

#### IMPROVEMENTS IN WOOL HARVESTING NECESSARY.

After a disastrous year and heavy losses to all wool users through a variety of causes, the Home Wool Buyers' Association are now insisting that the time has arrived when there should be a great improvement in wool harvesting methods. Wool buyers and dealers have been urging upon sheep rearers the great importance of thoroughly cleansing the wool and preparing the fleeces for market. No matter what the prices may be, dealers have a decided objection to paying for clay and foreign matter adhering to fleeces through faulty washing and preparation, and a very strong movement is on foot to heavily penalize unwashed, faulty, and inferior lots. Wool discoloured in washing, or deteriorated in appearance and value through being clipped in a damp state, or through having particles of grass, straw, chaff, or vegetable matter adhering involve great trouble and expense to the buyer.

#### MANIPULATION OF OLD WOOLLEN FABRICS.

There also seems to be another factor of great importance to the woollen industries. They are no longer dependent upon the reduction of a single season's wool. Old woollen fabrics and garments can be so manipulated that very little new raw material is necessary in order to produce certain low grades of yarns that are soft and durable. In addition to this French, Belgian and German spinners are producing yarns which have all the softness of wool, and which to the eye and touch have all the semblance of wool, though composed of from 30 per cent to 60 per cent cotton. There is a continually expanding consumption of these yarns in the manufacture of low-priced fabrics. Under these circumstances buyers are, therefore, very cautious, and for good half-hogg and ewe lots of long wools the rates offering are from 13s. to 16s. per tod of 28 lbs., but owners decline to sell at these very low prices. The finest soft short fleeces make about 1s. per tod more, but for cross-bred Scotch fleeces only 10s. to 11s. per tod is offered, and for ordinary Scotch wool the prices are even lower.

P. B. BALL.

### NEWFOUNDLAND.

#### REPORT OF TRADE COMMISSIONER.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, NFLD., June 16, 1903.

#### COD-FISHERY.

The fishery season has opened here this year under very favourable conditions, and earlier than usual. Reports are coming in from points all around the coast of good catches being made, and although it is too early to predict the final results of the voyage it is expected that it will turn out at least an average one. The price,

however, is likely to be lower than it was last year for the new fish, but still one that will be quite remunerative to the fishermen.

#### PEAT FUEL.

The efforts that have already been made in Canada to develop this industry, and the reported intention of the Dominion government to shortly institute exhaustive experiments at Ottawa as to the best and most economical methods of dealing with this material, of which there are very extensive deposits in this colony, are being watched with a great deal of interest by many here. The large increase in the cost of coal, both bituminous as well as anthracite, in recent years to figures that are now almost prohibitive, as well as the growing scarcity in the supply of wood at many of the outports, has rendered a solution of the question of the practical utility of peat as an alternative source of fuel supply one of very great importance, and it is hoped that it will be found possible to make use at reasonable cost of these natural fuel deposits.

#### NEW FISH INDUSTRY.

An interesting experiment is about to be inaugurated in this colony very shortly in an attempt to transport salmon alive from the Labrador coast to Scotland. The work is to be carried on under the supervision of Mr. E. G. Gibb, of Bervie, Kin-cardineshire, Scotland, who has arrived here with a steam yacht fully fitted up for the purpose. The base of operations at first will be at a place called Sandwich Bay on the Labrador coast. The vessel, which is named *Cornelia*, is what is called a 'well boat' such as are used extensively in the Welsh and Scotch fisheries.

By keeping the tanks with which the steamer is fitted, as well as the four boats which will be used for taking the fish from the nets, constantly supplied with fresh sea water by means of suitable pumps, it is expected that the fish can be safely landed at Oban on the west coast of Scotland at a cost that will make the venture a remunerative one. The capacity of the tanks on the steamer will provide for 30 to 40 tons of fish, and it is expected to be able to make three trips across the Atlantic during the season.

E. D. ARNAUD.

#### SOUTH AFRICA.

##### REPORT OF COMMERCIAL AGENT.

(*Mr. John A. Chesley.*)

RHODES BUILDING, CAPE TOWN, May 22, 1908.

##### FLOUR, WHEATEN.

There was imported into British South Africa during the year ended December 31, 1907, 149,850,092 lbs. of flour, valued at £619,770 sterling, (\$3,098,850). The following statement shows the countries whence this flour was imported, and the quantities obtained from each during the year. Also the quantity and value of flour, the countries from whence imported and the quantities obtained from each during the year ended December 31, 1906:—

|                          | 1906.       |         | 1907.       |         |
|--------------------------|-------------|---------|-------------|---------|
|                          | Quantity.   | Value.  | Quantity.   | Value.  |
|                          | Lbs.        | £       | Lbs.        | £       |
| Australia .....          | 95,887,102  | 369,726 | 94,324,031  | 370,251 |
| Canada .....             | 26,250,439  | 125,857 | 38,720,000  | 178,948 |
| United States .....      | 39,969,968  | 190,754 | 14,273,451  | 61,736  |
| Argentine Republic ..... | 912,572     | 3,037   | 2,176,473   | 6,891   |
| Other Countries.....     | 353,595     | 2,030   | 356,137     | 1,944   |
| Total.....               | 163,372,776 | 691,404 | 149,850,092 | 619,770 |

It will be seen from the above figures that the imports of flour into British South Africa for the year 1907, were 13,522,684 lbs., less than the imports for the year 1906, and the value £71,634 less than the value for 1906. Although the total imports of flour have fallen from 163,372,776 lbs. in 1906, to 149,850,092 lbs. in 1907, a decrease in quantity of 13,522,684 lbs., and a decrease in value of £71,634, it is gratifying to note that the imports from Canada have risen from 26,250,439 lbs. in 1906, to 38,720,000 lbs. in 1907, an increase in quantity during the year of 12,469,561 lbs. and an increase in value of £53,091.

#### FLOUR DUTY.

The duty on flour imported into British South Africa is 2s. 6d. per 100 lbs. But under the preferential tariff there is a rebate of 3d. per 100 lbs. to the United Kingdom, and reciprocating British colonies. This preference of 3d. per 100 lbs., which is equal to 12 cents per barrel, is very useful especially in competing against American and Argentine flour.

#### HIGH GRADE FLOUR.

There is a considerable market in South Africa for high grade flour, manufactured from the hard wheat grown in northwestern Canada. If the quality of this flour is fully maintained, the demand for it will steadily increase, as it appears to be rapidly growing in favour with consumers.

#### LARGE MARKET.

There is also a very large market here for the cheaper grades of Canadian flour, suitable for bakers' use, which could easily take the place of some of the flours imported from other countries for that purpose. Canadian flour has an excellent reputation throughout South Africa, and, to increase the export, it is only necessary to supply the different qualities required by the trade at a price that will meet the competition from other countries.

If Canadian millers and exporters would give due consideration to the question of supplying this market with a fairly good article of flour at a reasonable price, the conditions of the trade here are such, that the export of Canadian flour to this country would in a very short time be largely increased.

#### AUSTRALIAN FLOUR.

The Australian flour imported into British South Africa is manufactured from the soft white wheat grown in that country, and sells in this market from 1s. 9d. to 2s. per bag of 100 lbs.; less than Canadian flour.

It is very largely used by bakers, but in order to make a good quality of bread therefrom, it must be blended with Canadian flour, manufactured from Canadian hard wheat. Under these conditions it seems possible for Canadian millers, from some of the many brands of flour manufactured in Canada, to select one or more that would be suitable for bakers' use, without the necessity of blending, and at a price that would meet the requirements of the trade, and so secure a larger share of the South African market for what is known as bakers' flour.

JOHN A. CHESLEY.

# NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

## ADEN.

TABLE OF IMPORT DUTIES—ENTERED INTO FORCE ON APRIL 1, 1907.

*Bombay Government Gazette of February 7, 1907.*

| Goods.                                                                                                                                             | Rate of duty.<br>Rs. a. p.                                                                                                                                  |

- (23) Greater Bustard.

## AUSTRALIA.

DEPARTMENT OF TRADE AND CUSTOMS,  
MELBOURNE, June, 1908.

The rates of duty and wording of items shown in this tariff are the rates and wordings now in force, being those finally passed by parliament.

The various alterations or amendments made during the passage of the tariff through parliament and which for the time being were legally in operation, have not been shown in order to prevent confusion of misapprehension.

## THE CUSTOMS TARIFF.

All limitations to be dutiable at the rate chargeable on the goods they imitate, unless such rate is less than the rate which would otherwise be chargeable on the imitations.

‘Proof’ or ‘proof spirit’ means spirit of a strength equal to that of pure ethyl alcohol compounded with distilled water so that the resultant mixture at a temperature of 60 degrees Fahrenheit has a specific gravity of 0.9198 as compared with that of distilled water at the same temperature.

The term ‘iron’ includes steel.

'Wool' or 'woollen' includes all manufactures of wool or hair or combinations thereof.

'N.E.I.' means 'not elsewhere included.'

'Departmental by-law' means by-law made by the minister, and published in the *Gazette*.

Any article, not otherwise dutiable, composed of a combination of other articles, some of which are dutiable when imported separately, and of others free of duty when imported separately, shall be dealt with as follows:—

(a) When the value of the dutiable portion exceeds the value of the free portion, duty shall be charged upon the whole article at the same rate as would be chargeable on that portion of the dutiable portion which, if imported separately, would be liable to the highest rate of duty.

(b) When the value of the free portion exceeds the value of the dutiable portion of such article, the whole article shall be admitted free of duty.

## IMPORT DUTIES.

| Tariff Items.                                                                                                                                                                                                                                                     | General Tariff.     | Tariff on Goods the Produce or Manufacture of the United Kingdom. |

| (b) Instruments made of glass for measuring the density of liquids solids and gases; including hydrometers, saccharometers, lactometers, salinometers, and barometers.....                                                                                                                                                                                                                                                                                                                | 20 p.c.         | 15 p.c.                                                                       |
| (c) Barographs; calorimeters; cathetometers; dividing engines for graduating bars, tubes, and circles; kymographs, and time markers; dial micrometers; microtomes; pyrometers; spherometers; thermographs; thermostats; thermoregulators; microscopical, mineralogical, and blow pipe cabinets (fitted); mercury vacuum pumps; vacuum gauges, viscosimeters; vacuum ovens for laboratories; drawing, mathematical, and surveying instruments.....                                         | Free            |                                                                               |
| (d) Bacteriological apparatus; including counting apparatus, culture dishes, flasks and tubes, slide cabinets and trays, staining dishes and plates, stains, incubators.....                                                                                                                                                                                                                                                                                                              | Free            |                                                                               |
| (e) Scientific instruments for measuring absorption, dispersion, intensity, reflection, refraction, and rotation of light, and for colour analysis and colour comparison.....                                                                                                                                                                                                                                                                                                             | Free            |                                                                               |
| (f) Apparatus for the testing and analysis of milk, wine, and other agricultural products, as prescribed by departmental by-laws.....                                                                                                                                                                                                                                                                                                                                                     | Free            |                                                                               |
| 449. Ophthalmic instruments and appliances; including cases of trial lenses; caustic holders; demonstrating apparatus; eye douches, electro-magnets; eye compresses; eye guards; ophthalmic lamps; ligature bottles and troughs; ophthalmoscopes; optometers; perimeters; pupillometers; sterilizing apparatus for solutions; operation tables; temperature regulator; test types; tests for colour vision; trial cases; trial drums; trial frames; dressing trays; instrument trays..... | Free            |                                                                               |
| 450. Outside packages, n.e.i., including the sole containing package, in which goods are ordinarily imported, when containing such goods.....                                                                                                                                                                                                                                                                                                                                             | Free            |                                                                               |

## BAHAMAS.

## 8 EDWARD VII., CHAPTER 3.

An Act to grant certain duties of customs revenue on goods, wares and merchandise imported into, and exported out of, the Colony.

(Assented to 8th June 1908.)

MOST GRACIOUS SOVEREIGN,

We, Your Majesty's most dutiful and loyal subjects, the House of Assembly, of the Bahama Islands in General Assembly, have freely and voluntarily resolved to give and grant unto Your Majesty the several duties of customs hereinafter mentioned; and do therefore most humbly beseech Your Majesty that it may be enacted; and be it enacted by His Excellency Sir William Grey-Wilson, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief in and over the Bahama Islands, the Legislative Council and Assembly of the said Islands, and it is hereby enacted and ordained by the authority of the same as follows:—

1. This Act may be cited as The Tariff Act, 1908.

2. From and after the coming into operation of this Act there shall be charged, levied, collected and paid unto His Majesty The King, His Heirs and Successors, for the use and support of the Colony, the several duties of Customs respectively inserted, described, and set forth in the First and Second Schedules to this Act:—

(a) Upon goods, wares and merchandise imported into the Colony or taken out of Bond for consumption therein, the duties set forth in the First Schedules to this Act;

(b) Upon goods, wares and merchandise imported into the Colony or taken out of Bond for consumption therein and not enumerated in the First and Third Schedules to this Act, and not exempted from payment of duty by any Act, an *ad valorem* duty of twenty per centum;

(c) Upon goods, wares and merchandise exported out of the Colony, the duties set forth in the Second Schedule to this Act.

3. The goods, wares and merchandise enumerated, described or referred to in the Third Schedule to this Act shall and may be imported into the Colony free of duty.

4. The goods, wares and merchandise enumerated, described or referred to in the Fourth Schedule to this Act shall not be imported into the Colony, and any such goods, wares and merchandise so imported shall thereupon and thereby become forfeited to the Sovereign and shall be destroyed or otherwise disposed of as the Governor in Council may direct; and any person knowingly importing any such prohibited goods, wares and merchandise, or knowingly causing or permitting them to be imported, or being a party to the importation thereof, shall, for each offence, incur a penalty not exceeding two hundred pounds.

5. Goods, wares and merchandise liable to *ad valorem* duty under this Act when not originally shipped with the intention of being brought into the Colony, but subsequently imported, and when the requisite information for perfect entry of the same cannot be ascertained or obtained, shall, in lieu of such duty, be charged a duty of thirty three and one third per centum on the value at the Port of entry, or on the price which they shall realise at auction when sold and delivered for local consumption, at the option of the Treasurer.

6. Goods, wares and merchandise exempted from duty under this or any other Act, when brought into the Colony otherwise than by regular importation and sold at

public auction, shall be charged a duty of five per centum on the price which they shall realise at such auction; and any person who shall so sell any such goods, wares and merchandise without having given bond, to the satisfaction of the Treasurer, for the payment of such duty, shall be liable to a penalty of double the amount of such duty.

7. Overpayments of duty, or duty paid in error, may be refunded from the Treasury on proof to the satisfaction of the Treasurer that the same have been overpaid, or paid in error, and subject to the following conditions, viz.:—

- (a) if claimed within six months the whole amount so overpaid or paid in error may be refunded;
- (b) if claimed after six months one-half of the amount so overpaid or paid in error may be refunded, unless the Governor in Council shall see cause for approving a refund of the whole amount so overpaid or paid in error.

8. In addition to any duties imposed by this or any other Act there shall be charged, levied, collected and paid upon all goods, wares and merchandise entered to be bonded an *ad valorem* duty at the rate of one-half of one per centum.

9. There shall be allowed and paid to any person who shall have paid duties of customs thereon a rebate of such duties of customs in the following cases:—

- (1) Upon all lumber used in the fitting-up of any vessel for the reception of native fruit to be exported from the Colony, provided that the person claiming such rebate shall produce to the Treasurer, or other proper officer, a declaration made before a Justice of the Peace by such person, showing the quantity of lumber actually used, and upon which such rebate is claimed;
- (2) Upon all goods, wares and merchandise or other articles or things supplied and delivered for the use of any department of His Majesty's service within the Colony, upon the person claiming the same producing to the Treasurer a certificate from the chief officer of the department to which the same shall have been supplied, that the goods, wares and merchandise or other articles or things upon which such rebate is claimed, have been *bona fide* supplied and delivered for the use of the said department.

Provided however that in the case of goods, wares and merchandise or other articles or things upon which an *ad valorem* duty has been paid, such rebate shall be calculated on only one-half of the contract price for which such goods, wares and merchandise or other articles or things shall have been supplied and delivered as aforesaid;

- (3) Upon all goods, wares and merchandise or other articles or things supplied and delivered for the use of the Governor or of the officer appointed Inspector of Lighthouses by the Board of Trade, upon the person claiming the same producing to the Treasurer a certificate that the goods, wares and merchandise or other articles or things upon which such rebate is claimed have been *bona fide* supplied and delivered for the use of the Governor or of the officer appointed Inspector of Lighthouses by the Board of Trade.

Provided however, that in the case of goods, wares and merchandise or other articles or things upon which an *ad valorem* duty has been paid such rebate shall be calculated and allowed on only one-half of the contract price for which such goods, wares and merchandise or other articles or things shall have been supplied and delivered as aforesaid:—

- (4) Upon all kerosene oil upon which duty has been paid under this Act and which has been used as fuel in the working of an oil or gas engine, a drawback of such duties of customs to the extent of ninety per centum.

Provided that before any such drawback shall be paid, the person claiming the same shall produce to the Treasurer a declaration made before a Justice of the Peace by such person, containing the following particulars:

namely, the number of engines worked by him, the power thereof, the times when used and the quantities of oil actually consumed in the working thereof and upon which such drawback is claimed;

- (5) Upon all tobacco upon which duty has been paid under this Act, a drawback of such duties of customs of four pence half-penny for every one hundred cigars manufactured in the Colony out of such tobacco and exported out of the Colony:

Provided that no drawback shall be allowed unless security by bond, to the satisfaction of the chief officer of revenue at the port of exportation, shall have been given for the due exportation of such cigars, and that the same shall not be unshipped or relanded at any port or place within the Colony;

- (6) Upon all motor cars upon which duty has been paid under this Act a drawback of such duties of customs to the extent of seventy-five per centum;

Provided that no drawback shall be allowed unless security by bond to the satisfaction of the chief officer of revenue at the port of exportation, shall have been given for the due exportation of such motor cars within six months after their original importation and that the same shall not be unshipped or relanded at any port or place within the Colony.

10. It shall be lawful for the Governor in Council to remit the amount of any duties of customs secured, or direct the repayment out of the Treasury of any such duties paid by any person, upon such person submitting to the Governor in Council satisfactory proof that the goods, wares and merchandise upon which such duties have been secured or paid do not correspond with the order for the same forwarded by such person to his agent abroad, and that the said goods, wares and merchandise have been returned to the place from whence they were imported.

Provided however, that application for such remission or re-payment shall be made in writing to the chief officer of revenue at the port at which such goods, wares and merchandise have been entered, within six days after the entry for the same has been deposited with such chief officer of revenue.

11. If it appears that any goods, wares and merchandise are properly chargeable with a higher rate or amount of duty than that to which they would be subject according to the value thereof as stated in the invoice or entry, the Treasurer may detain such goods, wares and merchandise.

12. In every such case, notice in writing shall forthwith be given to the importer of the goods, wares and merchandise of their detention and of the value thereof as estimated by the Treasurer, and he shall, within two clear working days after such detention, or within such reasonable period as may, with the consent of parties, be arranged, determine either to deliver such goods, wares and merchandise on payment of duty charged according to the invoice or entry of such importer, or to retain the same for the use of the Sovereign.

13. If the goods be retained for the use of the Sovereign the Treasurer shall cause the full amount stated in the invoice or entry as their real value, together with an additional sum equal to five per centum of such amount to be paid to the importer in full satisfaction for such goods, wares and merchandise, in the same manner as if they had been transferred by ordinary sale, and shall, after due notice in the *Gazette*, or some local newspaper, and without unnecessary delay, cause them to be put up to public auction for cash on delivery.

14. If the Treasurer deems the highest offer made at such sale to be inadequate, he may either adjourn the sale to some other day, to be notified as aforesaid, or buy in the goods, and without unnecessary delay dispose of them for the benefit of the Sovereign.

15. If the proceeds arising from such sale exceed the sum paid to the owner, together with the duty to which the goods are liable and all charges incurred by the Treasurer in connection with them, a portion not exceeding one-half of the overplus

shall, at the discretion of the Governor in Council, be payable to the officer who detected the undervaluation of the goods, wares and merchandise.

16. Nothing in this Act shall prevent the Treasurer, when he has reason to believe that any such undervaluation was solely the result of accident or error, from permitting the importer of the goods, wares and merchandise, on his application for that purpose, to amend such entry, on payment of such increased rate of duty on the excess of the amended over the original valuation, or on such other terms as he may determine.

17. For the purposes of sections 11, 12, 13, 14, 15 and 16 the word 'Treasurer' shall, if entry be made at an Out Island, be taken to include the chief collector of revenue at such Out Island.

18. Any dutiable goods, wares and merchandise exempt from the payment of duty under this Act shall, in case of the sale or other disposition thereof for valuable consideration after importation, become liable to and be charged with the duties payable on the like goods, wares and merchandise on their importation for other purposes; and if such duties be not paid, such goods wares and merchandise shall be forfeited and may be seized and dealt with accordingly.

19. If any dutiable goods, wares and merchandise exempt from duty under this Act shall be clandestinely sold, or otherwise disposed of, every person concerned in such clandestine sale, or disposal, shall forfeit and pay treble the value of the goods, wares and merchandise so clandestinely sold, or disposed of, and all such goods, wares and merchandise, shall be liable to seizure and condemnation.

20. In the case of spirits or alcoholic liquors subject to duty according to their relative strength of proof, such strength shall be ascertained either by means of a hydrometer or of the specific gravity bottle, as the Governor in Council directs: and in case such relative strength cannot be correctly ascertained by the direct use of the hydrometer or gravity bottle, it may be ascertained by the distillation of a sample and the subsequent test in like manner of the distillate, and a certificate of the strength of any such distillate given by a person approved by the Governor in Council, shall be accepted as conclusive evidence of the strength of any such spirits or alcoholic liquor.

21. There shall be allowed upon the gauge of all spirits and wines imported in wood upon their first importation into the Colony a deduction of ten per centum.

22. (1) Whenever it is shown to the satisfaction of the Governor in Council that any foreign power has accorded to the British Consular officers within its dominions the privilege of exemption from the payment of any duties upon official goods and supplies imported for the use of their Consulates, it shall be lawful for the Governor in Council, by order in council, to declare and direct that all official goods and supplies imported into the Colony for the use of the Consulates within the Colony of any such Power, shall be exempted from the payment of any duties whatever on their importation.

(2) Upon the issuing of such Order, such official goods and supplies shall be exempted from the payment of such duties.

23. All duties and penalties payable and recoverable under this Act may be sued for and recovered in the name of the Treasurer.

24. When any person is adjudged to pay any duty or penalty payable and recoverable under this Act, the Court shall state, in the order of conviction and also in the commitment of such a person, if committed in default of payment, the amount of costs awarded to be paid by such person, as well as the duty or penalty so adjudged, and shall commit such person until payment of such duty or penalty and costs.

25. The Acts enumerated in the Fifth Schedule to this Act are hereby repealed to the extent specified in the Third column of that Schedule.

26. This Act shall continue in force for three years and from thence to the end of the next session of the Legislature.

## BERMUDA.

### THE CUSTOMS TARIFF ACT, 1907.

(No. 44, dated December 21, 1907.)

This Act, which took effect on January 1, 1908, to continue in force until December 31, 1908, is of the same tenor as 'The Customs Tariff Act, No. 29, of 1906,' save the following modifications or additions indicated in italic type:—

#### IN TABLE OF SPECIFIC DUTIES.

|                                                                           | £  | s. | d.  |
|---------------------------------------------------------------------------|----|----|-----|
| Bulbs of the <i>Lilium Longiflorum</i> and <i>Harrisii</i> type . . . . . | 10 | 0  | 0   |
| Cigars . . . . .                                                          | 0  | 2  | 6   |
|                                                                           |    |    | 10% |

New paragraph added to section 2 of former Act whereby old paragraph (3) becomes paragraph (4):—

- (3) *On the following goods:—Animal manures when in their natural condition and not mixed with other substances; agricultural chemicals, viz., phosphates of all kinds, nitrate of soda, muriate of potash, sulphate of potash, kainit, sulphate of ammonia when not mixed either together or with other substances; beans; beef (salted); bran; butter; oleomargarine, margarine and their compounds; cheese; corn; cornmeal; fertilizers; fish (dry, salted or pickled); flour; hay; oats (for fodder); peas; petroleum and its products, crude or refined; pork (salted); rice; straw; sugar,*  
ad valorem 5%

#### IN TABLE OF EXEMPTIONS.

*Articles to be appropriated as prizes for ocean races finishing at or off these islands, or for foreign yachts competing in the waters of these islands.*

*Box material to be used for the exportation of produce grown in these islands.*

*Cooperage stock consisting of staves, heads, hoops, and lining strips.*

*Empty barrels.*

Horses and other beasts, and all stores, provisions and goods of every description imported into these islands for the use of His Majesty's land or sea forces or any department of His Majesty's service being the property of His Majesty on satisfactory proof being furnished to that effect, and the horses of military officers imported into these islands as a necessary part of their military equipment on satisfactory proof being furnished to that effect on compliance by the proper officer or officers of His Majesty's government with any regulations made by the Governor in Council with respect to such importations: Provided that no military officer shall during his term of service in these islands be allowed to import free of import duty more horses than shall be shown by the certificate of the proper officer of His Majesty's service to be required by such military officer as a necessary part of his military equipment.

*Scientific apparatus, machinery, boats, and other articles imported by or for the Bermuda Natural History Society for the purpose of the Biological Station or Aquarium.*

GOLD COAST COLONY.

*An Ordinance to further amend 'The Kwitta Customs Tariff Ordinance, 1894.'*  
(No. 6, passed and assented to June 11, 1907.)

1. This ordinance may be cited as 'The Kwitta Customs Tariff (Amendment) Ordinance, 1907,' and shall be read and construed with 'The Kwitta Customs Tariff Ordinance, 1894,' as amended by 'The Kwitta Customs Tariff (Further Amendment) Ordinance, 1904,' and 'The Kwitta Customs Tariff (Amendment) Ordinance, 1906.'

2. The table of exemptions in Part III. of the schedule to the principal ordinance is hereby amended by inserting in their proper order of alphabetical sequence the items 'galvanized iron' and 'manures.'

3. The schedule to 'The Kwitta Customs Tariff (Further Amendment) Ordinance, 1904,' is hereby repealed and in lieu thereof the several duties set forth in the schedule hereto are hereby substituted therefor.

4. 'The Kwitta Customs Tariff (Amendment) Ordinance, 1906,' is hereby repealed.

5. (1) It shall be lawful for the Comptroller of Customs with the approval of the Governor, at any time to prescribe that Tralles' hydrometer, or such other hydrometer as may be prescribed, shall be used instead of Sykes' hydrometer for ascertaining the strength of spirits.

(2) When and for so long as the use of such substituted hydrometer is prescribed under the provision of this section, the name of such substituted hydrometer shall be deemed to be inserted in the schedule hereto, and the first three items in the said schedule shall be suspended and in lieu thereof the following shall have effect:—

£ s. d.

'On brandy, gin, rum and miscellaneous spirits or strong waters not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Tralles' hydrometer or such other hydrometer as may be prescribed, not exceeding the strength of 50 degrees per centum of pure alcohol by such hydrometer per Imperial gallon or part thereof 0 3 7½  
'And if of greater strength, for each degree or part of a degree over 50 degrees per centum an additional duty per Imperial gallon or part thereof... 0 0 1'

6. This Ordinance shall come into force on the 15th day of June, 1907: provided that this ordinance shall not apply to spirits, liqueurs or strong waters imported after, but shipped before the 31st day of May, 1907, but such spirits, liqueurs or strong waters shall be charged duty at the rates heretofore imposed by 'The Kwitta Customs Tariff (Further Amendment) Ordinance, 1904.' The burden of proof as to the date of shipping shall lie on the importer.

SCHEDULE.

Part I.—Duties.

£ s. d.

On brandy, gin, rum and miscellaneous spirits or strong waters not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Sykes' hydrometer of a strength of 12½ (12·5) degrees under proof, the Imperial gallon or part thereof... 0 3 7½  
For every degree or part of a degree stronger than 12½ (12·5) degrees under proof, an additional duty the Imperial gallon or part thereof... 0 0 0½  
For every full degree below 12½ (12·5) degrees under proof a reduction the Imperial gallon or part thereof... 0 0 0½

|                                                                                                                                                                                                                                                     | £ | s. | d. |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|----|----|
| On brandy, rum, gin, liqueurs, spirits of wine and miscellaneous spirits or strong waters being sweetened or mixed with any article so that the degree of strength cannot be ascertained as aforesaid, the Imperial gallon or part thereof. . . . . | 0 | 4  | 1  |
| Tobacco. . . . . per lb.                                                                                                                                                                                                                            | 0 | 0  | 2½ |

*An Ordinance to regulate in Ashanti the importation, introduction, storage and disposal of firearms, ammunition, gunpowder and lead, and to prevent the conversion of flint-lock guns into cap guns.*

(No. 5, dated November 25, 1907.)

1. This ordinance may be cited as 'The Ashanti Firearms Ordinance, 1907,' and shall come into force on the 1st day of January, 1908.

3. (1) It shall not be lawful to import or introduce into Ashanti any firearms, ammunition, gunpowder, or lead in bars or sheet except in accordance with the provisions of this ordinance.

5. It shall be lawful for the chief commissioner by writing under his hand to grant a license for the introduction of specified firearms, ammunition and gunpowder other than flint-lock guns with unrifled barrels, trade gunpowder and lead in bars or sheets:

(a) to persons affording sufficient guarantees that the firearms, ammunition or gunpowder in question will not be given, assigned or sold to third persons;

(b) to travellers provided with a declaration of their government stating that the firearms, ammunition or gunpowder are destined exclusively for their personal defence.

## MONTSERRAT.

*I.—An Ordinance to impose an Export Duty upon certain articles the growth, produce and manufacture of this Presidency upon the exportation thereof.*

(No. 3, assented to April 15, 1907.)

Be it ordained by the Governor and Legislative Council of Montserrat as follows:

1. This ordinance may be cited as 'The Export Duty Ordinance, 1907.'

2. This ordinance shall come into operation on such day as the Governor shall appoint in that behalf by proclamation.

3. From and after the coming into operation of this ordinance there shall be paid into the public treasury of this Presidency, by the exporter or owner thereof, upon the exportation of the articles the growth, produce and manufacture of this Presidency, set forth in the schedule to this ordinance, the duties specified in such schedule; and at the same rate for any greater or less quantity of such articles.

Duly published and proclaimed the 30th day of April, 1907.

### SCHEDULE.

*II.—An Ordinance to impose an Export Duty on Citrate of Lime, and to provide for the exemption from import duty of chalk, whiting, or lime, when used in the manufacture of Citrate of Lime.*

(No. 5, assented to May 9, 1907.)

Be it ordained by the Governor and Legislative Council of Montserrat as follows:

1. This ordinance may be cited as 'The Citrate of Lime Ordinance, 1907.'

2. This ordinance shall come into operation on such day as the Governor may appoint in that behalf by proclamation.

3. From and after the coming into operation of this ordinance, chalk, whiting or lime shall, when imported for use in the manufacture of citrate of lime, be admitted free of import duty.

4. Before any chalk, whiting or lime is admitted free under the provisions of the preceding section the person importing the same shall furnish the treasurer with a certificate signed by himself specifying that such chalk, whiting or lime has been imported for use in the manufacture of citrate of lime.

5. Any person who without the written permission of the treasurer sells any chalk, whiting or lime imported free of import duty under the provisions of this ordinance, or otherwise disposes of or uses the same for a purpose other than that specified in the certificate required by section 4 of this ordinance, shall be guilty of an offence against this ordinance, and shall be liable on summary conviction to a penalty not exceeding one hundred pounds.

6. From and after the coming into operation of this ordinance there shall be paid into the public treasury of this Presidency by the exporter thereof, upon the exportation of any citrate of lime manufactured in this Presidency, an export duty of one shilling on every hundred weight and at the same rate for any greater or less quantity.

Duly published and proclaimed the 15th day of May, 1907.

### NEW ZEALAND.

*Order No. 854, dated November 1, 1907, of the Minister of Customs, prescribing the Form of Invoice Certificates under the Tariff Act, 1907.*

*(The New Zealand 'Gazette' of November 7, 1907.)*

In exercise of the powers conferred upon me by 'The Tariff Act, 1907,' and of all other powers and authorities enabling me in this behalf, I, John Andrew Millar, Minister of Customs, do hereby revoke Minister's Order No. 744, dated the 21st day of June, 1904, and gazetted on the 23rd day of June, 1904, and in lieu thereof do hereby prescribe that the certificate referred to in section 6 of the above-mentioned Act shall be in such one of the forms numbered 1, 2, 3 and 4 in the schedule hereto as is applicable: Provided that certificates on invoices of tea in the form prescribed under Minister's Order No. 744, dated the 21st day of June, 1904, may be accepted, until the 30th day of June, 1908, if the collector is satisfied that no portion of the said tea is contained in packages of less than 5 lbs. in net weight.

### SCHEDULE.

No. 1.—Form of certificate prescribed to be written or printed on invoices of all articles, except tea, for entry under the preferential tariff of New Zealand, when made and signed by an individual exporter personally.

I, *(full name of exporter)*, the exporter of the articles included in this invoice, have the means of knowing, and do hereby certify, that the said invoice, being from myself to *(name of party or parties to whom articles invoiced)*, and amounting to *(insert in words at length total value of invoice)*, is true and correct; that all the articles included in the said invoice are *bona fide* the produce or manufacture of one or more of the following countries, viz.: *(Names of countries, being in every case part of the British dominions)*; and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to New Zealand.

(Signed.)

Dated at \_\_\_\_\_, this \_\_\_\_\_ day of \_\_\_\_\_, 190 \_\_\_\_\_.

*Note.*—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

No. 2.—Form of certificate prescribed to be written or printed on invoices of all articles, except tea, for entry under the preferential tariff of New Zealand, when made and signed by a person other than an individual exporter.

I, (*full name of person signing certificate*), hereby certify that I am (*insert the words 'partner,' 'manager,' 'chief clerk,' or 'principal official,' giving rank, as the case may be*), of (*name and address of exporter or exporters*), the exporter(s) of the articles included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said exporter(s).

I have the means of knowing, and I do hereby certify that this invoice from the said (*name of exporter or exporters*) to (*name of party or parties to whom articles invoiced*), amounting to (*insert in words at length total value of invoice*), is true and correct; that all the articles included in the said invoice are *bona fide* the produce or manufacture of one or more of the following countries, viz. (*names of countries, being in every case part of the British Dominions*); and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to New Zealand.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

No. 3.—Form of certificate prescribed to be written or printed on invoices of tea, for entry under the preferential tariff of New Zealand, when made and signed by an individual exporter personally.

I, (*full name of exporter*), the exporter of the tea included in this invoice, have the means of knowing, and do hereby certify, that the said invoice, being from myself to (*name of party or parties to whom tea invoiced*), and amounting to (*insert in words at length total value of invoice*), is true and correct; that all the tea included in this invoice has been grown in one or more of the following parts of the British Dominions, viz., (*names of parts of British Dominions where tea has been grown*), and that no portion of such tea is contained in packages of less than five pounds in net weight.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

No. 4.—Form of certificate prescribed to be written or printed on invoices of tea, for entry under the preferential tariff of New Zealand, when made and signed by a person other than an individual exporter.

I, (*full name of person signing certificate*), hereby certify that I am (*insert the words 'partner,' 'manager,' 'chief clerk,' or 'principal official,' giving the rank, as the case may be*), of (*name and address of exporter or exporters*), the exporter(s) of the tea included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said exporter(s).

I have the means of knowing, and I do hereby certify, that this invoice from the said (*name of exporter or exporters*) to (*name of party or parties to whom tea invoiced*), amounting to (*insert in words at length total value of invoice*), is true and correct; that all the tea included in this invoice has been grown in one or more of the following parts of the British Dominions, viz. (*names of parts of British Dominions where the tea has been grown*), and that no portion of such tea is contained in packages of less than five pounds in net weight.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

## REPORTS OF BRITISH CONSULS.

## CHILE.

## REPORT ON THE TRADE OF CHILE.

*(By H.B.M. Consul-General Leay.)*

## BETTER CLASS HOUSES WILL PROMOTE TRADE.

The home dealer should select a few of the better class houses in each town in the particular country which he is anxious to open up and submit samples and prices to them from time to time, and not forward them indiscriminately to each and every house dealing in the particular class of goods as enumerated in a directory.

Often in the case of a new article being produced it is offered and sold to all dealers, who in turn find themselves in fierce competition with each other over it, with the result that not only are the prices lowered, but the sale of the article is frequently killed altogether. First circulate novelties through the medium of one or two good clients and then create the demand.

## MERCHANTS MUST STUDY NATIONAL REQUIREMENTS.

Given an agent of their own nationality, our merchants at home could get to know their customers, their standing and reputation for commercial character and morality. If we wish to keep Chilean trade we must study the wants of the people, even their caprices and prejudices, and it will pay us best to give them what they want, to accommodate ourselves to their requirements in respect of the class of goods required, samples, measurements, currency, &c.

A foreign buyer will seldom trouble to work out the complications of our weights and measures tables, neither does he care to go to the expense of having a price list translated. He will peruse a well printed and attractive circular in his own language or be attracted by a well put-up sample, but a loose leaflet ends in the waste-paper basket.

## REGULAR TRAVELLER WILL DO WELL.

Already we have a few excellent travellers but could do with many more. By no means will the cheapest man be found the best. He should be liberally paid and have a knowledge of Spanish. A regular traveller with tact and a good supply of samples will always do well. He should be a responsible man. It is often worth while to send a junior member of the interested firm, as do foreign houses—a man capable of judging whether it would be worth the while of his firm to open a branch establishment, or to appoint a suitable local agent. Attempts to introduce goods into this republic without a certain outlay will be found quite useless. In fact a small visible stock at hand will be found the best mode of introducing goods.

## LIBERAL ADVERTISING GOOD INVESTMENT.

I have continued to point out for some years without much result how necessary for the promotion of our trade and commerce is advertisement. A British advertisement is now occasionally seen in Chilean newspapers. The people are as easily led to purchase in this manner as are we at home. Liberal advertising is invaluable for the improvement of trade and commerce. I shall gladly supply a list of likely periodicals

on application. There are, in spite of obstacles, a few home trade journals which manage to circulate and do much good.

It is not sufficient here to have a good article for sale. The essential point is to have an article suited to the market and to the needs and tastes of the people. The Chilean buyer does not always want 'the best.' He wants what he asks for, what he can sell.

#### CANADA PREFERABLE FOR THE EMIGRANT.

There are in Chile opportunities for good returns on capital invested, but there are also swindles from which the really honest concerns at times suffer and the British investor should be wary. I would not be doing my duty were I not here to point out that it is unwise for even a junior clerk to come to Chile unless previously assured a position with a minimum salary of 200*l.* per annum, or say, if paid in the currency of the country, 4,000 *dol.* The small capitalist had better stay away. Skilled labour, except in a few very special instances, can do better at home. Large capital can be made to succeed well enough under certain circumstances, if skilfully handled on the spot.

The British emigrant in spite of all promises had far better go to Canada. Nurses, women servants, &c., should avoid the country.

The recent exposure in the United States of certain modes of carrying on life insurance business has presented an opportunity for British companies to choose the best part of the Chilean business in that line. Both life and fire insurance in this republic should only be undertaken after the most thorough inquiry.

#### CHILIAN IMPORTS ARE VARIED.

Touching upon imports, almost all printed goods, plain cottons, &c., are entirely in the hands of British traders and are of British manufacture. Woollen goods, more especially shawls, &c., are essentially of German production. Speaking generally, it may be said that the dry goods import business of this nature is under the control of British and German firms. French, Spanish and Italian goods are imported in a very minor degree. Galvanized iron, buckets, paints, refined salt, caustic soda, crystallized soda, &c., are imported from the United Kingdom. Sugar was an article largely imported from Germany, but nowadays this article is almost all supplied by the refineries in Chile, which are greatly protected by the government by a heavy import duty upon imported sugar. Orders for agricultural and other machinery are competed for by British, German and American manufacturers. In this particular line, however, farmers of standing prefer the British-made article, which exceeds all others in durability and strength. Candles are entirely of Belgian, French and German production. The bag business, an important one in these parts, is practically all in the hands of British firms. Machine oils are essentially of American production, also resin. The better class of knives, forks, spoons, &c., come from the United Kingdom, whereas the cheaper qualities are from Germany. Paraffin, pumps, windmills and nails usually come from the United States. Empty bottles, looking-glasses and a smaller portion of windmills and pumps come from Germany. Cement is an article that has been very largely consumed of late, more directly owing to the terrible ravages caused by the great earthquake that visited this country on August 16, 1906, and made itself felt to a serious degree as far south as Talca and Chillan, towns situated about half-way between this place and Valparaiso. This article is sold chiefly by British, German and Belgian firms. Galvanized iron is another article that has met with ready consumption, and again importers have done splendid business throughout the earthquake-stricken districts.

#### STANDARDIZATION OF MACHINERY DESIRABLE.

For machinery or rolling stock, an agent with authority and technical knowledge and acquainted with the country, is necessary. Orders for this country should be

rushed in order to counteract as far as possible the great time taken in transit. In machinery standardization is desirable where possible. The facilities for effecting repairs, brought about by the standardization induce people to purchase American built engines and machinery when they would otherwise purchase British.

Our packing is better than that of any other country, and for rough handling here, cannot err on the side of strength and solidity. It must not be forgotten, however, that weight even in the cases and coverings adds to the duty levied and in turn to the cost of the goods purchased, for duties are collected on the gross weight. Baskets for some goods might be found suitable as light and unbreakable.

## COLOMBIA.

### REPORT ON THE TRADE OF COLOMBIA.

*(By Mr. F. Stronge, H.B.M. Minister at Bogotá.)*

#### ANTICIPATED TARIFF CHANGES.

As far as the trade of the capital is concerned, the bad effects of the war were most severely felt after peace had been restored, and recovery has been far slower than was expected. There are other reasons also for the present slackness of trade. The government has named a commission to draw up a new customs tariff, and although it is understood that only a certain amount of readjustment is under contemplation and the average rate of duty will remain unaltered, importers are timid about ordering any goods which do not command an immediate sale.

#### LOW PRICE OF COFFEE.

Another cause of depression has been the low price of coffee, the principal article of export, and yet another has been the establishment of the hides and alcohol monopolies. Money had to be found to carry on the administration, and, in a country which is impatient of direct taxation, this may well have been the only way to obtain it. It will hardly be denied, however, that the alcohol monopoly has proved disastrous to individual growers of cane, and has caused some economic disturbance throughout the country. The system has, moreover, given rise to abuses which the government has apparently been powerless to control.

#### LACK OF COMMUNICATION.

The great want of Colombia is better means of communication, especially with the coast, and it is gratifying to see that the government of General Reyes is endeavouring in every possible way to facilitate the construction of roads and railways which will, when completed, materially lower the price of foreign goods in the interior. It is unlikely, however, that railways will supersede the Magdalena as a channel of communication for passengers and goods, and hitherto the chief object of railway and road construction in the central districts has been to provide good access to the river. Whilst on this subject I may mention that efforts are being made to improve the steamboat service, and that the (British) Magdalena Steamboat Company has set a good example by providing improved accommodation.

#### FEW COMMERCIAL TRAVELLERS.

Very few British commercial travellers now come to Bogotá. British trade suffers in competition on this account, for the presence of good travellers is not only necessary in order to inform the houses at home of the changes in the requirements of clients and in the standing of houses here, but it also facilitates the sale of goods. Even a house having a resident agent here gains something by sending out a traveller

from time to time, for merchants prefer to deal with the man who arrives fresh from Europe with fresh ideas. If trade has been bad in some special line a good traveller can often revive it, and for want of such men we often lose ground. On the other hand, resident agents can represent several non-competing houses, and in this way expenses are reduced; moreover, their pattern rooms may lead clients in one line of business to order goods in another.

#### IMPORTS INTO COLOMBIA.

There are comparatively few British firms that export goods to Bogotá, and these do so principally from Manchester, Birmingham, Leeds and Glasgow. Their shipments consist mainly of cotton goods, hardware, woollen goods, sewing cotton and machinery.

#### AGRICULTURAL AND MINING MACHINERY.

Machinery for agricultural purposes is brought mostly from the United States. Some of the machinery required here is similar to that used in the Southern States, which gives the American manufacturer a certain advantage. It is said to be less durable than the British manufacture, but it is a good deal cheaper and lighter. Colombians will often run the risk of having to replace a damaged piece rather than incur a heavy initial outlay. American machinery is well advertised here and British very little.

Mining machinery usually comes from the United Kingdom. Pelton wheels, which are much used, come from the United States. Catalogues should state the smallest weights into which the machinery can be divided. Comparatively few places in Colombia can be reached without resort to mule transport, and, where possible, pieces should not exceed 150 pounds in weight. The amount of machinery, especially for mining purposes, which has been brought to the country and abandoned on the road would surprise any one unacquainted with the mountainous parts of Latin America. British manufacturers are now, however, better informed respecting local conditions than was the case formerly, and it is believed here that, taking machinery as a whole, the greater part now comes from the United Kingdom. As soon as the railways now under construction or in contemplation are completed there will be a greatly increased demand for machinery of various kinds.

#### AMERICANS IN HARDWARE.

Hardware from Birmingham is not as well introduced in this market as it should be. Many orders for cheap goods of inferior quality are still placed in Germany, but the better class of hardware comes mostly from the United States and has done so for many years. For example, the American machete, an article in almost universal use, holds the market. American tools are lighter in weight than British, which is no small matter for the importer. Barbed wire for fencing, for which there is a large demand, comes almost entirely from the United States. Enamelled hardware comes from Germany, as the quality required is inferior to that made in the United Kingdom.

#### NO MARKET FOR AUTOMOBILES.

Colombia is not suited for motor cars, and, except to a very limited extent, it cannot become so for many years to come. There is, however, a project to establish a motor route and service between Facatativa, the terminus of the Sabana Railway, and Cambao on the Magdalena. At present there is no market for motors in this country. Locomotives and railroad material generally come from the United States, though most of the railway companies are British, with directorates established in London.

#### MATCHES, CHINA AND STATIONERY.

There are match factories in the republic, but large quantities of wooden and wax matches are imported, the former made in Sweden, the latter in Italy.

China and glassware are mostly imported from Austria-Hungary and Germany. China should be of cheap quality, but, at the same time, of light weight. British packing for these articles is considered the best.

Stationery comes mainly from Germany, and is, according to British ideas, of very inferior quality, but British handmade paper is always preferred, and it is only the comparatively high price which prevents large orders being given.

#### MARKET FOR CANADIAN BOOTS.

Boots and shoes used to be imported in large quantities from the United States, but, as a result of protective duties, their manufacture has become one of the principal industries of Bogota. Nevertheless, foreign boots still find a market, but it is not so extensive as formerly, and it is nearly monopolized by the United States.

### GREECE.

#### REPORT ON THE TRADE AND COMMERCE OF THE MOREA AND THE PROVINCES OF ÆTOLIA AND ACARNANIA.

(By *H.B.M. Consul Wood, Patras.*)

#### EXTENSIVE TRADE IN DRIED CODFISH.

The consumption of Labrador codfish in this district is annually on the increase, and there is every reason to expect that the importation of this favourite article of diet will gradually attain large proportions. Fresh meat is very expensive, and is in consequence rarely consumed by the lower and middle classes. Fresh fish, owing to the entire absence of any provisions for its preservation, is yearly getting scarcer and dearer, and this has tended to render dried codfish one of the most popular and favourite articles.

Last year 42,000 quintals were imported from the coast of Labrador direct, whereas during the past season three steamers and thirteen sailers landed over 55,000 quintals, all imported from Labrador and St. John's direct. Besides these, several thousand quintals of Labrador codfish and haddock in casks were imported from the United Kingdom.

The fish this year was of good quality. Early arrivals fetched £1 2s. and £1 3s. to pay cost, freight and insurance, and the remainder has been run off at between 19s. and £1 0s. 6d. c.i.f. Dealers have been able to retail at the price of 1 dr. (9d.) per oke (2½ lbs.), as against 2½ and 3 dr. per oke, which are the prices of fresh meat and fish, and when it is considered that one pound of dried codfish goes quite as far as two pounds of meat or fresh fish, it will readily be understood why its consumption is so steadily on the increase.

#### LABRADOR SALMON AND LOBSTER RELISHED.

Labrador salmon has been very scarce this season, dealers having with great difficulty procured some 100 tierces or so at £6 10s. to £7 per tierce, whereas the usual consumption is about 500 tierces. Tinned lobster is another very favourite article. Its importation has increased very much since the reduction of the import duty. According to the canons of the orthodox church, lobster and other crustacea can be eaten during the strict Lenten season, when all kinds of fish are prohibited.

#### CHEAP FOREIGN GOODS HOLD THE MARKET.

Wood for building and case-making is all imported from Austria-Hungary, Italy and Roumania. Wheat comes from Russia and Turkey, but during the past years.

4,000 tons were imported at this port from the United States. In some articles, such as jewellery, hardware, earthenware, hats, stationery, quincallerie, &c., British articles might be introduced if the requirements of these markets were carefully studied, but under present conditions they are kept out by the relative cheapness of foreign goods.

#### INCREASE IN EXPORT OF CITRONS AND OLIVES.

The production of this fruit is on the increase, the United States and the United Kingdom being the principal consumers. The fruit is cut in half and placed in casks containing brine. Shipments to the United States during 1907 were valued at £7,000; to the United Kingdom about £3,000. The pickled olive business is also increasing annually, the presence of so many Greek emigrants in the United States having given a great impetus to the trade. Over £20,000 worth were shipped to the United States, but the principal trade is with Turkey and Russia. Very few are shipped to the United Kingdom.

Notwithstanding an abundant yield of olive oil in this district during the past year, the export is almost nil, as local consumption absorbs nearly all the production at prices far above what foreign markets can afford to pay for industrial purposes. Besides, as one year of plenty in olive oil is invariably succeeded by a lean one, local speculators lay in stock when the liquid is plentiful and comparatively cheap, and are able to realize a handsome profit during the succeeding season.

#### TURKEY IN ASIA.

##### REPORT ON THE TRADE OF PALESTINE.

*(By H.B.M. Consul Blech.)*

British manufacturers might well pay more attention to Palestine. The increase of population has naturally brought about a considerable augmentation of the imports, the value of which has nearly doubled in five years. This tendency is likely to continue especially when the completion of the Hejaz railway leads to the opening up of districts hitherto devoid of all means of communication; other railway projects are under consideration, and everything points to the development of the country and the increase of its requirements in the near future.

#### OPENINGS IN TEXTILES AND HARDWARE.

Although it is true that business with the United Kingdom is done by native firms who deal direct, there is, nevertheless, an opening for a capable British firm of commission agents in relation with firms in the United Kingdom, who would devote themselves to the study of local tastes and requirements, and would keep a sample room for the use of intending purchasers. In the two important branches of textiles and hardware a great deal could be done by such a firm. Domestic ironmongery of good quality can be obtained so cheaply in the United Kingdom that I feel sure an opening exists in Palestine, provided that local tastes are consulted. British cutlery still finds a sale. Lamps and kitchen utensils might well be imported to compete with the inferior continental articles now sold here. Stationery and printing also afford scope for British industry.

A large business is done by Italy and Germany, and a commercial traveller from the former of these countries told me some months ago that he always secured important orders for catalogues, picture postcards and miscellaneous printing. So far I have not succeeded in inducing any person to establish himself as British commission agent, but I trust that by next year some progress will have been made in that respect.

## GENERAL STORE WOULD SUCCEED.

There is, I think, an opening for a general store, somewhat on the lines of those successfully established at Constantinople and Smyrna. This might at first be little more than a high-class grocery and provision shop, and with time other branches might be added. Not only the fairly large British community but most of the foreign residents and religious and philanthropic establishments would in a short time become its customers. Although the numerous missionary and religious institutions are entitled to customs immunities, in practice they (at all events those under British jurisdiction) make very little use of this privilege as regards laying in stores or provisions, presumably because they have not always the necessary funds at their disposal. As it is, the United Kingdom supplies the bulk of imported provisions, biscuits and confectionery. It seems to me certain that such a store, properly managed and buying in the cheapest markets, would pay well, provided that the customer could make sure of getting goods of satisfactory quality at reasonable prices.

## NO COLD STORAGE AND INFERIOR MEAT.

I have tried to induce local firms to enter into relations with Australia with a view to the introduction of frozen meat; meat is here of very inferior quality, and is sold at very high prices. But the total absence of all facilities for cold storage renders such an undertaking impossible at present.

## TRADE OF CHINA.

No. 1.—STATEMENT showing the Customs Revenue, Imports, Exports and Number and Tonnage of Vessels entered and cleared for China during the Calendar Years 1887 to 1907, together with the Number and Tonnage of British Vessels entered and cleared.

\* The imports from Hong Kong come originally from, and the exports to that colony are further carried on to Great Britain, America, Australia, India, &c., and coast ports of China. In addition to the imports, to which the values given in the above table are confined, the South of China is supplied with opium and other articles imported from Singapore, Siam and other foreign places in native vessels.

No. 3.—STATEMENT showing the Values of the Principal Imports into China during the Calendar Years 1887 to 1907.

## TRADE JOURNAL EXTRACTS.

## MARINE MOTOR ENGINES IN JAPAN.

The *Board of Trade Journal*, giving particulars of the Japanese marine motor industry, quotes H.B.M. Consul at Kobe (Mr. H. A. C. Bonar) on this subject as follows:—

‘It will, perhaps, be useful to let British marine motor builders know that the Japanese builders certainly cannot compete with them in fineness of finish or working, or exactitude of parts; on the other hand, Japanese engines—roughly made, which serve the purpose very well—are intended to use the coarsest and commonest oil which is produced in Japan. Possibly the finer British machine would need a better class oil. Also, there is no doubt in the mind of the writer that British-made engines (using kerosene) would always be bought in preference to Japanese, even at a somewhat higher figure and higher cost of running, but at present the Japanese, having become aware of the advantage of using marine motors, must be content, when these are required for business purposes only, to use cheap Japanese-made motors, as no other are to be had at anything like the same figure. The excellent workmanship of the British-made motor is much admired, but the outlay for such would not be made up by increased earning capacity by the vessel using them. For pleasure boats the demand for motors is limited to a few foreigners. Nor do the Japanese motor builders claim to make much, if any, profit on the machines they turn out. The demand exists, but so far it is not being met satisfactorily.

## JAPANESE WANT PRACTICAL DEMONSTRATIONS.

‘It is assumed that all leading marine motor builders have now agents in this country. In one case only, it is believed, have they on the spot an engineer capable of supervising the installation of motors or explaining their proper working. It is suggested, however, that if British motor makers wish to push their manufactures in this country they must go to the expense and trouble of being thoroughly well represented and having on the spot a practical engineer, who should have at his disposal motors of several sizes, say 10, 15 or 25 horse-power, to give practical demonstration of their qualities, and that not in British-built boats necessarily but in any or every kind of native craft in which it is possible to fix a motor. Five minutes’ practical demonstration is worth piles of catalogues and advertisements, particularly to the Japanese. British-built boats are not needed; boats can be built cheaply enough on the spot, but it is essential that the motors should be easily fitted into any kind of craft, foreign or Japanese model. The latter is suitable to a certain extent. Schooners of 59 tons and upwards seem most to need motors to help them to get through the inland sea.’

## OIL DISCOVERIES IN ORANGE RIVER COLONY.

The *Cape Times* announces, on the authority of its Bloemfontein correspondent, that arrangements have been completed for the formation of an important organization in the Orange River Colony with the object of proving the presence of payable oil. The investigations relating to oil have been proceeding in the Orange River Colony ever since the war, but more particularly within the past six months. A large amount of ground has been covered, and patient and careful investigation has resulted in the definition of a broad oil belt, which stretches across the colony, roughly from the northeast to the southwest districts of Harrismith, Bethlehem, Senekal, Ficksburg, Ladybrand, Thaba Nchu, Bloemfontein, Wepener, Smithfield, Edenburg and Fauresmith.

In Ladybrand district alone five distinct basins have been located. The discoveries there embrace oil springs, oil shales, ozokerite (mineral wax), blue clay, coarse sandstone impregnated with oil, bituminous tufa, &c. The basins in each case are clearly defined.—(*British Board of Trade Journal*.)

#### WATER-GLASS METHOD OF EGG PRESERVATION.

Egg preservation is carried on on an enormous scale in Denmark, and according to a recent report, many of the eggs shipped abroad have already been preserved for four or five months. The material used for this purpose is chiefly water-glass (a solution of silicate of soda), although lime water is also largely employed, since it is cheaper and gives almost equally good results. With lime water, however, the shell of the egg is hardened and roughened, which is not the case with water-glass. The eggs are laid down in enormous tanks, which will hold from 70,000 to 80,000, and the tanks are then filled nearly to the top with the preserving fluid. These tanks are built in cool, underground cellars. For successful results it is essential that the eggs should be fresh before laid down. On removal from the solution, the eggs are well washed in running water, and dried in the air before being placed on the market.—(*Agricultural News, B.W.I.*)

The *Agricultural News*, Barbados, B.W.I., in publishing information for the benefit of intending West Indian exhibitors, at the exhibitions to be held at Toronto and Halifax this summer, includes the following appreciative comments:—

‘Canadian exhibitions are largely attended by manufacturers, produce merchants and others from all parts of the Dominion, as well as from the United States. Further, the nature and quality of the exhibits receive due attention and are fully discussed in the Canadian press. These facts, rightly utilized, should prove of great advantage to colonies that are anxious to find a more extensive market for their produce. The Canadian exhibitions certainly form the best means of bringing the resources and chief products of the West Indies before the merchants and consumers of the Dominion, and in view of the Conference on Trade Relations between the West Indies and Canada, held at Barbados in January last, and the considerable interest that has been aroused on the subject, the present is a favourable opportunity for making every effort to promote further commercial intercourse between these two portions of the empire.

‘The appointment of a special trade commissioner (Mr. E. H. S. Flood) for the West Indies, indicates that the Canadian government has recognized the possibility of greater development in the trade relations between the two countries, and is anxious to do all that lies in its power to bring about this development. Intending exhibitors will therefore realize that there is, this year, a special reason for all the West Indies to join in sending representative collections of produce, put up in an attractive and interesting manner, so as to illustrate the commercial resources of the West Indies and British Guiana.’

#### BEEF GALL-STONES TO JAPAN.

H.M. Consul-General at Chicago (Mr. A. Finn) has forwarded a copy of an article to the Board of Trade respecting the export of gall-stones from the United States to Japan. Shipments of these stones, from beef-animals, have been made from a packing house in Chicago to Japan, and the Japanese are said to be willing to pay prices ranging from \$100 to \$175 per pound. The reason for this is not known, but it is thought that the stones are used in physiological chemistry or in the process of dyeing fine fabrics, such as silk. This latter opinion is supported by the fact that the gall of an animal contains a considerable amount of colouring matter.—(*Indian Trade Journal*.)

#### JAPANESE RESTRICTION OF SUGAR PRODUCTION.

H.M. Commercial Attaché at Yokohama (Mr. E. F. Crowe) reports that the three principal sugar refineries in Japan have come to an agreement to limit their production—3490—8½

tion in order that they may avoid competition in the home market and combine in foreign markets. According to the newspapers, for every 20 piculs refined by the Dai Nippon Sugar Company the Yokohama Company will refine 5 piculs and the Kobe Company 2.9 piculs. The daily capacity of these refineries is given as 600 tons for the Dai Nippon Company, 120 to 130 tons for the Yokohama Company, and 70 to 80 tons for the Kobe Company, but as a matter of fact they have never worked up to these figures, the highest output of the Dai Nippon Company, for instance, being given as from 470 to 480 tons per day.—(British Board of Trade Journal.)

#### SWEETMEATS FROM RIPE APRICOTS.

Some time ago Sir Harry Rawson, Governor of New South Wales, called the attention of the New South Wales Department of Agriculture to a table delicacy made in Cape Colony called 'Mebos,' which he thought worth while experimenting with in Australia; and lately Miss Rawson obtained from the Cape a recipe for the process, which she forwarded to the department. The recipe, which is given below, is very simple:

'Take soft ripe apricots, lay them in salt water (about two ounces of salt to a quart bottle) for a few hours. Then lay them on a mat to dry in the sun; the next day press them between the hands to flatten and to let the stone come out. The next day repeat the process. At the Cape it generally dries and becomes "Mebos" in three or four days in the sun, but, if the weather should be damp, they might be dried in heated rooms or a cool oven. To crystallize the Mebos, lay them in lime-water for five minutes till they feel nice and tender, take out, wipe dry on a soft cloth, and rub coarse crystallized white sugar well into each; take 1½ lb. of sugar to 1 lb. of "Mebos." Pack closely, with lots of sugar in between, in jars that will cork well.'

This is said to make a very nice sweetmeat, and is reported to be a remedy for sea-sickness. The lime-water is made by adding two tablespoonfuls of fine lime to a quart of boiling water. This should be mixed well, and, when the lime has drained to the bottom, the clear water may be poured into a bottle, corked and kept for use.—(Indian Trade Journal.)

#### CANADIAN WHEELS IN THE ORIENT.

Canadian bicycles have no inconsiderable market in the Orient. A British consul, writing from Formosa, pictures that country as being in the golden age so far as cycling is concerned. The sport, according to his account, is exceedingly popular with both Japanese and Chinese residents. Bicycle meets on a monster scale are held twice each week in the capital, at which the vast audience is thoroughly cosmopolitan. In addition to Chinese, Japanese and foreign spectators lining the circular track, there were among the spectators at a recent contest more than fifty tattooed-faced savages of a head hunting tribe. Canadian wheels were very numerous and apparently popular.

#### NO CANADIAN PIANOS IN BRAZIL.

H.M. Consul at Bahia (Mr. D. R. O'Sullivan Beare) has forwarded the following notes on a few of the items of import into that district in which British manufactures appear to be inadequately represented at the present time:—

There is hardly a house in Bahia of any pretension to gentility which does not possess a pianoforte of some kind. These pianofortes are principally of French and German make, with a small proportion of American manufacture. The consul has not seen in Bahia a pianoforte of British manufacture, nor has he been able to ascertain whether there are any there.

#### OPENING FOR PHARMACEUTICAL SUPPLIES.

The drug trade is amongst the most important of Bahia, and the supplies are mainly of French or American manufacture, British products being very little in

evidence. The consul believes that there exists at Bahia a good opening for British trade in the matter of pharmaceutical preparations, alimentary products suitable for infant feeding, toilet preparations of various kinds, and similar articles of good quality and established merit. He understands that the medical men of Bahia are largely in the habit of prescribing for their patients medicinal preparations of a proprietary nature.

The local trade in 'patent medicines' is very considerable, American preparations being largely in vogue. The magnitude of the trade is evidenced by the fact that the bulk of the advertisements in all local newspapers consists of announcements setting forth the alleged virtues of patent medicines of various kinds. This trade also is exploited almost entirely by American and by French manufacturers.

In connection with the subject of the drug trade in Bahia, it should be borne in mind by British manufacturers who may propose to introduce their preparations into that market that all labels, directions for use and explanatory matter should be in the Portuguese language. It should also be remembered that in that market, as elsewhere, it is necessary, in order to command a sale for such articles, that they should be largely advertised.—(*British Board of Trade Journal*.)

#### PROTECTION OF TRADE-MARKS IN JAPAN.

So much has been said about the difficulty of obtaining protection for British trade-marks in Japan, that it is only fair to give publicity to an instance to the contrary, reported by the *Japan Chronicle*. It seems that the popularity of certain Coventry cycles in Nagoya and neighbourhood led some persons in those districts to imitate the trade-mark, attaching the mark to other cycles. The sole agent in Japan for the Coventry firm discovered this, and immediately communicated with the proper authorities, with the result that within two days twenty-six persons were arrested by the Nagoya police, after making a most thorough search. 'The prompt action of the Nagoya police,' remarks the *Chronicle*, 'certainly deserves commendation. and, in view of the circular issued by the governors recently, foreigners who find their trade-marks tampered with should make complaints to the proper authorities, who seem to have instructions to deal with the matter very strictly.' In England, says the *Manchester Guardian*, it would not be a matter for the police, but for comparatively slow and costly civil proceedings.—(*Indian Trade Journal*.)

#### MACHINERY FOR PERUVIAN EXHIBITION FREE.

The commercial intelligence branch of the Board of Trade have received from the Peruvian consul-general in London a translation of a decree of the Peruvian government enacting that, in order to encourage the importation and use in Peru of the latest agricultural implements and machinery, and to furnish agriculturists with authoritative information regarding them, manufacturers and importers of agricultural implements and machinery wishing to gratuitously make over to the government, as specimens to be used in the *Granja Escuela* (National Agricultural and Veterinary School), any of their manufactures, shall be entitled to the grant of a certificate respecting the advantages, qualities and working of the same. All the expenses of carriage, &c., on such implements and machinery remitted by foreign exhibitors will be discharged by the Peruvian government; the exhibitors will only have to put their consignment at the disposal of the Peruvian consul at the port of shipment, and to furnish him with an explanatory notice regarding their use and working.—(*British Board of Trade Journal*.)

#### PRESERVATION OF PINE FORESTS.

H.M. Consul at St. Louis (Mr. T. Erskine) reports that a scheme is under consideration for the formation of a corporation to control the yellow pine timber lands of the Southern states. It is estimated that 160,000,000,000 feet of yellow pine are

still standing in those states, but in view of the fact that 13,000,000,000 feet were cut last year, and that the demand for this class of timber is likely to increase, the extinction of these southern forests appears to be in sight.

The objects of the proposed company are to regulate the cut, patrol the forests to prevent destructive fires and protect growing saplings in order to ensure a supply in the future. It is hoped that if the scheme can be carried through it will ultimately cover all the timber lands in the Northern States.—(*British Board of Trade Journal*.)

#### SMALL SALMON PACK.

The San Francisco *Daily Commercial News*, in a review of the canned salmon pack of the Pacific coast, states that in view of the fact that the 'four-year run' of salmon will take place next season, preparations are, in accordance with precedent, being made for a small pack this year. The total output of canned salmon during 1907 amounted to 3,697,891 cases of forty-eight 1 lb. tins, and though it is as yet too early to form a close estimate as to the yield for the present season, it is considered probable that it will fall short of last season's total by 500,000 cases. This anticipated shortage will be mainly due to a decreased output from Puget Sound and from the Fraser river, where it is stated, seven canneries only will be working this year.

#### OUTPUT OF CEMENT IN JAPAN.

The total monthly output of cement in Japan, which was not more than 600,000 barrels two or three years ago, is believed to have increased to about 1,300,000 barrels, the producing capacity of every cement company being increased by 50 per cent. The industry was encouraged by the recent activity of water-power electric works, water-works, and other engineering works. Now the import of cement is materially checked. By the financial depression of late business activity has died away, however, and the cement companies newly promoted have delayed the construction of factories, while the older companies have reduced output and are now watching the progress of events.—(*Indian Trade Journal*.)

#### CANADIAN CATTLE FOR WEST INDIES.

As a result of the interest that has lately been created on the subject of increased trade between the West Indies and Canada, the Dominion government recently sent Mr. E. D. Elderkin, of the live stock branch of the Canadian Department of Agriculture, to the British West Indies, to inquire into and report upon the prospects of extending the trade in live stock between Canada and these colonies. Mr. Elderkin visited Demerara, Trinidad—where he addressed a meeting of the agricultural society on the subject of his mission—and Barbados, and also called at some of the Northern islands.

While the Dominion would naturally reap the chief benefit from increased trade in this direction, yet there is no doubt that West Indian stock owners might with advantage look to the Canadian market for animals for stud purposes, since the Dominion is so famous for the excellent qualities of its breeds of live stock.—(*B. W. I. Agricultural News*.)
